ALLEN SHIELDS

VOLUME 25, NUMBER 2

JUNE, 1970

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY  
PROVIDENCE, RHODE ISLAND

## Proceedings of the American Mathematical Society

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. The maximum length of an acceptable paper is about 8 printed pages. Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.

SHORTER NOTES. Very short notes not to exceed 1 printed page of an unusual nature are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

PREPARATION OF THE MANUSCRIPT. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). It should be at least one complete sentence, but not over 150 words, with the upper limit primarily for longer papers. The title should be short, but informative; useless vague phrases such as "some remarks about" or "concerning" should be avoided. At the end of the article, placed before the first footnote, there should be first the A.M.S. subject classification numbers representing the primary and secondary subjects of the article, followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of subject classification numbers is printed at the end of each volume of *Mathematical Reviews*. See the June 1969 Notices for more details, as well as illustrative examples.

SUBMISSION OF MANUSCRIPTS. See the last page of the issue.

SUBSCRIPTION INFORMATION. Three volumes of four issues are planned for 1970. The subscription price is \$60.00 for the three volumes. Back issues of Volumes 1-16 are available at a price of \$14.00 each, Volumes 17-19 at a price of \$18.00 each, and Volumes 20-23 at a price of \$30.00 each.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, 321 South Main Street, P.O. Box 6248, Providence, R.I. 02904. Second-class postage paid at Providence, Rhode Island and additional mailing offices.

# RESEARCH AND REVIEW JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

## Bulletin of the American Mathematical Society

The journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The current issue of the journal lists editors to whom prospective publications should be addressed. Publication is bimonthly.

## Transactions of the American Mathematical Society

This monthly journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

The current issue of the journal lists editors to whom prospective publications should be addressed.

## Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

## Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Currently publication is monthly; two volumes are published each year, each volume consisting of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

## Soviet Mathematics—Doklady

This bimonthly is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long.

## Mathematics of the USSR—Izvestija

This journal is a cover-to-cover translation of IZVESTIJA AKADEMII NAUK SSSR SERIJA MATEMATIČESKAJA, published bimonthly by the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. Starting with Volume 1, Number 1, January-February 1967, which corresponds to the Russian original Tom 31, Number 1, the translation is prepared by the Plenum Publishing Corporation with the cooperation of the American Mathematical Society, and is published bimonthly by the American Mathematical Society.

## Mathematics of the USSR—Sbornik

This journal is a cover-to-cover translation of MATEMATIČESKIĀ SBORNIK (New Series), published monthly by the Moscow Mathematical Society and the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published monthly starting with Volume 1, Number 1, January 1967, which corresponds to the Russian original Tom 72 (114), No. 1.

\*\*\*\*\*

Requests for information concerning any of these journals should be addressed to the American Mathematical Society, Box 6248, Providence, Rhode Island 02904. Papers for publication should be sent to an appropriate editor rather than to the Providence Office.

## SUBMISSION OF MANUSCRIPT

Send papers directly to one of the authors listed under the subject field of the paper

*Algebra and number theory.*

GEORGE B. SELIGMAN, Department of Mathematics, Yale University, New Haven, Connecticut 06520

JOSEPH J. ROTMAN, Mathematics Department, University of Illinois, Urbana, Illinois 61801

*Modern or classical analysis.*

IRVING GLICKSBERG, Mathematics Department, University of Washington, Seattle, Washington 98105

W. H. J. FUCHS, Department of Mathematics, White Hall, Cornell University, Ithaca, New York 14850

ALLEN SHIELDS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48104

*Algebraic geometry.*

GEORGE B. SELIGMAN, Department of Mathematics, Yale University, New Haven, Connecticut 06520

*Set-theoretic and general topology.*

ERNEST MICHAEL, Mathematics Department, University of Washington, Seattle, Washington 98105

*Algebraic topology and all other types of geometry.*

P. EMERY THOMAS, Mathematics Department, University of California, Berkeley, California 94720

*Applied mathematics, differential equations, and related areas of analysis.*

FRED BRAUER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706

*Probability, statistics, and related fields.*

JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706

*Logic, set theory, and related areas.*

W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801

All other communications should be addressed to the Managing Editor, W. H. J. FUCHS, at the above address.

REPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02904.

CONTENTS—Continued from back cover

Tame boundary sets of crumpled cubes in $E^3$ . By F. M. LISTER. . . . .	377
Sets expressible as unions of two convex sets. By W. R. HARE, JR. and JOHN W. KENNELLY. . . . .	379
Radon measures on groups. By CHANDRA GOWRISANKARAN. . . . .	381
Minimal coefficients in Hölder conditions in the Wiener space. By J. YEH. . . . .	385
A Tauberian theorem for the $(C, 1)(N, 1/(n+1))$ summability method. By H. P. DIKSHIT. . . . .	391
Three sets of conditions on rings. By ABRAHAM A. KLEIN. . . . .	393
A class of uniform convergence structures. By G. D. RICHARDSON. . . . .	399
A Stone-Čech compactification for limit spaces. By G. D. RICHARDSON. . . . .	403
A new class of generating functions for hypergeometric polynomials. By DAVID ZEITLIN. . . . .	405
On the number of recurrent orbit closures. By NELSON G. MARKLEY. . . . .	413
Algebraic structure of the manifold of solutions of the $N$ -body problem. By LAWRENCE GOLDMAN. . . . .	417
Small regular local Noether lattices. I. By KENNETH P. BOGART. . . . .	423
On the existence of incompressible surfaces in certain 3-manifolds. II. By WOLFGANG HEIL. . . . .	429
On $l$ -1 summability. By B. WOOD. . . . .	433
Another exotic action on $E^n$ . By GLEN E. BREDON. . . . .	437
Rings of continuous functions and totally integrally closed rings. By M. HOCHSTER. . . . .	439
On the inverse of an integral operator. By PETER WOLFE. . . . .	443
On mapping indecomposable continua onto certain chainable indecomposable continua. By J. W. ROGERS, JR. . . . .	449
On normal complements of $\mathfrak{F}$ -covering subgroups. By H. J. SCHMIDT, JR. . . . .	457

SHORTER NOTES

Associative, abelian $H$ -spaces have trivial Postnikov invariants. By MARTIN ARKOWITZ. . . . .	460
Erratum to Volume 23. . . . .	462

# CONTENTS

Vol. 25, No. 2

JUNE, 1970

Whole No. 132

	Page
On the transpose of simple sets of polynomials effective in Faber regions. By M. NASSIF.....	209
Convex meromorphic mappings and related functions. By JAMES MILLER.....	220
Coordinatization of orthocomplemented and orthomodular posets. By S. P. GUDDER and R. H. SCHELP.....	229
Complex roots of real characteristic functions. By ROBERT G. STAUDTE, JR. and MAHABANOO N. TATA.....	238
A theorem on $T$ -fractions corresponding to a rational function. By KARI HAG.....	247
The nonequivalence of oscillation and nondisconjugacy. By G. B. GUSTAFSON.....	254
Quasi-compact operators in topological linear spaces. By DONALD RHOADS.....	261
On almost maximal right ideals. By KWANGIL KOH.....	266
Graphs associated with a group. By R. J. PLEMMONS.....	273
The number of finite topologies. By D. KLEITMAN and B. ROTHSCHILD.....	276
On extending homeomorphisms to Fréchet manifolds. By R. D. ANDERSON and JOHN D. MCCHAREN.....	283
Asymptotics in random $(0, 1)$ -matrices. By PATRICK EUGENE O'NEIL.....	290
Characters on singly generated $C^*$ -algebras. By JOHN BUNCE.....	297
On the sum of two Borel sets. By P. ERDÖS and A. H. STONE.....	304
Identities involving products of number-theoretic functions. By R. G. BUSCHMAN.....	307
An analog of the Lusin-Privaloff radial uniqueness theorem. By K. F. TSE.....	310
A product space with the fixed point property. By W. L. YOUNG.....	313
Symmetry of generalized group algebras. By KJELD B. LAURSEN.....	318
An explicit summation formula and its application. By LEON BERNSTEIN.....	323
On boundedly metacompact and boundedly paracompact spaces. By P. FLETCHER, R. A. MCCOY and R. SLOVER.....	335
The spectrum of a function algebra. By ROBERT GEORGE BLUMENTHAL.....	343
Compactness in $L_\infty$ spaces. By BARRY M. CHERKAS.....	347
Note on Hille's exponential formula. By Z. DITZIAN.....	351
A compactness property for prime ideals in Noetherian rings. By CLIVE M. REIS and T. M. VISWANATHAN.....	353
Bases of type $P$ and reflexivity of Banach spaces. By J. R. HOLUB.....	357
Wallman-type compactifications. By CHARLES M. BILES.....	363
Concerning continuous selections. By SAM B. NADLER, JR. and L. E. WARD, JR.....	369
A crinkled arc. By GORDON G. JOHNSON.....	375
