PROCEEDINGS

OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITED BY

R. C. BUCK
ELDON DYER
M. M. HEINS
FRITZ JOHN
A. P. MATTUCK
IRVING REINER

WITH THE COÖPERATION OF

D. A. BUCHSBAUM
D. J. LEWIS
S. M. SHAH
JOSHUA CHOVER
WILHELM MAGNUS
H. S. SHAPIRO
W. H. J. FUCHS
MELVIN ROTHENBERG
J. A. WOLF

VOLUME 17, NUMBER 6
DECEMBER, 1966

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1966.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02193 or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois 61801; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or FRITZ JOHN, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012; in geometry and topology to ELDON DYER, Graduate Studies Division, The City University of New York, New York, New York 10036; in other branches of analysis, applied mathematics, and all other fields to M. M. HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois or FRITZ JOHN. All other communications to the editors should be addressed to the Managing Editor, R. C. BUCK. Inquiries from authors regarding reprints and changes of addresses for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six numbers is planned for 1966. The subscription price is $12.00. Vols. 1–17 (1950–1966) are available at the price of $14.00 each. Volume 1 was published in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

All inquiries for Volumes 1–69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10012. Orders for Volumes 70–125 should be directed to the American Mathematical Society.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is $12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P.O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

INDEX TO VOLUME 17

*Starred items are "Shorter Notes"

Adams, J. F., Lax, P. D. and Phillips, R. S. *"On matrices whose real linear combinations are nonsingular"; Correction to*, 945.

Al-Amiri, H. S. *Degree of approximation by polynomials to functions of bounded variation*, 984.

Alford, W. R. *Uncountably many different involutions of* S^3, 186.

Aljančić, S. *On the integral moduli of continuity in* $L_p(1<p<\infty)$ *of Fourier series with monotone coefficients*, 287.

Allsbrook, J. S. *A metrization theorem*, 878.

Alperin, J. L. and Gorenstein, Daniel. *The multiplicators of certain simple groups*, 515.

Al-Salam, W. A. *q-analogues of Cauchy's formulas*, 616.

Anderson, T. *A note on derivations of commutative algebras*, 1199.

Anderson, R. D. *On a theorem of Klee*, 1401.

Argabright, L. N. *A note on invariant integrals on locally compact semigroups*, 377.

Arsove, M. G. *On subharmonicity of doubly subharmonic functions*, 622.

Atsumi, Koichi. *On complete lattices having the Hausdorff interval topology*, 197.

Austin, A. K. *Finite models for laws in two variables*, 1410.

Ayoub, Raymond. *A note on the Riemann zeta function*, 1215.

Aziz, A. K. *Periodic solutions of hyperbolic partial differential equations*, 557.

———. Errata to *Periodic solutions of hyperbolic partial differential equations*, 1474.

Bagley, R. W. and Yang, J. S. *On k-spaces and function spaces*, 703.

Baker, I. N. *On a class of meromorphic functions*, 819.

Barnes, R. T. *On splitting fields for certain Lie algebras of prime characteristic*, 930.

Barrucand, Pierre and Dickinson, David. *On cubic transformations of orthogonal polynomials*, 810.

Baumann, Volker. *The boundary of the range of vector measure*, 865.

Baumslag, Gilbert. *A representation of the wreath product of two torsion-free abelian groups in a power series ring*, 1159.

Bechtell, Homer. *A note on finite solvable K-groups*, 1447.

Bellman, Richard. *A note on the identification of linear systems*, 68.

Bennett, Ralph. *Locally connected 2-cell and 2-sphere-like continua*, 674.

Benson, C. T. *A partial geometry* $(q^3+1, q^2+1, 1)$ *and corresponding* PBIB *design*, 747.

Biesterfeldt, H. J., Jr. See Pervin, W. J.

Blefko, R. and Mrówka, S. *On the extensions of continuous functions from dense subspaces*, 1396.

Blum, J. R. and Friedman, N. *On commuting transformations and roots*, 1370.

Boehme, T. K. *Convergence of positive functions in the space on Mikusiński operators*, 12.

*Bonic, Robert. *A note on Sard's theorem in Banach spaces*, 1218.

Borges, C. J. R. *On function spaces of stratifiable spaces and compact spaces*, 1074.

Boyd, A. C. *Coefficient estimates for starlike functions of order* α, 1016.

Brewer, B. W. *On primes of the form* u^2+5v^2, 502.

Brown, Arlen and Pearcy, Carl. *Spectra of tensor products of operators*, 162.

Brown, D. T. *A class of Banach algebras with a unique norm topology*, 1429.

Brown, Leon and Nakano, Hidegoro. *A representation theorem for Archimedean linear lattices*, 835.

Brualdi, R. A. *On the permanent and maximal characteristic root of a nonnegative matrix*, 1413.

Burdick, R. O. *Oriented manifolds fibered over the circle*, 449.
Burton, T. A. *Linear differential equations with periodic coefficients*, 327.
———. *On a theorem of Brauer*, 325.
Calder, J. R. *A property of l_p spaces*, 202.
Cambern, Michael. *A generalized Banach-Stone theorem*, 396.
*Carlitz, L. *A short proof of Jacobi's four square theorem*, 768.
Carlson, B. C. *Some inequalities for hypergeometric functions*, 32.
Chamberlain, E. W. *The univalence of functions asymptotic to nonconstant logarithmic monomials*, 302.
Chao, C.-Y. *A note on two set-transitive permutation groups*, 953.
Chaudhuri, Jyoti. *On the generalisation of a formula of Rainville*, 552.
Chiang, P.-S. and Macintyre, A. J. *Upper bounds for a Bloch constant*, 26.
Chover, Joshua. *A law of the iterated logarithm for stable summands*, 441.
Clark, D. N. *A note on the p-adic convergence of solutions of linear differential equations*, 262.
*Clarkson, J. A. *On the series of prime reciprocals*, 541.
Clifford, A. H. *Partially ordered groups of the second and third kinds*, 219.
Clingman, W. H. *Permanently optimal strategies in extensive games*, 156.
Cohn, R. M. *An existence theorem for difference polynomials*, 254.
Coleman, Courtney. Addendum to *Local trajectory equivalence of differential equations*, 770.
*Coleman, D. B. *Idempotents in group rings*, 962.
Colwell, Peter. *On the boundary behavior of functions meromorphic in the unit disk*, 822.
———. *On the boundary of the Blaschke products in the unit disk*, 582.
Comfort, W. W. and Hill, Paul. *On extending nonvanishing semicharacters*, 936.
*Connell, I. G. *Abelian formal groups*, 958.
Conway, J. B. *Projections and retractions*, 843.
Corson, H. H. and Lindenstrauss, J. *On weakly compact subsets of Banach spaces*, 407.
Crabtree, D. E. *Characteristic roots of M-matrices*, 1435.
Culver, W. J. *On the existence and uniqueness of the real logarithm of a matrix*, 1146.
Darst, R. B. *A direct proof of Porcelli's condition for weak convergence*, 1094.
Das, Minaketan. *A class of entire functions with bowl-like surfaces*, 310.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION

(Act of October 23, 1962; Section 4369, Title 39, United States Code)

1. *Date of filing:* September 23, 1966
2. *Title of Publication:* Proceedings of the American Mathematical Society
3. *Frequency of issue:* Six issues per year
4. *Location of known office of publication:* P. O. Box 6248, Providence, R. I. 02904
5. *Location of the headquarters or general business offices of the publishers:* P. O. Box 6248, Providence, R. I. 02904
6. *Names and addresses of publisher, editor and managing editor. Publisher:* American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904. *Editor:* R. C. Buck, Chairman of the Editorial Committee, P. O. Box 6248, Providence, R. I. 02904. *Managing editor:* None
7. *Owner:* None
8. *Known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities:* None
9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 percent or more of the total amount of the stock or securities of the publishing corporation.

I certify that the statements made by me above are correct and complete.—Gordon L. Walker

Contents—*Continued from back cover*

On commuting transformations and roots. By J. R. Blum and N. Friedman 1370
A note on the extension of associative products. By J. F. Rennison ... 1375
Preservation of pseudo-metrizability by quotient maps. By C. J. Himmelberg 1378
Quotient uniformities. By C. J. Himmelberg 1385
A property of nonseparated convex sets. By Hubert Halkin 1389
On the extensions of continuous functions from dense subspaces. By R. Blefko and S. Mrówka 1396
On a theorem of Klee. By R. D. Anderson 1401
A selection theorem. By E. Michael 1404
Artinian and noetherian hypercentral groups. By Hermann Simon . 1407
Finite models for laws in two variables. By A. K. Austin 1410
On the permanent and maximal characteristic root of a nonnegative matrix. By R. A. Brualdi 1413
A generalization of a commutator theorem of Mikusinski. By E. C. Paige 1417
Homology and presentations of algebras. By J. Knopfmacher 1424
A class of Banach algebras with a unique norm topology. By D. T. Brown 1429
Characteristic roots of M-matrices. By D. E. Crabtree 1435
Solvable groups admitting a fixed-point-free automorphism of prime power order. By Fletcher Gross 1440
A note on finite solvable K-groups. By Homer Bechtell 1447
A note on IC-p groups. By I. M. Isaacs 1451
A note on quasi-associative algebras. By Kevin McCrimmon 1455
A theorem on the cohomology ring of nilpotent groups. By T.-n. Kuo 1460

SHORTER NOTES

The nonvanishing of the Bernoulli polynomials in the critical strip. By Robert Spira 1466
Directed unions and chains. By J. R. Isbell 1467
Sums of countable primary groups. By Paul Hill 1469
Commutative, noetherian rings over which every module has a maximal submodule. By R. M. Hamsher 1471
Errata to Volume 17 1473
Index to Volume 17 1474

GEORGE BANTA COMPANY, INC., MENASHA, WISCONSIN

CONTENTS

Vol. 17, No. 6 DECEMBER, 1966 Whole No. 102

Page

Almost summable sequences. By J. P. KING 1219
A note on trigonometric matrices. By G. J. ETGEN 1226
A certain class of incidence matrices. By D. H. GOTTLIEB 1233
Polynomial approximation of functions analytic in a disk. By J. T. SCHEICK 1238
Some remarks about a theorem of Hartogs. By H. B. LAUFER .. 1244
An inequality for certain schlicht functions. By ARTHUR OBROCK ... 1250
A note on branch points of minimal surfaces. By ROLF SCHNEIDER 1254
On the location of singularities at the boundary of the domain of overconvergence. By G. A. READ 1258
On an example in second order linear ordinary differential equations. By D. WILLETT 1263
Spectral decomposition of quasi-Montel spaces. By BERTRAM WALSH 1267
Holomorphic approximation on real-analytic submanifolds of a complex manifold. By R. O. WELLS, JR. 1272
The shape of level curves. By GEORGE PIRANIAN 1276
On the boundedness of solutions of second order nonlinear differential systems. By JOHN JONES, JR. 1280
Order isomorphisms of cones. By O. S. ROTHAUS 1284
Circumscribing cubes of a hyperellipsoid. By D. H. TAYLOR 1289
On the coincidence of three invariant σ-algebras associated with an affine transformation. By WILLIAM PARRY 1297
The homogeneous Hilbert boundary problem in a Banach algebra. I. By DRAGIŠA MITROVIĆ 1303
On regular functions for certain Markov processes. By RICHARD ISAAC 1308
Maximal semicharacters. By ROBERT KAUFMAN 1314
Semigroups and de Leeuw's convexity theorem. By ROBERT KAUFMAN 1317
The maximal ideal space of functions locally approximable in a function algebra. By C. E. RICKART 1320
The integral of an invariant unimodal function over an invariant convex set—an inequality and applications. By G. S. MUDHOLKAR 1327
A note on compound simple games. By T. PARTHASARATHY 1334
A characterization of unions of two star-shaped sets. By C. F. KOCH and J. M. MARR 1341
Quasi-orderings and topologies on finite sets. By HENRY SHARP, JR. 1344
A characterization of the differentiable submanifolds of R^n. By S. B. NADLER, JR. 1350
Orlicz spaces isomorphic to strictly convex spaces. By K. SUNDARESAN 1353
Maximal ideal spaces and A-convexity. By D. R. WILKEN 1357
On extremal measures and subspace density. II. By R. G. DOUGLAS 1363
Extreme points of bounded analytic functions on infinitely connected regions. By MICHAEL VOICHICK 1366
