APRIL, 1967

## Journals Published by the

## American Mathematical Society

## Proceedings of the American Mathematical Society

The Proceedings of the American Mathematical Society is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The maximum length of an acceptable paper is about 8 printed pages. (Since a page of the Proceedings contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.) The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. The authors should keep a complete copy of the manuscript, and should take the greatest possible care in preparing the original manuscript; hand drawn mathematical symbols are entirely satisfactory, if clearly done.

Very short notes (not to exceed 1 printed page) of an unusual nature are also accepted, and appear under the heading Shorter Notes. (Items deemed suitable include an elegant new proof of an important and well known theorem, an illuminating example or counterexample, or a striking synthesis of familiar results.)

Papers in algebra and number theory should be sent to Arthur Mattuck, Room 2-275, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139, or to Irving Reiner, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

Papers in modern or classical analysis should be sent to R. C. Buck, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706, or to Maurice Herns, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

Papers in geometry or topology should be sent to Eldon Dyer, Graduate Studies Division, City University of New York, 33 West 42nd Street, New York, New York 10036.

Papers in applied mathematics, differential equations, and related areas of analysis should be sent to Wolfgang Wasow, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in probability, statistics, and related fields should be sent to Joshua Chover, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in logic, set theory, and related areas should be sent to W. W. Boone, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

All other communications should be addressed to the Managing Editor, M. H. Heins, at the above address.

Inquiries from authors regarding reprints, or changes of addresses for mailing proofs, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six issues is planned for 1967. The subscription price is $\$ 12.00$. Back issues (Vols. 1-17, 1950-1966) are available at the price of $\$ 14.00$ each.

The American Mathematical Society also publishes the Bulletin and the Transactions of the Society. Both accept research papers; for details, and the list of editors, please consult a recent issue. A complete list of the publications of the American Mathematical Society is available from the Editorial Office.

## Contents-Continued from back cover

Locally flat strings and half-strings. By C. Lacher ..... 299
Extremally disconnected spaces. By D. P. Strauss ..... 305
Two theorems of Krasnosel'skiĭ. By F. A. Valentine. ..... 310
On a problem of C. E. Shannon in graph theory. By M. Rosenfeld. ..... 315
Covering the track of an isotopy. By C. P. Rourke ..... 320
On real projective spaces as Finsler manifolds. By Nathaniel Gross- man ..... 325
Two applications of the technique of length-decreasing variations. By Nathaniel Grossman. ..... 327
A note on Galois theory of commutative rings. By Takasi Nagaiara ..... 334
Finite $p$-solvable linear groups with a cyclic Sylow $p$-subgroup. By D. L. Winter ..... 341
On $p$-mixed Abelian groups. By J. A. Oppelt ..... 344
Maximal fields disjoint from certain sets. By P. J. McCarthy ..... 347
Finite sums of irreducible functionals on $C^{*}$-algebras. By Herbert Halpern. ..... 352
On convex ideals. By C. W. Korts. ..... 359
Lattice points in regions. By Ivan Niven and H. S. Zuckerman ..... 364
Algebraic group automorphisms having finite fixed point sets. By D. J. Winter ..... 371
A generalized approximation theorem for Dedekind domains. By Luther Claborn ..... 378
Shorter Notes
A nonuniqueness result for an Euler-Poisson-Darboux (EPD) problem. By B. A. Fusaro. ..... 381
Local flatness of combinatorial manifolds in codimension one. By W. A. LaBach ..... 382

## CONTENTS

Vol. 18, No. 2 APRIL, 1967 Whole No. 104
Page
On the stability of midpoint smoothing with Legendre polynomials. By W. F. Trench ..... 191
Bounds on the generating functions of certain smoothing operations. By W. F. Trench ..... 200
On the asymptotic behavior of solutions of the wave equations. By A. R. Brodsky ..... 207
A density theorem for Walsh functions. By J. J. Price ..... 209
Remarks on a quadratic form of Duren and Schiffer. By Neal Fried- MAN. ..... 212
Spaces between a pair of reflexive Lebesgue spaces. By D. W. Boyd ..... 215
Bounds for solutions of 2nd order complex differential equations. By K. M. Das ..... 220
Invariant means and factor-semigroups. By C. O. Wilde and LOREN Argabrigit ..... 226
Continuity of some convex-cone-valued mappings. By D. W. Walkup and R. J.-B. Wets ..... 229
One can hear whether a drum has finite area. By Colin Clark and Denton Hewgill ..... 236
Stokes multipliers of subdominant solutions of the differential equation $y^{\prime \prime}-\left(x^{3}+\lambda\right) y=0$. By Yasutaka Sibuya ..... 238
Correction to "Periodic solutions of fourth-order differential equa- tions." By G. R. Sell ..... 243
Reduction of a matrix with positive elements to a doubly stochastic matrix. By M. V. Menon ..... 244
Measures on $C(Y)$ when $Y$ is a compact metric space. By James Kuelbs ..... 248
A remark on regular Banach algebras. By John Rainwater ..... 255
Linear difference operators on periodic functions. By Otto Plaat ..... 257
A note on pushdown store automata and regular systems. By S. A. Greibach. ..... 263
Conformal equivalence of countable dense sets. By W. D. Maurer ..... 269
The essential set of function algebras. By R. E. Mullins ..... 271
Interpolation on finite open Riemann surfaces. By E. L. Stout ..... 274
No recursively enumerable set is the union of finitely many immune retraceable sets. By K. I. Appel ..... 279
A minimal compactification for extending continuous functions. By P. A. Loeb ..... 282
A chainable continuum not homeomorphic to an inverse limit on $[0,1]$ with only one bonding map. By W. S. Mahavier ..... 284
A converse Banach's contraction theorem. By Ludvir Janos ..... 287
Topological transformation groups with a fixed end point. By W. J. Gray ..... 290
Another $S$-admissible class of spaces. By K. D. Magill, Jr. ..... 295

[^0]:    The Proceedings of the American Mathematical Society is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is $\$ \mathbf{1 2 . 0 0}$. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Soclety, P. O. Box 6248, Providence, R. I. 02904.

    Second-class postage pald at Providence, Rhode Island and additional malling offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. \& R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. \& R.
