

PROCEEDINGS
OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY

W. H. J. FUCHS	E. A. MICHAEL
IRVING GLICKSBERG	IRVING REINER
ARTHUR MATTUCK	EMERY THOMAS
W. R. WASOW	

WITH THE COÖPERATION OF

W. W. BOONE	S. M. SHAH	HANS WEINBERGER
JOSHUA CHOVER	H. S. SHAPIRO	J. A. WOLF

VOLUME 19, NUMBER 4
AUGUST, 1968

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the
American Mathematical Society

Proceedings of the American Mathematical Society

The PROCEEDINGS of the American Mathematical Society is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The maximum length of an acceptable paper is about 8 printed pages. (Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.) The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary.

Very short notes (not to exceed 1 printed page) of an unusual nature are also accepted, and appear under the heading SHORTER NOTES. (Items deemed suitable include an elegant new proof of an important and well known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.)

Papers in algebra and number theory should be sent to ARTHUR MATTUCK, Room 2-275, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139, or to IRVING REINER, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

Papers in modern or classical analysis should be sent to IRVING GLICKSBERG, Mathematics Department, University of Washington, Seattle, Washington 98105, or to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850.

Papers in algebraic geometry should be sent to ARTHUR MATTUCK; papers in set-theoretic and general topology to ERNEST MICHAEL, Mathematics Department, University of Washington, Seattle, Washington 98105; in algebraic topology and all other types of geometry to P. EMERY THOMAS, Mathematics Department, University of California, Berkeley, California 94720.

Papers in applied mathematics, differential equations, and related areas of analysis should be sent to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in probability, statistics, and related fields should be sent to JOSHUA CROVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in logic, set theory, and related areas should be sent to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

All other communications should be addressed to the Managing Editor, ARTHUR MATTUCK, at the above address.

Inquiries from authors regarding reprints, or changes of addresses for mailing proofs, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six issues is planned for 1968. The subscription price is \$12.00. Back issues (Vols. 1-18, 1950-1967) are available at the price of \$14.00 each.

The American Mathematical Society also publishes the following journals which accept research papers: BULLETIN, TRANSACTIONS and MATHEMATICS OF COMPUTATION. For details and the list of editors, please consult a recent issue. Reviews of the current mathematical literature of the world are published in MATHEMATICAL REVIEWS; editorial correspondence for this journal should be sent to: 416 Fourth Street, Ann Arbor, Michigan 48103.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph D, P. L. & R.

Contents—Continued from back cover

Remarks on decompositions of categories. By J. R. ISBELL.....	899
On lifting transformation groups. By F. RHODES.....	905
A note on a theorem of Ganea, Hilton and Peterson. By C. S. HOO.....	909
One-variable equations in free groups. By K. I. APPEL.....	912
On the flatness of complete formally projective modules. By SATOSHI SUZUKI.....	919
A counterexample to a theorem of Chase. By PHILLIP GRIFFITH....	923
On a conjecture of D. C. Murdoch concerning primary decompositions of an ideal. By K. L. CHEW.....	925
A note on finite groups in which normality is transitive. By D. J. S. ROBINSON.....	933
The asymptotic behavior of a decomposition due to Harzheim. By T. S. PITCHER.....	938
On the subring generated by the symmetric elements. By W. E. BAXTER.....	943
Indices of maximal subgroups of infinite symmetric groups. By R. W. BALL.....	948
A note on weak Bezout rings. By R. E. WILLIAMS.....	951
Criteria for inner product spaces. By R. W. FREESE.....	953
A theorem of nilpotent groups. By CHONG-YUN CHAO.....	959
Regular elements in semiprime rings. By R. E. JOHNSON and L. S. LEVY.....	961
A note on reduced Jordan algebras. By KEVIN MCCRIMMON.....	964
An inequality between the permanent and the determinant. By P. M. GIBSON.....	971
On generating heavy points with positive matrices. By A. K. SNYDER.....	973
Isomorphisms of Pickert-Moulton planes. By W. A. PIERCE.....	976
A solution of Hadamard's problem for a restricted class of operators. By J. E. LAGNESE.....	981
A strong comparison theorem for selfadjoint elliptic equations. By KURT KREITH.....	989
Some results for Borel transforms. By J. P. KING.....	991
The approximate solution of certain nonlinear differential equations. By R. G. HUFFSTUTLER and F. M. STEIN.....	998

SHORTER NOTES

Redei's finiteness theorem for commutative semigroups. By PETER FREYD.....	1003
A note on my paper "On symmetric matrices whose eigenvalues satisfy linear inequalities". By FRITZ JOHN.....	1004
On the existence theorem for differential equations. By J. W. ROBBIN.....	1005

CONTENTS

Vol. 19, No. 4

AUGUST, 1968

Whole No. 112

	Page
Domains of variability for univalent polynomials. By V. F. COWLING and W. C. ROYSTER.....	767
Properties of certain spaces of entire functions. By MINAKETAN DAS..	773
A generalization of the Mikusinski operational calculus. By J. A. WOOD.....	777
A decomposition relative to convex sets. By M. Z. NASHED.....	782
Covering theorems and the axiom of choice. By A. I. FINE.....	787
Bernstein's theorem for Banach spaces. By ROBERT WELLAND.....	789
Note on a theorem of Beurling. By M. L. WEISS.....	793
Blaschke quotients and normality. By J. A. CIMA and PETER COLWELL	796
On the entropy of isometries of compact metric spaces. By J. W. ENGLAND and N. F. G. MARTIN.....	799
Completion of normed linear spaces. By KUNG-WEI YANG.....	801
On the identity in a measure algebra. By L. J. LARDY.....	807
On the roots of spectral operators. By CONSTANTIN APOSTOL.....	811
Recursive functions of one variable. By JULIA ROBINSON.....	815
A topological approach to extreme points in function spaces. By JOHN CANTWELL.....	821
Completely reducible operators. By PETER ROSENTHAL.....	826
A remark on the intersection of shells. By W. J. STILES.....	831
On criteria of definability. By WALTER FELSCHER.....	834
Integral representations and refinement-unboundedness. By W. D. L. APPLING.....	837
Correction to "Differentiability of sample functions in Gaussian processes". By J. YEH.....	843
On the existence of rigid compact ordered spaces. By J. DE GROOT and M. A. MAURICE.....	844
Complete amonotonic decompositions of compact continua. By H. L. BAKER, JR.....	847
On monotone unions of manifolds. By P. H. DOYLE.....	854
The quaternion group in plane geometry. By K. SITARAM.....	857
Submersions and immersions with codimension one or two. By EMERY THOMAS.....	859
Quotients of completely regular spaces. By C. J. HIMMELBERG.....	864
Convex functions on convex polytopes. By DAVID GALE, VICTOR KLEE and R. T. ROCKAFELLAR.....	867
Homotopy groups for cellular set-valued functions. By C. J. RHEE .	874
Extensions of totally bounded pseudometrics. By R. A. ALO and H. L. SHAPIRO.....	877
On the Borel fields of a finite set. By MARLON RAYBURN.....	885
On closing manifolds fibered over surfaces. By M. C. THORNTON ...	890
Uncountably many mildly wild non-Wilder arcs. By S. J. LOMONACO .	895
