PROCEEDINGS

OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITED BY

R. P. BOAS P. R. HALMOS ALEX ROSENBERG HANS SAMELSON

WITH THE COÖPERATION OF

I. N. HERSTEIN M. O. READE

RICHARD BELLMAN FELIX BROWDER E. E. FLOYD ERWIN KLEINFELD DANA SCOTT DANIEL ZELINSKY

J. C. MOORE A. H. TAUB

VOLUME 11, NUMBER 3, PART 1 JUNE, 1960

PUBLISHED BY THE SOCIETY MENASHA, WIS., AND PROVIDENCE, R. I. Journals Published by the

American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and details of its meetings. It contains some of the officially invited addresses presented before the Society, research announcements and problems, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1960. The subscription price is \$7.00. The prices of back volumes, insofar as they are available, are as follows: vols. 1–27, 29 (1894–1921, 1923), \$23.50 each; vol. 28 (1922), \$19.70; vols. 30–35 (1924–1929), \$20.00 each; vols. 36–55 (1930–1949), \$28.00 each; vols. 56–64 (1950–1959), \$14.00 each.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

rticles for insertion in the PROCEEDINGS should be typewritten, double spaced, and the manuscript should not exceed 12 pages. The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors pub-lished by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Lunt Building, Northwestern University, Evanston, Illinois; in probability, real variables, logic, and foundations to P. R. HALMOS, Eckhart Hall, University of Chicago, Chicago 37, Illinois; in abstract analysis to either P. R. HALMOS or ALEX ROSENBERG; in geometry and topology to HANS SAMELSON, Department of Mathematics, University of Michigan, Ann Arbor, Michigan; in other branches of analysis, applied mathe-matics, and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evenetics All other sempunpuscience to the address should be addressed. Evanston, Illinois. All other communications to the editors should be addressed to the Managing Editor, P. R. HALMOS.

One volume of six numbers is planned for 1960. The subscription price is \$11.00. Vols. 1-10 (1950-1959) are available at the price of \$14.00 each.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1960. The price per volume is \$8.00. Volumes 1-36 (1900–1934) consist of four numbers each. Volumes 66-67 (1949) and 78-88 (1955–1958) consist of two numbers each. All other volumes consist of three numbers each. The prices of back volumes, insofar as they are available, are as follows: vols. 1-36 (1900–1934), \$16.00 each; vols. 37-65, 68-77 (1934–1954), \$12.00 each; vols. 66, 67, 78-93 (1949, 1955-1959), \$8.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

The publication of MATHEMATICAL REVIEWS was begun in 1940. It appears monthly, excepting July, and the price per annual volume is \$50.00. Orders for com-plete volumes only are accepted. Volumes 10 and 17 are not available. Volumes 1–9, 11–16, 18, and 19 are available at the following prices: Vols. 1–14 (1940–1953), \$24.00 each; all other volumes \$50.00.

Printed in the United States of America

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, Curtis Reed Plaza, Menasha, Wis., or 190 Hope Street, Providence 6, R. I. Second-class postage paid at Menasha, Wisconsin. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 35.40, paragraph d., P. L. & R.

INDEX OF VOLUMES 1-10 1950-1959

Throughout this Index, bold face numerals are used to denote the volume number; light face numerals denote pages.

- Abhyankar, Shreeram. Two notes on formal power series, 7, 903.
- —— On the compositum of algebraically closed subfields, 7, 905.
- Addison, A. W. A note on the compositeness of numbers, 8, 151.
- Addison, J. W. and Kleene, S. C. A note on function quantification, 8, 1002.
- Adelman, D. M. Note on the arithmetic of bilinear transformations, 1, 443.
- Adney, J. E. On the power of a prime dividing the order of a group of automorphisms, 8, 627.
- Agarwal, R. P. Some transformations of well-poised basic hypergeometric series of the type $_{8}\Phi_{7}$, 4, 678.
- Agmon, Shmuel and Bers, Lipman. The expansion theorem for pseudo-analytic functions, 3, 757.
- Agnew, R. P. Mean values and Frullani integrals, 2, 237.
- Equivalence of methods for evaluation of sequences, 3, 550.
- Permutations preserving convergence of series, 6, 563.
- Aissen, Michael. A class of super-additive functions, 4, 360.
- Akutowicz, E. J. On the determination of the phase of a Fourier integral, II, 8, 234.
- Alavi, Y. and Wells, C. P. Expansions of parabolic wave functions, 10, 876.
- Albert, A. A. Rational normal matrices satisfying the incidence equation, 4, 554.
 A property of ordered rings, 8, 128.
- ---- Finite noncommutative division algebras, 9, 928.
- Allen, A. C. A generalization of a theorem by Hardy and Littlewood, 3, 727.
- Allen, A. C. and Murdoch, B. H. A note on preharmonic functions, 4, 842.
- Ames, D. B. Certain inversion formulas for the Laplace transform, 1, 99.
- Amir (Jakimovski), Amnon. On a converse of Abel's theorem, 3, 244.

- Amitsur, A. S. See Amitsur, S. A.
- Amitsur, S. A. Nil PI-rings, 2, 538.
- ---- An embedding of PI-rings, 3, 3.
- The identities of PI-rings, 4, 27.
- ----- Algebras over infinite fields, 7, 35.
- ----- Invariant submodules of simple rings, 7, 987.
- A generalization of Hilbert's Nullstellensatz, 8, 649.
- ----- Rings with a pivotal monomial, 9, 635.
- Amitsur, S. A. and Levitzki, J. Minimal identities for algebras, 1, 449.
- —— Remarks on minimal identities for algebras, 2, 320.
- Ancochea, Germán. Zeros of self-inversive polynomials, 4, 900.
- Anderson, F. W. A lattice characterization of completely regular G_{δ} -spaces, **6**, 757.
- Anderson, L. W. One dimensional topological lattices, 10, 715.
- Anderson, R. D. Continuous collections of continuous curves in the plane, 3, 647.
- Anderson, R. D. and Choquet, Gustave. A plane continuum no two of whose nondegenerate subcontinua are homeomorphic: An application of inverse limits, 10, 347.
- Anderson, R. D. and Hamstrom, M.-E. A note on continuous collections of continuous curves filling up a continuous curve in the plane, 5, 748.
- On spaces filled up by continuous collections of atriodic continuous curves, 6, 766.
- Anderson, T. W. The integral of a symmetric unimodal function over a symmetric convex set and some probability inequalities, 6, 170.
- Andree, R. V. and Petersen, G. M. Matrix methods of summation, regular for p-adic valuation, 7, 250.
- Andrews, J. J. A characterization of light open maps of Euclidean spaces into Euclidean spaces, 9, 860.
- Ankeny, N. C. Sums of three squares, 8, 316.

- Ankeny, N. C. and Chowla, S. The relation between the class number and the distribution of primes, 1, 775.
- Apostol, T. M. Remark on the Hurwitz zeta function, 2, 690.
- —— Some series involving the Riemann zeta function, 5, 239.
- Apostol, T. M. and Zuckerman, H. S. On magic squares constructed by the uniform step method, 2, 557.
- Arens, Richard. The adjoint of a bilinear operation, 2, 839.
- Arens, Richard and Hoffman, Kenneth. Algebraic extension of normed algebras, 7, 203.
- Arens, Richard and Singer, I. M. Function values as boundary integrals, 5, 735.
- Arf, C. On the methods of Rayleigh-Ritz-Weinstein, 3, 223.
- Arsove, M. G. The Looman-Menchoff theorem and some subharmonic function analogues, 6, 94.
- Normal families of subharmonic functions, 7, 115.
- Proper bases and automorphisms in the space of entire functions, 8, 264.
- Artzy, Rafael. On loops with a special property, 6, 448.
- —— Self-dual configurations and their Levi graphs, 7, 299.
- —— On automorphic-inverse properties in loops, 10, 588.
- Atkinson, F. V. On polynomials with least weighted maximum, 7, 267.
- Aucoin, A. A. Systems of Diophantine equations, 2, 760.
- A generalization of Abel's transformation, 3, 120.
- Aulbach, Helmut. Some geometrical inequalities for sets in Hilbert space, 2, 36.
- Auslander, Louis. On holonomy covering spaces, 7, 685.
- On the group of affinities of locally affine spaces, 9, 471.
- A fixed point theorem for nilpotent Lie groups, 9, 822.
- Auslander, Louis and Auslander, Maurice. Solvable Lie groups and locally Euclidean Riemann spaces, 9, 933.
- Auslander, Louis and MacKenzie, R. E. On the topology of tangent bundles, 10, 627
- Auslander, Maurice. On regular group *igrings*, 8, 658.

- Remark on automorphisms of groups, 9, 229.
- ----- See Auslander, Louis.
- Austin, D. G. An isomorphism theorem for finitely additive measures, **6**, 205.
- Some differentiation properties of Markoff transition probability functions, 7, 751.
- Azpeitia, A. G. Convergence of sequences of complex terms defined by iteration, 9, 428.

Baer, Reinhold. Factorization of n-soluble and n-nilpotent groups, 4, 15.

----- Supersoluble groups, 6, 16.

- Bagemihl, F. and Sprinkle, H D On a proposition of Sierpiński's which is equivalent to the continuum hypothesis, 5, 726.
- Bagley, R. W., Connell, E. H. and McKnight, J. D., Jr. On properties characterizing pseudo-compact spaces, 9, 500.
- Bahadur, R. R. Measurable subspaces and subalgebras, 6, 565.
- Bailey, W. N. An expression for $\vartheta_1(nz)/\vartheta_1(z)$, 4, 569.
- Balachandran, V. K. On complete lattices and a problem of Birkhoff and Frink, 6, 548.
- Balaguer. See Sunyer i Balaguer, F.
- Ball, B. J. Countable paracompactness in linearly ordered spaces, 5, 190.
- Certain collections of arcs in E³, 10, 699.
- Bang, Thøger. A solution of the "plank problem," 2, 990.
- Barrett, J. H. Behavior of solutions of second order self-adjoint differential equations, 6, 247.
- A Prüfer transformation for matrix differential equations, 8, 510.
- Disconjugacy of second-order linear differential equations with non-negative coefficients, 10, 552.
- Barrett, L. K. On a question concerning partitioning raised by R. H. Bing, 8, 602.

Journals Published by the

American Mathematical Society

Soviet Mathematics-Doklady

This journal contains the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet DOKLADY. (The DOKLADY AKADEMII NAUK SSSR is issued three times a month, six issues constituting a volume.)

Rates per annual volume are as follows: Domestic subscriptions, \$17.50; foreign subscriptions, \$20.00. Single issues are \$5.00.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists. The subscription price is \$7.00 per annual volume of 7 numbers. A single copy is

\$2.00.

All communications should be addressed to the Editor, G. L. WALKER, 190 Hope Street, Providence 6, R. I. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts of the papers to be pre-sented in the meetings announced in that issue. These deadlines are published regularly on the inside front cover page.

Memoirs of the American Mathematical Society

This is a series of paperbound research tracts which are of the same general char-acter as papers published in the TRANSACTIONS. An issue contains either a single monograph or a group of cognate papers. Published at irregular intervals. The latest numbers in this series are:

A. Erdélyi and C. A. Swanson, Asymptotic forms of Whittaker's confluent	
hypergeometric function. 49 pp. 1957.	1.40
Walter Strodt, Principal solutions of ordinary differential equations in the	
complex domain, 107 pp. 1957.	2.00
Emery Thomas. The generalized Pontriagin cohomology operations and rings	
with divided powers. 82 pp. 1957.	1.70
Ernst Snapper, Cohomology groups and genera of higher-dimensional fields.	
100 pp. 1957.	1.90
Edward Halpern, Twisted polynomial hyperalgebras, 61 pp. 1958.	1.50
L. Auslander and L. Markus, Flat Lorentz 3-manifolds, 60 pp. 1959.	2.00
W. S. Loud. Periodic solutions of $x'' + cx' + g(x) = \epsilon f(t)$, 58 pp. 1959.	2.00
R. S. Pierce, Translation lattices, 66 pp. 1959.	1.70
Ernst Snapper, Cohomology theory and algebraic correspondences, 96 pp.	
1959.	1.90
E. M. Zaustinsky, Spaces with non-symmetric distance, 91 pp. 1959.	2.00
Richard Bellman and K. L. Cooke, Asymptotic behavior of solutions of differ-	
ential-difference equations, 91 pp. 1959.	2.00
Richard S. Palasi, The classification of G-spaces, 72 pp. 1960.	1.65
	A. Erdélyi and C. A. Swanson, Asymptotic forms of Whittaker's confluent hypergeometric function. 49 pp. 1957. Walter Strodt, Principal solutions of ordinary differential equations in the complex domain. 107 pp. 1957. Emery Thomas, The generalized Pontrjagin cohomology operations and rings with divided powers. 82 pp. 1957. Ernst Snapper, Cohomology groups and genera of higher-dimensional fields. 100 pp. 1957. Edward Halpern, Twisted polynomial hyperalgebras. 61 pp. 1958. L. Auslander and L. Markus, Flat Lorentz 3-manifolds. 60 pp. 1959. W. S. Ernst Snapper, Cohomology theory and algebraic correspondences. 96 pp. 1959. E. M. Zaustinsky, Spaces with non-symmetric distance. 91 pp. 1959. Richard Bellman and K. L. Cooke, Asymptotic behavior of solutions of differ- ential-difference equations. 91 pp. 1959. Bichard S. Palasi. The classification of G-spaces. 72 pp. 1960.

CONTENTS

Vol. 11, No. 3, Part 1 JUNE, 1960

Whole No. 63

	1 age
Verification of a conjecture of Gerstenhaber. By J. P. JANS	335
Differentiably simple rings. By E. C. POSNER	337
A note on metric density of sets of real numbers. By N. F. G. MARTIN.	344
On the distributive law. By WY. HSIANG	348
A note on completions of modules. By J. J. ROTMAN	356
Complete ideals in local rings. By H. T. MUHLY	361
Difference sets in abelian groups. By P. K. MENON	368
On Lie algebras of classical type. By RICHARD BLOCK	377
On rings with one-sided field of quotients. By E. R. GENTILE	380
Divisible modules. By EBEN MATLIS	385
A characterization of algebraic number fields with class number two. By L. CARLITZ	301
Concerning strong Lie ideals, By W. E. BAXTER.	393
Triangle inequality in <i>l</i> -groups. By J. A. KALMAN	395
A generalization of the Cartan-Brauer-Hua theorem. By EUGENE	0,00
SCHENKMAN and W. R. SCOTT	396
Conditions for the power associativity of algebras. By J. D. LEADLEY	
A note on a number theoretical paper of Sierpinski. By ALFRED	399
Brauer.	406
A note on certain polynomial algebras. By EMERY THOMAS	410
The converse of the Individual Ergodic Theorem. By F. B. WRIGHT.	415
The Lagrange interpolation formula and Stirling numbers. By H. W.	
Gould	421
Sario's lemma on harmonic functions. By Kôtaro OIKAWA	425
Almost periodic solutions for systems of differential equations near	
points of nonlinear first approximation. By GEORGE SEIFERT	429
The area of a nonparametric surface. By HERBERT FEDERER	436
$1 - 1 + 1 - 1 + \cdots = 1/2$. By D. J. NEWMAN	440
Insertion of ± signs in e ^z . By D. J. NEWMAN	444
Stirling number representation problems. By H. W. GOULD	447
Note on Nörlund's polynomial $B^{(2)}$. By L. CARLITZ,	452
A theorem on permutations in a finite field. By L. CARLITZ	456
A note on lacunary Fourier series. By M. TOMIC	460
A remark concerning the area of a nonparametric surface. By CASPER	162
On the Vantanesish increation Dr. W. C. STRUNG	403
Almost convergence and the Duck Pollord property, Dr. C. M. Durph	400
SEN.	469
Some applications of an approximation theorem for inverse limits. By	170
New method for expansion and contraction mana in uniform areases. Du	410
T A Prown and W W Concorr	102
On portially ordered acts possessing a unique order competible togel	403
on partially ordered sets possessing a unique order-compatible topol-	197
A note on sets of constant width By 7 A MELTAR	407
A hote on sets of constant width. By Z. A. WELZAK	493
On affinally connected manifolds where terrion can be transformed into	490
constant componente By M Pivi	505
constant components. By M. TINL	303

GEORGE BANTA COMPANY, INC., MENASHA, WISCONSIN
