## Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1963. The subscription price is \$7.00. The prices of back volumes, insofar as they are available, are as follows: vols. 1-27, 29, (1894-1921, 1923), \$23.50 each; vol. 28 (1922), \$19.70; vols. 30-35 (1924-1929), \$20.00 each; vols. 36-55 (1930-1949), \$28.00 each; vols. 56-68 (1950-1962), \$14.00.

## Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Department of Mathematics, Cornell University, Ithaca, New York or GEORGE WHAPLES, Department of Mathematics, Indiana University, Bloomington, Indiana; in probability, real variables, logic, and foundations to P. R. HALMOS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan; in abstract analysis to either P. R. HALMOS or ALEX ROSENBERG; in geometry and topology to ELDON DYER, Eckhart Hall, University of Chicago, Chicago 37, Illinois; in other branches of analysis, applied mathematics, and all other fields to M. H. HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois or FRITZ JOHN, Institute of Mathematical Sciences, 4 Washington Place, New York 3, New York. All other communications to the editors should be addressed to the Managing Editor, Alex Rosenberg. Inquiries from authors regarding reprints and changes of address for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, 190 Hope Street, Providence 6, Rhode Island.

One volume of six numbers is planned for 1963. The subscription price is \$11.00. Vols. 1-13 (1950-1962) are available at the price of \$14.00 each. Volume 1 was published in 1950.

## Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1963. The price per volume is \$8.00. All inquiries for volumes 1-69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York 3, New York. Orders for volumes 70-106 should be directed to the American Mathematical Society; the price for back issues insofar as they are available is \$4.00 per issue (vols. 78-89 contain 2 issues, volumes 70-77 and 90-106 contain 3 issues).

---

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, 190 Hope Street, Providence 6, R. I.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

### Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes will be published in 1963, Volume 25 and Volume 26. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Subscription price per volume of 7 issues is \$50.00; 2 volumes per year \$100.00. Back issues: volumes 1-16 (1940-1955) \$42.00 per volume; volumes 17-24 (1956-1962) \$50.00 per volume.

### Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the *DOKLADY AKADEMII NAUK SSSR* in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet *DOKLADY*. (The *DOKLADY AKADEMII NAUK SSSR* is issued three times a month, six issues constituting a volume.)

Current subscriptions are as follows: Domestic, \$17.50; foreign, \$20.00. Single issues are \$5.00. Volumes 1, 2 and 3 (1960-1962) are available at \$30.00 per volume or \$5.00 per issue.

### Chinese Mathematics—Acta

This is a cover to cover translation into English of *Acta Mathematica Sinica*, published by Academia Sinica Peking, People's Republic of China. *Acta Mathematica Sinica* contains current research in all fields of pure mathematics. Two volumes, Vols. 2 and 3, are planned for 1963. Vol. 1 (1962) \$30.00. Subscription price per volume is \$20.00.

### Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is \$7.00 per annual volume of seven numbers. A single copy is \$2.00. Orders for back volumes (back issues of the last two years only are available) are \$14.00 per volume.

All communications should be addressed to the Editor, 190 Hope Street, Providence 6, Rhode Island. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

### Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields. Published by the Society for the National Academy of Sciences-National Research Council.

Subscription price is \$8.00 per volume of 4 issues. Single copies are \$2.50. Back issues insofar as they are available are as follows: 1943-1947, \$1.00 per issue; 1948-1949, \$1.25 per issue; 1950-1958, \$1.50 per issue (or \$5.00 per volume); 1959-1961, \$2.50 per issue (or \$8.00 per volume).

# CONTENTS

Vol. 14, No. 3

JUNE, 1963

Whole No. 81

	Page
An application of graph theory to algebra. By R. G. SWAN.....	367
Uncountably many inequivalent analytic actions of a compact group on $R^n$ . By R. S. PALAIS and R. W. RICHARDSON, JR.....	374
A remark on knot groups with a center. By L. P. NEUWIRTH.....	378
On Stallings fibrations. By LEE NEUWIRTH.....	380
A compact topology for a lattice. By A. J. INSEL.....	382
Homeomorphisms on a solid torus. By D. R. McMILLAN, JR.....	386
Open 3-manifolds which are simply connected at infinity. By C. H. EDWARDS, JR.....	391
Interval clans with nondegenerate kernel. By R. C. PHILLIPS.....	396
Stellar neighborhoods in polyhedral manifolds. By R. H. ROSEN.....	401
Lattice isomorphisms of finite non-abelian groups of exponent $p$ . By R. F. SPRING.....	407
Ramification in elliptic modular function fields. By D. L. McQUILLAN.....	414
The existence of free unions in classes of abstract algebras. By G. C. HEWITT..	417
Positive definite measures. By R. J. BLATTNER.....	423
Isotopy and parastropy of quasigroups. By R. ARTZY.....	429
On regular local rings. By K. R. MOUNT.....	432
On certain contraction mappings in a partially ordered vector space. By A. C. THOMPSON.....	438
A theorem on productive functions. By T. G. McLAUGHLIN.....	444
Another class of invertible operators without square roots. By DON DECKARD and CARL PEARCY.....	445
Sharp bounds on the distribution of the Hardy-Littlewood maximal function. By DAVID BLACKWELL and L. E. DUBINS.....	450
Minimal regular spaces. By M. P. BERRI and R. H. SORGENFREY.....	454
A generalization of absolute Rieszian summability. By B. J. BOYER and L. I. HOLDER.....	459
On the quotient of entire functions of lower order less than one. By ANDERS HYLLENGREN.....	465
On the spectral synthesis of bounded functions. By MASAKITI KINUKAWA....	468
On the boundary values of Blaschke products and their quotients. By CHUJI TANAKA.....	472
Approximation by step functions. By GEORG AUMANN.....	477
Equi-absolute convergence of eigenfunction expansions. By G. W. HEDSTROM..	483
A comparison theorem for spaces of entire functions. By LOUIS DE BRANGES..	490
On relations among some constants of an entire function. By J. GOPALA KRISHNA.....	497
Rapidly increasing kernels. By HAROLD WIDOM.....	501
On asymmetric entire functions. By Q. I. RAHMAN.....	507
Upper and lower bounds of the norm of solutions of differential systems. By V. LAKSHMIKANTHAM.....	509
The radius of univalence of certain analytic functions. By T. H. MACGREGOR..	514
The radius of univalence of certain analytic functions. II. By T. H. MACGREGOR	521

## SHORTER NOTE

A new proof of a stability estimate of Lyapunov. By HARRY HOCHSTADT.....	525
