

PROCEEDINGS
OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY

ELDON DYER	R. C. BUCK
M. H. HEINS	FRITZ JOHN
ALEX ROSENBERG	GEORGE WHAPLES

WITH THE COÖPERATION OF

WILLIAM BROWDER	Y. W. CHEN	C. W. CURTIS
F. W. GEHRING	MICHEL KERVAIRE	D. J. LEWIS
WILHELM MAGNUS	ANIL NERODE	S. M. SHAH
	PETER UNGAR	

VOLUME 15, NUMBER 5
OCTOBER, 1964

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1964. The subscription price is \$7.00. The prices of back volumes, insofar as they are available, are as follows: vols. 1-27, 29 (1894-1921, 1923), \$23.50 each; vol. 28 (1922), \$19.70; vols. 30-35 (1924-1929), \$20.00 each; vols. 36-55 (1930-1949), \$28.00 each; vols. 56-69 (1950-1963), \$14.00.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Department of Mathematics, Cornell University, Ithaca, New York or GEORGE WHAPLES, Department of Mathematics, Indiana University, Bloomington, Indiana; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison 6, Wisconsin; in abstract analysis to either R. C. BUCK or ALEX ROSENBERG; in geometry and topology to ELTON DYER, Department of Mathematics, Rice University, Houston 1, Texas; in other branches of analysis, applied mathematics, and all other fields to M. H. HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois or FRITZ JOHN, Institute of Mathematical Sciences, 4 Washington Place, New York 3, New York. All other communications to the editors should be addressed to the Managing Editor, Eldon Dyer. Inquiries from authors regarding reprints and changes of address for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, 190 Hope Street, Providence, Rhode Island 02906.

One volume of six numbers is planned for 1964. The subscription price is \$11.00. Vols. 1-14 (1950-1963) are available at the price of \$14.00 each. Volume 1 was published in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1964. The price per volume is \$8.00. All inquiries for volumes 1-69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York 3, New York. Orders for volumes 70-112 should be directed to the American Mathematical Society; the price for back issues insofar as they are available is \$4.00 per issue (vols. 78-89 contain 2 issues, volumes 70-77 and 90-112 contain 3 issues).

THE PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, 190 Hope Street, Providence, R. I. 02906.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes will be published in 1964, Volume 27 and Volume 28. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Subscription price per volume of 7 issues is \$50.00; 2 volumes per year \$100.00. Back issues: volumes 1-16 (1940-1955) \$42.00 per volume; volumes 17-25 (1956-1963) \$50.00 per volume.

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the DOKLADY AKADEMIĖ NAUK SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet DOKLADY. (The DOKLADY AKADEMIĖ NAUK SSSR is issued three times a month, six issues constituting a volume.)

Subscription price per volume \$35.00. Single issues are \$7.00. Volumes 1, 2, 3, and 4 (1960-1963) are available at \$40.00 per volume, or \$7.00 per issue.

Chinese Mathematics—Acta

This is a cover to cover translation into English of Acta Mathematica Sinica, published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics. Two volumes, Vols. 2 and 3, were published in 1963. Volumes 1, 2, and 3 are available at \$30.00 per volume; single issue price at one-third of the volume price.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is \$7.00 per annual volume of seven numbers. A single copy is \$2.00. Orders for back volumes (back issues of the last two years only are available) are \$14.00 per volume.

All communications should be addressed to the Editor, 190 Hope Street, Providence, Rhode Island 02906. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields. Published by the Society for the National Academy of Sciences-National Research Council.

Subscription price is \$8.00 per volume of 4 issues. Single copies are \$2.50. Back issues insofar as they are available are \$3.00 per issue; \$12.00 per volume. Write for specific information.

CONTENTS

Vol. 15, No. 5

OCTOBER, 1964

Whole No. 89

	Page
On clans of non-negative matrices. By D. R. BROWN.....	671
A new type of vector field and invariant differential systems. By H. H. JOHNSON.....	675
On $(n-1)$ -dimensional factors of I^n . By JEHPIIL KIM.....	679
Homotopical nilpotence of S^3 . By G. J. PORTER.....	681
A further extension of Lebesgue's covering theorem. By G. M. ROSENSTEIN, JR.....	683
On nonexpansive mappings. By MICHAEL EDELSTEIN.....	689
The annihilator of a knot module. By R. H. CROWELL.....	696
Note on pointwise periodic semigroups. By A. L. HUDSON.....	700
On fixed points of commuting analytic functions. By A. L. SHIELDS.....	703
An ideal class invariant of knots. By R. H. FOX and N. SMYTHE.....	707
Some rate invariant sequence transformations. By D. F. DAWSON.....	710
Differential and integral inequalities. By R. M. REDHEFFER.....	715
Mean oscillation over cubes and Hölder continuity. By N. G. MEYERS.....	717
Phragmén-Lindelöf theorems for second order quasi-linear elliptic partial differential equations. By J. O. HERZOG.....	721
Quadratic forms and chain sequences. By ROBERT SEALL and MARION WETZEL.....	729
On the stabilization of linear systems. By C. E. LANGENHOP.....	735
Summation of sequences and summation of series. By G. G. LORENTZ and K. ZELLER.....	743
Translation invariant subspaces of finite dimension. By P. M. ANSELONE and J. KOREVAAR.....	747
Extremal polynomials and the zeros of the derivative of a rational function. By J. L. WALSH and O. SHISHA.....	753
Nonlinear differential equations with forcing terms. By FRED BRAUER.....	758
The structure of hyperreducible triangular algebras. By J. R. SCHUE.....	766
The extension and the lifting properties of Banach spaces. By MORISUKE HASUMI and G. L. SEEVER.....	773
Geodesics and Lebesgue area. By EDWARD SILVERMAN.....	775
Commuting Boolean algebras of projections. II. Boundedness in L_p . By C. A. MCCARTHY.....	781
A counterexample to a problem of Sz.-Nagy. By S. R. FOGUEL.....	788
On Foguel's answer to Nagy's question. By P. R. HALMOS.....	791
Ergodic and mixing properties of Chebyshev polynomials. By R. L. ADLER and T. J. RIVLIN.....	794
The k -norm extension property for Banach spaces. By H. B. COHEN.....	797
Cohomology of groups in arbitrary categories. By BODO PAREIGIS.....	803
On the number of irreducible modular representations of a finite group. By IRVING REINER.....	810
Integral domains which are almost Dedekind. By R. W. GILMER, JR.....	813
A note on perturbation theory for semi-groups of operators. By A. OLUBUMMO.....	818
Nonsolvable IC groups. By S. BAUMAN.....	823
Groups of order 1. By E. S. RAPAPORT.....	828
Satellites of half exact functors, a correction. By HARLEY FLANDERS.....	834
On the group generated by a free semigroup. By K. I. APPEL and F. M. DJORUP.....	838
Density and uniform density. By F. P. CALLAHAN.....	841
Linear systems of real quadratic forms. By EUGENIO CALABI.....	844
