VOLUME 17, NUMBER 2 APRIL, 1966

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY PROVIDENCE, RHODE ISLAND

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1966.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department. Articles for insertion in the PROCEEDINGS should be typewritten, double spaced.

The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139 or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois 61801; in probability, real variables, logic, and founda-tions to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or FRITZ JOHN, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10002; in geometry and topology to ELDON DYER, Department of Mathematics, Columbia University, New York, New York; in other branches of analysis, applied mathematics, and all other fields to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850 or FRITZ JOHN. All other communica-tions to the editors should be addressed to the Managing Editor, R. C. BUCK. In-quiries from authors regarding reprints and changes of address for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904. One volume of six numbers is planned for 1966. The subscription price is \$12.00. Vols. 1-16 (1950-1965) are available at the price of \$14.00 each. Volume 1 was pub-lished in 1950. Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK,

lished in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and

All inquiries for Volumes 1–69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York 3, New York. Orders for Volumes 70–121 should be directed to the American Mathematical Society.

Copyright (C), American Mathematical Society, 1966

Printed in the United States of America

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P.O. Box 6248, Providence, R. I. 02904. Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorisation is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

Contents—Continued from back cover

Elementary classes closed under descending intersection. By R. L. VAUGHT.	430
A converse to the high indices theorem, By WALTER RUDIN.	434
Regular boundary points in Markov chains, By A. W. KNAPP.	435
A law of the iterated logarithm for stable summands. By LOSHUA CHOVER	441
On sectional curvatures and characteristic of homogeneous spaces By	
WEDNED GREUP and PHILIPPE TONDEUP	444
Oriented manifolds fibered over the circle By R O Buppicy	440
A theorem on local isometries By W A KIPK	153
Some characterizations of functions of Baire class 1 By F. S. THOMAS, IP	156
Total normality and the hereditary property By P. F. HODEL	162
On Hamiltonian airquita in finite grapha Pre C. Str. I. A. NASH WALLAND	404
The intersection of the free maximal ideals in a complete space. Dr. S. M.	400
The intersection of the free maximal ideals in a complete space. By 5. M.	160
KOBINSON.	408
A necessary and sumcient condition for membership in [uv]. By D. G.	170
MEAD	470
D' 11 Grand Stranger Stranger Broken De K McConstraint	4/4
Bimodules for composition algebras. By K. MCCRIMMON	480
Character kernels of discrete groups. By D. S. PASSMAN	487
On the Diophantine equation $x^3 + y^3 + z^5 = x + y + z$. By A. OPPENHEIM	493
A new proof of a theorem of Kummer. By W. J. LEAHEY	497
Discrete complemented algebra. By P. P. SAWOROTNOW	499
On primes of the form $u^2 + 5v^2$. By B. W. BREWER	502
An inequality for the elementary symmetric functions of characteristic roots.	
By Marvin Marcus and Henryk Minc	510
The multiplicators of certain simple groups. By J. L. ALPERIN and DANIEL	
Gorenstein	515
Primitive idempotents in group algebras. By G. J. JANUSZ	520
Extensions of completely 0-simple semigroups by completely 0-simple semi-	
groups. By R. J. WARNE.	524
Small modules. By W. W. LEONARD	527
An addition to Ado's theorem. By G. HOCHSCHILD	531
An elementary number theoretical remark. By E. HARZHEIM	534
A short proof of an inequality for the permanent function. By P. M. GIBSON.	535

SHORTER NOTES

On a theorem of Motzkin concerning power series with periodic gaps. By	
BASIL GORDON	537
On the series of prime reciprocals. By J. A. CLARKSON	541
Errata to The stability of smoothing by least squares. By H. S. WILF	542

CONTENTS

Vol. 17, No. 2

APRIL, 1966

Whole No. 98

On the internal moduli of continuity in $T_{1}(1 < t < x)$ of Equation series with	rage
On the integral moduli of continuity in L_p ($1) of Fourier series with$	207
Existence of local cross-sections in linear Cartan <i>G</i> -spaces under the action of	287
noncompact groups. By R. A. WIISMAN.	295
The univalence of functions asymptotic to nonconstant logarithmic mo-	
nomials. By E. W. CHAMBERLAIN	302
A class of entire functions with bowl-like surfaces. By MINAKETAN DAS	310
Approximate functional approximations and the Riemann hypothesis. By	
ROBERT SPIRA	314
A note on splitting in solvable groups. By E. E. SHULT	318
On a theorem of Brauer, By T. A. BURTON	325
Linear differential equations with periodic coefficients By T. A. BURTON	32.7
A Bessel function inequality connected with stability of least square	021
smoothing. By LEE LORCH and PETER SZEGO.	330
On the zeros of solutions of ordinary differential equations of the second	
order. By A. S. Galbraith	333
Small eigenvalues of large Hankel matrices. By HAROLD WIDOM and HER-	
BERT WILF.	338
Linear methods which sum sequences of bounded variation. By D.F. DAWSON	345
On the radius of univalence of certain analytic functions. By O. S. KOTHAUS	549
STON	352
On the convexity of the level curves of a polynomial. By A. W. GOODMAN	358
Finite interpolation for analytic functions with finite Dirichlet integrals. By	
Mitsuru Nakai.	362
Existence of positive harmonic functions. By MITSURU NAKAI	365
The lack of self-adjointness in three point boundary value problems. By ANTON	
ZETTL	368
Ergodic properties of automorphisms of a locally compact group. By M.	277
A note on invariant integrals on locally compact comigroups, By L. N. ApcA	312
REAL BRICHT	377
On functions that commute with full functions. By J. H. FOLKMAN	383
Existence of invariant measures for Markov processes. II. By S. R. FOGUEL	387
Notation systems and an effective fixed point property. By W. E. RITTER	390
A generalized Banach-Stone theorem. By MICHAEL CAMBERN	396
Closure properties of $C(X)$ in its second dual. By SAMUEL KAPLAN	401
On weakly compact subsets of Banach spaces. By H. H. CORSON and	107
J. LINDENSTRAUSS	407
on majorization, factorization, and range inclusion of operators on Hilbert	412
Approximate Stolz angle limits By L F SNYDER	416
Normed linear spaces equivalent to inner product spaces, By L. T. LOICHI	423
Retraceable sets and recursive permutations. By T. G. McLAUGHLIN	427
