

PROCEEDINGS

OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITED BY

ELDON DYER	R. C. BUCK
M. H. HEINS	FRITZ JOHN
ALEX ROSENBERG	GEORGE WHAPLES

WITH THE COÖPERATION OF

WILLIAM BROWDER	W. H. FUCHS	ANIL NERODE
DAVID A. BUCHSBAUM	D. J. LEWIS	MELVIN ROTHENBERG
JOSHUA CHOVER	WILHELM MAGNUS	S. M. SHAH
	PETER UNGAR	

VOLUME 16, NUMBER 3
JUNE, 1965

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1965.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Department of Mathematics, Cornell University, Ithaca, New York or GEORGE WHAPLES, Department of Mathematics, Indiana University, Bloomington, Indiana; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison 6, Wisconsin; in abstract analysis to either R. C. BUCK or ALEX ROSENBERG; in geometry and topology to ELDON DYER, Department of Mathematics, Rice University, Houston 1, Texas; in other branches of analysis, applied mathematics, and all other fields to M. H. HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois or FRITZ JOHN, Courant Institute of Mathematical Sciences, 4 Washington Place, New York 3, New York. All other communications to the editors should be addressed to the Managing Editor, Eldon Dyer. Inquiries from authors regarding reprints and changes of address for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02904.

One volume of six numbers is planned for 1965. The subscription price is \$11.00. Vols. 1-15 (1950-1964) are available at the price of \$14.00 each. Volume 1 was published in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

All inquiries for volumes 1-69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York 3, New York. Orders for volumes 70-113 should be directed to the American Mathematical Society.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P.O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes will be published in 1965, Volume 29 and Volume 30. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the DOKLADY AKADEMIĬ NAUK SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet DOKLADY. (The DOKLADY AKADEMIĬ NAUK SSSR is issued three times a month, six issues constituting a volume.)

Chinese Mathematics—Acta

This is a cover to cover translation into English of Acta Mathematica Sinica, published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P. O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

CONTENTS

Vol. 16, No 3

JUNE, 1965

Whole No. 93

	Page
Uniqueness and the convergence of successive approximations. II. By A. D. ZIEBUR	335
On restrictions of functions in the spaces $P^{a,p}$ and $B^{a,p}$. By P. SZEPTYCKI	341
A generalized eigenfunction expansion of the Green's function. By MAURICE MACHOVER	348
Distribution proof of Wiener's Tauberian theorem. By JACOB KOREVAAR	353
A characterization of operators mapping a cone into its dual. By ALBERT NOVIKOFF	356
A bound on determinants. By W. M. FRANK	360
Note on differential operators with a purely continuous spectrum. By F. ODEH	363
Natural deduction, inference, and consistency. By R. L. STANLEY	367
Eigenvalues of modulus 1. By BENTON JAMISON	375
Equal-difference BIB designs. By B. J. GASSNER	378
The range of Tf for certain linear operators T . By R. R. PHELPS	381
Perspectivity in projection lattices. By P. A. FILLMORE	383
An ergodic lemma. By M. A. AKCOGLU	388
Some remarks on symplectic automorphisms. By G. W. MACKEY	393
An L_p theory for a Markov process with a sub-invariant measure. By S. R. FOGUEL	398
A geometric characterization of Gleason parts. By H. S. BEAR	407
A note on the ergodic theorem. By J. R. BLUM and D. L. HANSON	413
On the extension of Borel measures. By S. K. BERBERIAN	415
Vector-valued summability methods on a linear normed space. By L. C. KURTZ and D. H. TUCKER	419
On integral transformations with positive kernel. By EMILIO GAGLIARDO	429
On quasi-convergence of series of independent random variables. By H. G. TUCKER	435
Real Hilbert algebras with identity. By M. F. SMILEY	440
Machine dependence of degrees of difficulty. By MICHAEL ARBIB and MANUEL BLUM	442
Changes of topology and fixed points for multi-valued functions. By R. E. SMITHSON	448
Homotopy for cellular set-valued functions. By T. R. BRAHANA, M. K. FORT, JR. and W. G. HORSTMAN	455
The cohomology ring of a compact Lie group with bi-invariant metric. By A. L. MAYER	460
On connected irresolvable Hausdorff spaces. By D. R. ANDERSON	463
On a class of countably paracompact spaces. By JOHN MACK	467
A locally compact metric space is almost invariant under a closed mapping. By EDWIN DUDA	473
A note on counting isotropy subgroups. By L. N. MANN	476
Differentiable actions of compact abelian Lie groups on S^n . By L. N. MANN	480
Upper semicontinuous decompositions of developable spaces. By J. M. WORRELL, JR.	485
On the Ricci and Weingarten maps of a hypersurface. By N. HICKS	491
On pseudometrics for generalized uniform structures. By SOLOMON LEADER	493
Deleted products of cones. By A. H. COPELAND, JR.	496
Plane geometries in terms of projections. By HOWARD LEVI	503
A short proof of the James periodicity of $\pi_{k+p}(V_{k+m,m})$. By MARK MAHOWALD	512
Proximal relations in topological dynamics. By T. S. WU	513
A totally bounded, complete uniform space is compact. By D. L. FRANK	514
Some properties of certain sets of coprime integers. By R. C. ENTRINGER	515
A note on models of identities. By A. K. AUSTIN	522
An elementary interpolation theorem. By D. G. CANTOR and R. R. PHELPS	523
Unique factorization in a principal right ideal domain. By R. E. JOHNSON	526
On the expression of a number as the sum of two squares in totally real algebraic number fields. By WERNER SCHAAL	529
Partial homomorphic images of Brandt groupoids. By A. H. CLIFFORD	538
Every standard construction is induced by a pair of adjoint functors. By H. KLEISLI	544
On the commutativity of restricted Lie algebra. By B.-S. CHWE	547
A sequence of (± 1) -determinants with large values. By G. F. CLEMENTS and B. LINDSTRÖM	548
Note on the units of a real quadratic field. By S. CHOWLA	551
A property of finite simple non-abelian groups. By W. D. MAURER and J. L. RHODES	552
A generalized Koszul complex. III. A remark on general acyclicity. By D. A. BUCHSBAUM and D. S. RIM	555
Errata, Volume 16	558
