VOLUME 4

1953

PUBLISHED BY THE SOCIETY
MENASHA, WIS., AND NEW YORK

**Journals Published by the
American Mathematical Society**

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains some of the officially invited addresses presented before the Society. It contains also announcements and notes on matters of current interest, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1953. The subscription price is \$7.00. Sets of volumes of the BULLETIN are available as follows: vols. 1-36 (1894-1930), \$7.00 each; vols. 37-53 (1931-1947), \$9.00 each; vols. 54-55 (1948-1949), \$11.00 each; vols. 56-58 (1950-1952), \$7.00 each.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

One volume of six numbers is planned for 1953. The subscription price is \$11.00. Vols. 1-3 (1950-1952) are available at the price of \$11.00 each.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the PROCEEDINGS.

Normally, two volumes of three numbers each are published annually. The price per volume is \$6.00. Volumes 1-36 (1900-1934) consist of four numbers each. Volumes 66-67 (1949) consist of two numbers each. Sets of volumes are available as follows: vols. 1-21 (1900-1920), \$7.00 each; vols. 22-32 (1921-1930), \$8.00 each; vols. 33-36 (1931-1934), \$9.00 each; vols. 37-73 (1935-1952), \$6.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

The publication of MATHEMATICAL REVIEWS was begun in 1940. It appears monthly, excepting July, and the price per annual volume is \$20.00. Orders for complete volumes only are accepted. Volumes 1-12 (1940-1951) are available at \$20.00 per volume.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, 450 Ahnaip Street, Menasha, Wis., or 80 Waterman Street, Providence 6, R. I.

Entered as second-class matter at the post office at Menasha, Wisconsin. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 35.40 paragraph d, P. L. & R.

CONTENTS

Vol. 4, No. 1

FEBRUARY, 1953

Whole No. 19

	Page
Right H^* -algebras. By M. F. SMILEY.....	1
Note on a conjecture of André Weil. By L. CARLITZ.....	5
Congruences connected with three-line latin rectangles. By L. CARLITZ.....	9
Some sums connected with quadratic residues. By L. CARLITZ..	12
Factorization of n -soluble and n -nilpotent groups. By REINHOLD BAER.....	15
The identities of PI-rings. By S. A. AMITSUR.....	27
A note on pairs of normal matrices with property L. By N. A. WIEGMANN.....	35
Multiplicative homomorphisms of matrices. By ELIOT CHAMBERLIN and JAMES WOLFE.....	37
On a problem in conformal mapping of schlicht functions. By ALBERT SCHILD.....	43
Determination of the type and properties of the mapping function of a class of doubly-connected Riemann surfaces. By H. E. TAYLOR.....	52
On continuity properties of derivatives of sequences of functions. By J. L. WALSH.....	69
On the derivative of a polynomial and Chebyshev approximation. By T. S. MOTZKIN and J. L. WALSH.....	76
A uniqueness theorem for ordinary differential equations involving smooth functions. By L. MARKUS.....	88
Invariant measures defined by differential equations. By L. MARKUS.....	89
Solution of linear ordinary differential equations containing a parameter. By R. L. EVANS.....	92
Functionals of finite degree and the convergence of their Fourier-Hermite developments. By R. E. GRAVES.....	95
A theorem of Green's type for functions of two complex variables. By STEFAN BERGMAN.....	102
Kernel functions and class L^2 . By I. E. BLOCK.....	110
On the total variation of solutions of the bounded variation moment problem. By MELVIN BLOOM.....	118
On simple quadratures. By PHILIP DAVIS.....	127
An inequality for Minkowski matrices. By Y. K. WONG.....	137
Square roots of operators. By P. R. HALMOS, GÜNTER LUMER, and J. J. SCHÄFFER.....	142
On the convergence-abscissas of the generalized factorial series. By CHUJI TANAKA.....	150
On approximation to analytic functions by rational functions. By H. MARGARET ELLIOTT.....	161
A convex metric with unique segments. By R. H. BING.....	167

CONTENTS

Vol. 4, No. 2

APRIL, 1953

Whole No. 20

	Page
Transitive sets of homomorphisms. By W. R. SCOTT.....	175
A note on Bernoulli and Euler numbers of order $\pm p$. By L. CARLITZ.....	178
A note on the multiplication formulas for the Bernoulli and Euler polynomials. By L. CARLITZ.....	184
Note on S -numbers. By W. J. LEVEQUE.....	189
On spectral permanence for certain Banach algebras. By C. E. RICKART.....	191
On the embedding of Birkhoff-Witt rings in quotient fields. By DOV TAMARI.....	197
Zero divisors and commutativity of rings. By J. E. MCLAUGHLIN and ALEX ROSENBERG.....	203
Dual modules over a valuation ring. I. By IRVING KAPLANSKY.....	213
A proof of Henssenberg's theorem. By ARNO CRONHEIM.....	219
On inscribing n -dimensional sets in a regular n -simplex. By DAVID GALE.....	222
Planar line families. I. By P. C. HAMMER and ANDREW SOBCZYK.....	226
Continua which are the sum of a finite number of indecomposable continua. By C. E. BURGESS.....	234
Concerning continuous collections of continuous curves. By MARY-ELIZABETH HAMSTROM.....	240
On general cohomology theory. By TIBOR RADO.....	244
Effectiveness at the origin of the sum set of basic sets of polynomials. By R. H. MAKAR and B. H. MAKAR.....	246
Derived and integral sets of basic sets of polynomials. By M. N. MIKHAIL.....	251
The multiplicity of a class of perfect sets. By PAUL CIVIN and H. E. CHRESTENSON.....	260
Monotonic subsequences. By J. B. KRUSKAL.....	264
A set of generating functions for Bessel polynomials. By FRED BRAFMAN.....	275
The rotation theorem for starlike univalent functions. By A. W. GOODMAN.....	278
Line integral approximation of double integrals. By H. D. BRUNK and G. M. EWING.....	287
A modified initial condition for Cauchy's existence theorem. By J. P. BREWSTER.....	296
Recent investigations of the separation of Laplace's equation. By PARRY MOON and DOMINA E. SPENCER.....	302
Note on Dirichlet series. IV. On the singularities of Dirichlet series. By CHUJI TANAKA.....	308
Values of entire functions represented by gap Dirichlet series. By F. SUNYER I BALAGUER.....	310
A note on the reciprocal of a Fourier series. By A. EDREI and G. SZEGÖ.....	323
A Neumann series for the product of two Whittaker functions. By PETER HENRICI.....	329

CONTENTS

Vol. 4, No. 3

JUNE, 1953

Whole No. 21

	Page
Complex analytic manifolds without countable base. By EUGENIO CALABI and MAXWELL ROSENLICHT.....	335
Planar line families. II. By P. C. HAMMER and ANDREW SOBCZYK.....	341
Minimizing operators on subregions. By LEO SARIO.....	350
Real-valued functions on partially ordered sets. By SEYMOUR GINSBURG.....	356
A class of super-additive functions. By MICHAEL AISSSEN.....	360
Some counterexamples in the classification of open Riemann surfaces. By H. L. ROYDEN.....	363
The existence of harmonic vibrations. By B. VISWANATHAM..	371
A uniform approximation to Fourier coefficients. By M. L. JUNCOSA and D. M. YOUNG.....	373
On the summability of certain series for unbounded nonlinear functionals. By R. H. CAMERON and C. HATFIELD.....	377
Essentially admissible sequences. By R. C. BUCK.....	385
Support, convergence, and differentiability properties of generalized convex functions. By J. W. GREEN.....	391
The fundamental group of the principal component of a commutative Banach algebra. By E. K. BLUM.....	397
Remark on a formula for the Bernoulli numbers. By L. CARLITZ	400
Converse of a well known theorem on integral means. By LEE D. THOMPSON.....	402
On the separation of spectra. By K. G. WOLFSON.....	408
Generalizations of Banach-Hausdorff limits. By R. G. COOKE..	410
Zur Theorie der nichtkommutativen Bewertungen. By HANS-JÜRGEN DÜRBAUM.....	418
An addition theorem of Abelian groups for sets of elements. By H. B. MANN.....	423
Definitions of group involving quasi-inverse elements. By RAFAEL SÁNCHEZ-DÍAZ.....	424
A partial ordering defined by certain matrices. By J. R. JACKSON	429
On the continuity of the real roots of an algebraic equation. By MELVIN HENRIKSEN and J. R. ISBELL.....	431
The coefficients of certain infinite products. By MORRIS NEWMAN.....	435
On uniform distribution of algebraic numbers. By L. G. PECK	440
The Casimir operation for alternative algebras. By R. D. SCHAFER.....	444
A generalization of a theorem of Albert. By R. D. SCHAFER...	452
From generalized Cauchy-Riemann equations to linear algebras. By J. A. WARD.....	456
A note on the Scholz-Brauer problem in addition chains. By W. R. UTZ.....	462
A note on partitions in $GF[q, x]$. By L. CARLITZ.....	464
Intersection and closure. By W. H. GOTTSCHALK.....	470
A connected countable Hausdorff space. By R. H. BING.....	474
Boolean rings and cohomology. By A. D. WALLACE.....	475
On a theorem of Haupt and Wirtinger concerning the periods of a differential of the first kind, and a related topological theorem. By MURRAY GERSTENHABER.....	476
Regular convergence of manifolds with boundary. By P. A. WHITE.....	482
The number of structures of finite relations. By R. L. DAVIS..	486
Two notes on recursively enumerable sets. By J. C. E. DEKKER	495
Sequential minimax search for a maximum. By J. KIEFER....	502
Mean value methods in iteration. By W. R. MANN.....	506

AUGUST, 1953

Whole No. 22

	Page
A note on the derivations of Lie algebras. By G. F. LEGER...	511
Concerning Cartan's criterion. By H. E. CAMPBELL.....	515
A subdirect-union representation for completely distributive complete lattices. By G. N. RANEY.....	518
On the representation of an integer as the sum of three fourth powers. By M. PARTHASARATHY.....	523
Note on some formulas of Rodeja F. By L. CARLITZ.....	528
Note on some partition identities. By L. CARLITZ.....	530
Note on the class number of real quadratic fields. By L. CARLITZ	535
Permutations in a finite field. By L. CARLITZ.....	538
Properly primitive ternary indefinite quadratic genera of more than one class. By B. W. JONES and E. H. HADLOCK.....	539
On monotone multiplicative functions. By L. MOSER and J. LAMBEK.....	544
Representation of functions by matrices. Application to Faber polynomials. By ERI JABOTINSKY.....	546
Rational normal matrices satisfying the incidence equation. By A. A. ALBERT.....	554
Corrections to the paper "Remarks on fluctuations of sums of independent random variables." By K. L. CHUNG and M. KAC	560
On the Fourier expansion of stationary random processes. By R. C. DAVIS.....	564
An expression for $\vartheta_1(nz)/\vartheta_1(z)$. By W. N. BAILEY.....	569
A cardinal number associated with a family of sets. By SEYMOUR GINSBURG.....	573
Distribution functions containing a Gaussian factor. By HARRY POLLARD.....	578
On Euler methods of summability for double series. By G. N. WOLLAN.....	583
A remark on zeta functions. By H. KOBER.....	588
On the derivative of a univalent function. By A. J. LOHWATER and GEORGE PIRANIAN.....	591
Various remarks on univalent functions. By J. A. JENKINS... ..	595
On functions with infinitely many derivatives. By ARTHUR ROSENTHAL.....	600
Extreme points of vector functions. By SAMUEL KARLIN.....	603
Postulates for generalizations of Hilbert space. By H. RUBIN and M. H. STONE.....	611
Operators and initial-value problems. By R. M. REDHEFFER.. ..	617
On the global behavior of differential equations on two-dimensional manifolds. By FELIX HAAS.....	630
Hausdorff means with convex mass functions. By H. S. WALL.. ..	637
A nonconvergent iterative process. By J. H. ROBERTS.....	640
Local cross sections in locally compact groups. By P. S. MOSTERT.....	645
On the universal covering space and the fundamental group. By C. W. SAALFRANK.....	650
Dense imbedding of topological groups. By MORIKUNI GOTO	653
An equicontinuity condition for transformation groups. By J. D. BAUM.....	656
Representation of functions as absolutely convergent Fourier-Stieltjes transforms. By EDWIN HEWITT.....	663

OCTOBER, 1953

Whole No. 23

	Page
A sufficient condition for a regular matrix to sum a bounded divergent sequence. By A. MARY TROPPER.....	671
Some transformations of well-poised basic hypergeometric series of the type ${}_8\Phi_7$. By R. P. AGARWAL.....	678
Note on harmonic functions. By HENRY HELSON.....	686
A note on the uniqueness of double trigonometric series. By V. L. SHAPIRO.....	692
An asymptotic solution for a pair of first order equations. By S. D. CONTE and W. C. SANGREN.....	696
A solution of the singular initial value problem for the Euler-Poisson-Darboux equation. By J. B. DIAZ and H. F. WEINBERGER.....	703
Construction of solutions and propagation of errors in non-linear problems. By H. D. BLOCK.....	715
On a class of operators. By ARLEN BROWN.....	723
On a separation theorem for the zeros of the ultraspherical polynomials. By L. H. KANTER.....	729
Lattice packing in the plane without crossing arcs. By LEONARD TORNHEIM.....	734
The degree formula for the skew-representations of the symmetric group. By W. FEIT.....	740
On the algebraic structure of discontinuous groups. By MURRAY GERSTENHABER.....	745
The extension of an arbitrary Boolean algebra to an implicative Boolean algebra. By A. H. COPELAND, SR. and FRANK HARARY.....	751
Lie algebras of type F. By M. L. TOMBER.....	759
On bounds for the greatest characteristic root of a matrix with positive elements. By G. W. MEDLIN.....	769
Simple and semisimple near-rings. By D. W. BLACKETT.....	772
On the equidistribution of sums of independent random variables. By HERBERT ROBBINS.....	786
On orthogonal probability measures. By AGNES BERGER.....	800
The existence of line involutions of order greater than three possessing a linear complex of invariant lines. By C. R. WYLIE.....	807
On isometries of Euclidean spaces. By F. S. BECKMAN and D. A. QUARLES.....	810
On the group of affine transformations of an affinely connected manifold. By KATSUMI NOMIZU.....	816
The interval topology of a lattice. By E. S. NORTHAM.....	824
A characterization theorem for monotone mappings. By E. E. FLOYD and M. K. FORT.....	828
A note on paracompact spaces. By ERNEST MICHAEL.....	831

	Page
On the roots of equation $f(x) = \xi$ where $f(x)$ is real and continuous in (a, b) but monotonic in no subinterval of (a, b) . By K. PADMAVALLY.	839
A note on preharmonic functions. By A. C. ALLEN and B. H. MURDOCH.	842
A theorem of Phragmén-Lindelöf type. By ALFRED HUBER.	852
An inequality involving Bessel functions of argument nearly equal to their order. By K. M. SIEGEL.	858
On restrictions of operators. By JOHN WERMER.	860
On algebras of continuous functions. By JOHN WERMER.	866
Solution of Bernstein's approximation problem. By HARRY POLLARD.	869
On the solutions of second order linear differential equations. By C. T. TAAM.	876
The inversion of convolution transforms by differential operators. By CHARLES FOX.	880
The exchange formula for distributions and spans of translates. By R. E. EDWARDS.	888
A derivative test for finite solutions of games. By I. GLICKSBERG.	895
A condition that $\lim_{n \rightarrow \infty} n^{-1}T^n = 0$. By R. K. RITT.	898
Zeros of self-inversive polynomials. By GERMÁN ANCOCHEA.	900
Measure extensions and the martingale convergence theorem. By SHU-TEH C. MOY.	902
The impossibility of Fano's configuration in a projective plane with eight points per line. By W. A. PIERCE.	908
Uniqueness of the projective plane with 57 points. By MARSHALL HALL, JR.	912
Minimal sets of visibility. By F. A. VALENTINE.	917
The 1-factors of oriented graphs. By W. T. TUTTE.	922
On semi-simple Lie algebras. By JEAN DIEUDONNÉ.	931
A special congruence. By L. CARLITZ.	933
A note on abelian groups. By L. CARLITZ.	937
Right alternative rings. By ERWIN KLEINFELD.	939
Noncommutative extensions of Hilbert rings. By C. W. CURTIS.	945
Infinite-dimensional quadratic forms admitting composition. By IRVING KAPLANSKY.	956
An application of the Mauro Picone theorem for heat conduction. By G. W. EVANS II.	961
Continuity and homeomorphism groups. By Robert ELLIS.	969
Concerning certain types of webs. By MARY-ELIZABETH HAMSTROM.	974
Another remark on "Some problems in conformal mapping." By J. A. JENKINS.	978
Stepanoff flows on the Torus. By J. C. OXTOBY.	982
On an open question concerning fixed points. By W. L. STROTHER.	988
Errata, Volume 3.	993
Errata, Volume 4.	993
Index of Volume 4.	994
