

PROCEEDINGS
OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY

W. H. J. FUCHS	E. A. MICHAEL
IRVING GLICKSBERG	IRVING REINER
ARTHUR MATTUCK	EMERY THOMAS
W. R. WASOW	

WITH THE COÖPERATION OF

W. W. BOONE	S. M. SHAH	HANS WEINBERGER
JOSHUA CHOVER	H. S. SHAPIRO	J. A. WOLF

VOLUME 19, NUMBER 5
OCTOBER, 1968

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the
American Mathematical Society

Proceedings of the American Mathematical Society

The PROCEEDINGS of the American Mathematical Society is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The maximum length of an acceptable paper is about 8 printed pages. (Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.) The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary.

Very short notes (not to exceed 1 printed page) of an unusual nature are also accepted, and appear under the heading SHORTER NOTES. (Items deemed suitable include an elegant new proof of an important and well known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.)

Papers in algebra and number theory should be sent to ARTHUR MATTUCK, Room 2-275, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139, or to IRVING REINER, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

Papers in modern or classical analysis should be sent to IRVING GLICKSBERG, Mathematics Department, University of Washington, Seattle, Washington 98105, or to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850.

Papers in algebraic geometry should be sent to ARTHUR MATTUCK; papers in set-theoretic and general topology to ERNEST MICHAEL, Mathematics Department, University of Washington, Seattle, Washington 98105; in algebraic topology and all other types of geometry to P. EMERY THOMAS, Mathematics Department, University of California, Berkeley, California 94720.

Papers in applied mathematics, differential equations, and related areas of analysis should be sent to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in probability, statistics, and related fields should be sent to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in logic, set theory, and related areas should be sent to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

All other communications should be addressed to the Managing Editor, ARTHUR MATTUCK, at the above address.

Inquiries from authors regarding reprints, or changes of addresses for mailing proofs, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six issues is planned for 1968. The subscription price is \$12.00. Back issues (Vols. 1-18, 1950-1967) are available at the price of \$14.00 each.

The American Mathematical Society also publishes the following journals which accept research papers: BULLETIN, TRANSACTIONS and MATHEMATICS OF COMPUTATION. For details and the list of editors, please consult a recent issue. Reviews of the current mathematical literature of the world are published in MATHEMATICAL REVIEWS; editorial correspondence for this journal should be sent to: 416 Fourth Street, Ann Arbor, Michigan 48103.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph D., P. L. & R.

Contents—Continued from back cover

Maximal normal subgroups of the modular group. By MORRIS NEWMAN.....	1138
Rings with restricted minimum condition. By A. J. ORNSTEIN.....	1145
On Britton's Theorem A. By C. F. MILLER III.....	1151
Direct decomposition of regular semigroups. By R. J. WARNE.....	1155
On \mathfrak{F} -normalizers and \mathfrak{F} -covering subgroups. By AVINO'AM MANN....	1159
Irreducible representations of a simple Lie algebra admitting a one- dimensional weight space. By F. W. LEMIRE.....	1161
On the construction of upper radical properties. By YU-LEE LEE.....	1165
On the equivalence of a ternary quadratic form. By E. H. HADLOCK and AMIN MUWAFI.....	1167
Pairs of consecutive primitive roots modulo a prime. By EMANUEL VEGH.....	1169
The prime radical in a Jordan ring. By CHESTER TSAI.....	1171
Subdirect sums of integers and reals. By P. F. CONRAD.....	1176
On complete locally euclidean spaces. By J. C. SANWAL.....	1183
More characterizations of inner product spaces. By J. T. JOICHI.....	1185
Some fixed point theorems and convolution equations. By D. D. ANG and D. E. DAYKIN.....	1187
Concerning wild Cantor sets in E^3 . By R. B. SHER.....	1195
On an analytic simplification of a system of linear ordinary differential equations containing a parameter. By PO-FANG HSIEH.....	1201
Concerning the finite model property for propositional calculi. By JOHN ANDERSON.....	1207
Variation of parameters for nonlinear differential-difference equations. By S. P. HASTINGS.....	1211
The Gronwall inequality for modified Stieltjes integrals. By W. W. SCHMAEDEKE and G. R. SELL.....	1217
A note on fixed point theorems for a family of nonexpansive mappings. By DANG-XUAN-HONG.....	1223
A note on asymptotic stability. By OTTO PLAAT.....	1225
Linear systems of difference equations with a regular singularity. By W. A. HARRIS, JR.....	1228
A note on connectedness im kleinen. By H. S. DAVIS.....	1237
Weakly bounded systems of differential equations. By T. G. HALLAM.....	1242

CONTENTS

Vol. 19, No. 5

OCTOBER, 1968

Whole No. 113

	Page
A note on second order differential inequalities. By KEITH SCHRADER .	1007
Sets of convergence of exponential series. By D. R. LICK	1013
Entire functions of bounded index. By S. M. SHAH	1017
On the L^1 norm and the mean value of a trigonometric series. By L. C. KURTZ and S. M. SHAH	1023
Inequalities related to Lidskii's. By M. F. SMILEY	1029
Matrix summability of convex sequences. By D. F. DAWSON	1035
On the boundedness of automorphic forms. By DAVID DRASIN and C. J. EARLE	1039
On distributions with support at the origin. By LEON NOWER	1043
On the derivative of an entire function. By MORRIS MARDEN	1045
Algebraically dependent functions of a complex and p -adic variable. By D. L. HILLIKER	1052
Properties of bounded solutions of nonlinear equations of second order. By A. G. KARTSATOS	1057
A property of angular cluster sets. By PETER LAPPAN	1060
Norm-compact sets of representing measures. By STEPHEN FISHER . . .	1063
Modifications of Fourier transforms. By WALTER RUDIN	1069
The existence of gauge forms on affine varieties. By R. L. FABER	1075
Every locally compact MAP group is unimodular. By H. LEPTIN and L. ROBERTSON	1079
An isometry of H^p spaces. By N. J. WEISS	1083
Weakly almost periodic functions and Fourier-Stieltjes transforms. By D. E. RAMIREZ	1087
An extension theorem for obtaining measures on uncountable product spaces. By E. O. ELLIOTT	1089
The primitive spectrum of a tensor product of C^* -algebras. By AUBREY WULFSOHN	1094
Functions of bounded variation and moment-sequences of continuous functions. By G. G. JOHNSON and P. C. TONNE	1097
A characterization of pure states of C^* -algebras. By ERLING STORMER	1100
Fourier series on compact Lie groups. By M. E. TAYLOR	1103
Lines in a planar space. By G. P. MURPHY	1106
Deleted products with prescribed homotopy types. By A. H. COPELAND, JR.	1109
Chain theories and their derived homology. By R. O. BURDICK, P. E. CONNER and E. E. FLOYD	1115
Note on a theorem by Sen. By G. M. LANCASTER	1119
On suspending homotopy spheres. By P. W. HARLEY	1123
Curvature of nonlinear connections. By JAAK VILMS	1125
A note on numerable covers. By J. DERWENT	1130
Compactifications of n -space by an arc. By K. W. KWUN	1133
