

PROCEEDINGS
OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY

ELDON DYER

IRVING GLICKSBERG

M. H. HEINS

A. P. MATTUCK

IRVING REINER

W. R. WASOW

WITH THE COÖPERATION OF

W. W. BOONE

D. A. BUCHSBAUM

JOSHUA CHOVER

W. H. J. FUCHS

MELVIN ROTHENBERG

S. M. SHAH

H. S. SHAPIRO

HANS WEINBERGER

J. A. WOLF

VOLUME 18, NUMBER 4
AUGUST, 1967

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the
American Mathematical Society

Proceedings of the American Mathematical Society

The PROCEEDINGS of the American Mathematical Society is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The maximum length of an acceptable paper is about 8 printed pages. (Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.) The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. The authors should keep a complete copy of the manuscript, and should take the greatest possible care in preparing the original manuscript; hand drawn mathematical symbols are entirely satisfactory, if clearly done.

Very short notes (not to exceed 1 printed page) of an unusual nature are also accepted, and appear under the heading SHORTER NOTES. (Items deemed suitable include an elegant new proof of an important and well known theorem, an illuminating example or counterexample, or a striking synthesis of familiar results.)

Papers in algebra and number theory should be sent to ARTHUR MATTUCK, Room 2-275, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139, or to IRVING REINER, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

Papers in modern or classical analysis should be sent to IRVING GLICKSBERG, Mathematics Department, University of Washington, Seattle, Washington 98105, or to MAURICE HEINS, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

Papers in geometry or topology should be sent to ELDON DYER, Graduate Studies Division, City University of New York, 33 West 42nd Street, New York, New York 10036.

Papers in applied mathematics, differential equations, and related areas of analysis should be sent to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in probability, statistics, and related fields should be sent to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in logic, set theory, and related areas should be sent to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

All other communications should be addressed to the Managing Editor, M. H. HEINS, at the above address.

Inquiries from authors regarding reprints, or changes of addresses for mailing proofs, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six issues is planned for 1967. The subscription price is \$12.00. Back issues (Vols. 1-17, 1950-1966) are available at the price of \$14.00 each.

The American Mathematical Society also publishes the following journals which accept research papers: BULLETIN, TRANSACTIONS and MATHEMATICS OF COMPUTATION. For details and the list of editors, please consult a recent issue. Reviews of the current mathematical literature of the world are published in MATHEMATICAL REVIEWS; editorial correspondence for this journal should be sent to: The University of Michigan, 416 Fourth Street, Ann Arbor, Michigan 48103.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

Contents—Continued from back cover

An example in dimension theory. By R. D. ANDERSON and J. E. KEISLER.....	709
Immersions into manifolds of constant negative curvature. By E. F. STIEL.....	713
Homomorphic retractions in semigroups. By J. T. BORREGO.....	716
An example of two uniformities equal in height and proximity. By J. L. HURSCH, Jr.....	719
The mod 2 homology of the image of an exactly 2 to 1 map from a sphere. By G. W. HENDERSON.....	723
von Neumann regularity in Jordan algebras. By C. E. TSAI.....	727
On the spectra of classes of algebras. By G. GRÄTZER.....	729
On p -abelian groups. By P. M. WEICHSEL.....	736
Purely indecomposable torsion-free groups. By PHILLIP GRIFFITH....	738
A theorem on multiplicative arithmetic functions. By HUBERT DELANGE.....	743
Some properties of integral closure. By W. J. HEINZER.....	749
A note on certain generalized free products. By R. J. GREGORAC.....	754
A note on finitely generated groups. By R. J. GREGORAC.....	756

SHORTER NOTES

The Morse index theorem. By HOWARD OSBORN.....	759
Convolution of L^p functions. By N. W. RICKERT.....	762
On Okamura's uniqueness theorem. By J. H. GEORGE.....	764
Fourier coefficients of functions of bounded variation. By MITCHELL TABLESON.....	766

CONTENTS

Vol. 18, No. 4

AUGUST, 1967

Whole No. 106

	Page
On the measure of well-distributed sequences. By ALAN ZAME	575
Differential systems on fibered manifolds. By A. M. RODRIGUES	580
Representation and computation of the pseudoinverse. By D. SHOW- ALTER	584
Semigroups satisfying a strong Følner condition. By L. N. ARGABRIGHT and C. O. WILDE	587
Singularity-free regions for solutions of systems of nonlinear complex differential equations. By D. V. V. WEND	592
Asymptotic almost periodicity of solutions of a system of differential equations. By W. R. UTZ and PAUL WALTMAN	597
Comparison and application of two Green's matrices. By A. L. DEAL, III	602
The asymptotic behavior of a class of nonlinear differential equations. By D. S. COHEN	607
A transformation theorem on spectral measures. By HABIB SALEHI	610
The moments of recurrence time. By J. WOLFOWITZ	613
Schwartz distributions analytic in a parameter and associated semi- analytic functions. By C. A. LONG	615
Schauder decompositions in (m) . By D. W. DEAN	619
A uniform boundedness theorem. By J. W. BRACE and R. M. NIELSEN	624
On the Lebesgue decomposition theorem. By R. A. JOHNSON	628
Infinite subclasses of recursively enumerable classes. By J. B. FLORENCE	633
The strong maximum modulus theorem for analytic functions into a Banach space. By EDWARD THORP and ROBERT WHITLEY	640
Representability of partial recursive functions in formal theories. By W. E. RITTER	647
Some linear topological properties of separable function algebras. By A. PEŁCZYŃSKI	652
On the relationship between zero entropy and quasi-discrete spectrum for affine transformations. By PETER WALTERS	661
On the problem of evanescent processes. By Z. DITZIAN and M. NADKARNI	668
On similar bases in barrelled spaces. By O. T. JONES and J. R. RETHER- FORD	677
The homogeneous Hilbert boundary problem in a Banach algebra. II. By DRAGIŠA MITROVIĆ	680
Homotopy periodicity of the classical Lie groups. By A. T. LUNDELL	683
Absolute Baire sets. By STELIOS NEGREPONTIS	691
Adjunction spaces and the hereditary property. By B. H. McCANDLESS	695
Extending triangulations. By M. A. ARMSTRONG	701
Homotopy type comparison of a space with complexes associated with its open covers. By M. C. McCORD	705
