

PROCEEDINGS
OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY

ELDON DYER

R. C. BUCK

M. M. HEINS

FRITZ JOHN

A. P. MATTUCK

IRVING REINER

WITH THE COÖPERATION OF

D. A. BUCHSBAUM

D. J. LEWIS

S. M. SHAH

JOSHUA CHOVER

WILHELM MAGNUS

H. S. SHAPIRO

W. H. J. FUCHS

MELVIN ROTHENBERG

J. A. WOLF

VOLUME 17, NUMBER 5
OCTOBER, 1966

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1966.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02193 or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois 61801; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or FRITZ JOHN, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012; in geometry and topology to ELDON DYER, Graduate Studies Division, The City University of New York, New York, New York 10036; in other branches of analysis, applied mathematics, and all other fields to M. M. HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois 61801 or FRITZ JOHN. All other communications to the editors should be addressed to the Managing Editor, R. C. BUCK. Inquiries from authors regarding reprints and changes of addresses for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six numbers is planned for 1966. The subscription price is \$12.00. Vols. 1-16 (1950-1965) are available at the price of \$14.00 each. Volume 1 was published in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

All inquiries for Volumes 1-69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10012. Orders for Volumes 70-124 should be directed to the American Mathematical Society.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904. Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

Contents—Continued from back cover

On the multiplication of tensor fields. By W. GREUB and E. STAMM . . .	1112
Invariance of the homology of a lattice. By JOHN MATHER	1120
On stable vector bundles over real projective spaces. By DAVID HANDEL	1125
On the homogeneity of infinite products of manifolds. By T. GANEA	1128
Note on a Whitehead product. By G. V. KRISHNARAO	1131
A class of naturally partly ordered commutative archimedean semi- groups with maximal condition. By E. J. TULLY, JR.	1133
On symmetric matrices whose eigenvalues satisfy linear inequalities. By FRITZ JOHN	1140
On the existence and uniqueness of the real logarithm of a matrix. By W. J. CULVER	1146
Some quartic diophantine equations of genus 3. By L. J. MORDELL . . .	1152
A representation of the wreath product of two torsion-free abelian groups in a power series ring. By GILBERT BAUMSLAG	1159
Generalized Frobenius complements. By BETTY LOU and D. S. PASSMAN	1166
Finite power-associative division rings. By KEVIN MCCRIMMON	1173
A solution to the nonvanishing semicharacter extension problem. By PAUL HILL	1178
Two theorems on Galois cohomology. By MICHAEL ROSEN	1183
Some analogues of Glauberman's Z^* -theorem. By ERNEST SHULT . . .	1186
Cyclic extensions without relative integral bases. By L. R. MCCULLOH	1191
Note on normal subgroups of the modular group. By L. GREENBERG	1195
A note on derivations of commutative algebras. By T. ANDERSON . .	1199
On extensions of Cayley algebras. By M. M. HUMM and ERWIN KLEINFELD	1203
A condition for a finite group to be nilpotent. By STEPHEN MONTAGUE and GOMER THOMAS	1205
Equivalence of tamely ramified v -rings. NICKOLAS HEEREMA	1207
On the asymptotic density of the k -free integers. By H. M. STARK . .	1211
A note on the Riemann zeta function. By RAYMOND AYOUB	1215

SHORTER NOTES

A note on Sard's theorem in Banach spaces. By ROBERT BONIC . . .	1218

CONTENTS

Vol. 17, No. 5

OCTOBER, 1966

Whole No. 101

	Page
Hyperbolic generators for Fuchsian groups, By R. J. SIBNER.....	963
On an application of slowly oscillating functions. By MANOJLO MARAVIĆ	969
Translation-invariant Dirichlet algebras on compact groups. By DANIEL RIDER.....	977
Degree of approximation by polynomials to functions of bounded variation. By H. S. AL-AMIRI.....	984
Multiplication theorems on strongly summable series. By B. P. MISHRA	992
On hyponormal operators. By I. H. SHETH.....	998
On high indices theorems. By J. S. RATTI.....	1001
On uniform approximation by rational functions. By L. A. STEEN ..	1007
The local finite-area principle in the half-plane. By DANIEL WATERMAN	1012
Coefficient estimates for starlike functions of order α . By A. V. BOYD	1016
Linear mappings of operator algebras. By B. RUSSO.....	1019
On second order differential inequalities. By LLOYD JACKSON and KEITH SCHRADER.....	1023
A note on extremal problems for certain classes of analytic functions. By W. E. KIRWAN.....	1028
Equality of minimal and maximal extensions of partial differential operators in $L_p(R^n)$. By R. A. GOLDSTEIN.....	1031
A generalization of the Lax Equivalence Theorem. By M. H. SCHULTZ	1034
Stability of solutions of some classes of nonlinear operator equations. By R. H. KASRIEL and M. Z. NASHED.....	1036
Bounded regular sets. By SEYMOUR GINSBURG and E. H. SPANIER....	1043
A theorem on recursively enumerable classes and splinters. By P. R. YOUNG.....	1050
Dual generalized bases in linear topological spaces. By W. J. DAVIS	1057
A new general series of balanced incomplete block designs. By C. RAMANUJACHARYULU.....	1064
The cut elimination theorem in the unary second order language. By MITSURU YASUHARA.....	1069
On function spaces of stratifiable spaces and compact spaces. By C. J. R. BORGES.....	1074
A note on Haar-like measure for group-extremal semigroups. By MICHAEL FRIEDBERG.....	1079
Remarks on the bordism algebra of involutions. By C. S. HOO.....	1083
A note on parts and hyperbolic geometry. By JOSEPH LEWITTES....	1087
Open manifolds with monotone union property. By K. W. KWUN....	1091
A direct proof of Porcelli's condition for weak convergence. By R. B. DARST.....	1094
Semicharacters on subsemigroups of an abelian topological group. By ROBERT KAUFMAN.....	1097
Golab's theorem. By C. M. FULTON.....	1099
On a recent theorem by H. Reiter. By I. NAMIOKA.....	1101
Surfaces of constant mean curvature. By J. A. WOLF.....	1103
