WITH THE COÖPERATION OF

W. W. BOONE

JOSHUA CHOVER

VOLUME 24, NUMBER 3

MARCH, 1970

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Proceedings of the American Mathematical Society

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. The maximum length of an acceptable paper is about 8 printed pages. Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.

SHORTER NOTES. Very short notes not to exceed 1 printed page of an unusual nature are also accepted, and appear under the heading **SHORTER NOTES**. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the **SHORTER NOTES** department.

PREPARATION OF THE MANUSCRIPT. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). It should be at least one complete sentence, but not over 150 words, with the upper limit primarily for longer papers. The title should be short, but informative; useless vague phrases such as "some remarks about" or "concerning" should be avoided. At the end of the article, placed before the first footnote, there should be first the A.M.S. subject classification numbers representing the primary and secondary subjects of the article, followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of subject classification numbers is printed at the end of each volume of *Mathematical Reviews*. See the June 1969 Notices for more details, as well as illustrative examples.

SUBMISSION OF MANUSCRIPTS. See the last page of the issue.

SUBSCRIPTION INFORMATION. Three volumes of four issues are planned for 1970. The subscription price is \$60.00 for the three volumes. Back issues of Volumes 1-16 are available at a price of \$14.00 each, Volumes 17-19 at a price of \$18.00 each, and Volumes 20-23 at a price of \$30.00 each.

THE PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, 321 South Main Street, P.O. Box 6248, Providence, R.I. 02904. Second-class postage paid at Providence, Rhode Island and additional mailing offices.

RESEARCH AND REVIEW JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

Bulletin of the American Mathematical Society

The journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The current issue of the journal lists editors to whom prospective publications should be addressed. Publication is bimonthly.

Transactions of the American Mathematical Society

This monthly journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

The current issue of the journal lists editors to whom prospective publications should be addressed.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Currently publication is monthly; two volumes are published each year, each volume consisting of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Soviet Mathematics—Doklady

This bimonthly is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long.

Mathematics of the USSR—Izvestija

This journal is a cover-to-cover translation of IZVESTIJA AKADEMII NAUK SSSR SERIJA MATEMATIČESKAJA, published bimonthly by the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. Starting with Volume 1, Number 1, January-February 1967, which corresponds to the Russian original Tom 31, Number 1, the translation is prepared by the Plenum Publishing Corporation with the cooperation of the American Mathematical Society, and is published bimonthly by the American Mathematical Society.

Mathematics of the USSR—Sbornik

This journal is a cover-to-cover translation of MATEMATIČESKIIĖ SBORNIK (New Series), published monthly by the Moscow Mathematical Society and the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published monthly starting with Volume 1, Number 1, January 1967, which corresponds to the Russian original Tom 72 (114), No. 1.

Requests for information concerning any of these journals should be addressed to the American Mathematical Society, Box 6248, Providence, Rhode Island 02904. Papers for publication should be sent to an appropriate editor rather than to the Providence Office.

SUBMISSION OF MANUSCRIPT

Send papers directly to one of the authors listed under the subject field of the paper.

Algebra and number theory.

GEORGE B. SELIGMAN, Department of Mathematics, Yale University, New Haven, Connecticut 06520

JOSEPH J. ROTMAN, Mathematics Department, University of Illinois, Urbana, Illinois 61801

Modern or classical analysis.

IRVING GLICKSBERG, Mathematics Department, University of Washington, Seattle, Washington 98105

W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850

Algebraic geometry.

GEORGE B. SELIGMAN, Department of Mathematics, Yale University, New Haven, Connecticut 06520

Set-theoretic and general topology.

ERNEST MICHAEL, Mathematics Department, University of Washington, Seattle, Washington 98105

Algebraic topology and all other types of geometry.

P. EMERY THOMAS, Mathematics Department, University of California, Berkeley, California 94720

Applied mathematics, differential equations, and related areas of analysis.

FRED BRAUER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706

Probability, statistics, and related fields.

JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706

Logic, set theory, and related areas.

W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801

All other communications should be addressed to the Managing Editor, W. H. J. FUCHS, at the above address.

REPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02904.

CONTENTS—Continued from back cover

On nearly commutative nodal algebras in characteristic zero. By MICHAEL RICH.....	563
On finite-dimensional torsion-free modules and rings. By E. P. ARMENDARIZ.....	566
Nilpotent matrices with invertible transpose. By RAM NIWAS GUPTA	572
Continued fractions over an inner product space. By F. A. ROACH...	576
Properties of absolute summability matrices. By J. A. FRIDY.....	583
The Hausdorff summability of Fourier series. By B. KWEE.....	586
An elementary Tauberian theorem of nonlinear type. By HARRY POLLARD and D. G. SAARI.....	593
Univalence conditions and Sturm-Liouville eigenvalues. By S. FRIED- LAND and Z. NEHARI.....	595
The peak sets of A^m . By B. A. TAYLOR and D. L. WILLIAMS.....	604
Hyperbolic spaces and quadratic forms. By JOSEPH E. VALENTINE...	607
Pontryagin duality in K -theory. By J. W. VICK.....	611
Ruled surfaces in elliptic space. By CURTIS M. FULTON.....	617
A product integral solution of a Stieltjes-Volterra integral equation. By JAMES A. RENEKE.....	621
A noncontractive fixed point theorem. By E. J. PELLICCIARO.....	627
A Riesz representation theorem. By ROBERT KENT GOODRICH.....	629
Commuting transformations and mixing. By M. A. AKCOGLU, R. V. CHACON and T. SCHWARTZBAUER.....	637
A general method for approximating measure preserving transforma- tions. By T. SCHWARTZBAUER.....	643

SHORTER NOTES

Simplicial and piecewise linear collapsibility. By MARSHALL M. COHEN	649
Fourier-Stieltjes transforms tending to zero. By LAWRENCE J. WALLEN	651

CONTENTS

Vol. 24, No. 3

MARCH, 1970

Whole No. 129

	Page
Homeomorphic measures in metric spaces. By JOHN C. OXTOBY.....	419
Closed operators commuting with a weighted shift. By ERIC A. NORDGREN.....	424
Taut and tight complex manifolds. By THEODORE J. BARTH.....	429
Local complex analytic curves in an analytic variety. By BERNARD SHIFFMAN.....	432
A mean ergodic theorem. By ROBERT SINE.....	438
Lifting of topological entropy. By HARVEY B. KEYNES.....	440
Metrizability of adjunction spaces. By CARLOS J. R. BORGES.....	446
The rank of a flat module. By RICHARD T. SHANNON.....	452
Resultants of cyclotomic polynomials. By TOM M. APOSTOL.....	457
A note on quotient semirings. By D. R. LATORRE.....	463
On the extension of linearly independent subsets of free modules to bases. By BYOUNG-SONG CHWE and JOSEPH NEGGERS.....	466
Extending differential specializations. By PETER BLUM.....	471
Any n arithmetic progressions covering the first 2^n integers cover all integers. By R. B. CRITTENDEN and C. L. VANDEN EYNDEN.....	475
Euler's ϕ -function and separable Gauss sums. By TOM M. APOSTOL..	482
Injective hulls of C^* algebras. II. By HARRY GONSHOR.....	486
Differential equations for automorphic forms in several complex variables. By H. L. RESNIKOFF.....	492
Representations of algebraic groups preserving quaternion skew-hermitian forms. By FRANK GROSSHANS.....	497
Direct product decomposition of commutative semisimple rings. By ALEXANDER ABIAN.....	502
Primitive rings with involution whose symmetric elements satisfy a generalized polynomial identity. By WALLACE S. MARTINDALE III..	508
Applications of an inequality for the Schur complement. By EMILIE V. HAYNSWORTH.....	512
Partition representations of free lattices. By ALFRED W. HALES.....	517
Operations preserving all equivalence relations. By FRED GALVIN and ALFRED HORN.....	521
Injective hulls of Stone algebras. By H. LAKSER.....	524
Commutative algebras of Hochschild dimension one. By A. R. MAGID	530
Jordan's theorem for solvable groups. By LARRY DORNHOFF.....	533
Characterization of Foulser's λ -systems. By M. L. NARAYANA RAO..	538
Generators and relations for Coxeter groups. By C. T. BENSON and L. C. GROVE.....	545
Note on the homology of a fiber product of groups. By G. S. RINEHART.	548
On residually finite generalized free products. By R. J. GREGORAC.....	553
On the contents of polynomials. By JIMMY T. ARNOLD and ROBERT GILMER.....	556
