## PROCEEDINGS

OF THE

## American Mathematical Society

EDITED BY<br>FRED G. BRAUER<br>GEORGE B. SELIGMAN<br>W. H. J. FUCHS<br>IRVING GLICKSBERG<br>ERNEST A. MICHAEL<br>JOSEPH J. ROTMAN<br>P. EMERY THOMAS

WITH THE COÖPERATION OF
W. W. Boone

Joshua Chover
Allen Shields

VOLUME 25, NUMBER 3
JULY, 1970

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY PROVIDENCE, RHODE ISLAND

## Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. The maximum length of an acceptable paper is about 8 printed pages. Since a page of the Proceedings contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.
Shorter notes. Very short notes not to exceed 1 printed page of an unusual nature are also accepted, and appear under the heading Shorter Notes. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the Shorter Notes department.

Preparation of the manuscript. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). It should be at least one complete sentence, but not over 150 words, with the upper limit primarily for longer papers. The title should be short, but informative; useless vague phrases such as "some remarks about" or "concerning" should be avoided. At the end of the article, placed before the first footnote, there should be first the A.M.S. subject classification numbers representing the primary and secondary subjects of the article, followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of subject classification numbers is printed at the end of each volume of Mathematical Reviews. See the June 1970 Notices for more details, as well as illustrative examples.

## Submission of manuscripts. See the last page of the issue.

Subscription information. Three volumes of four issues are planned for 1970. The subscription price is $\$ 60.00$ for the three volumes. Back issues of Volumes 1-16 are available at a price of $\$ 14.00$ each, Volumes $17-19$ at a price of $\$ 18.00$ each, and Volumes 20-25 at a price of $\$ 30.00$ each.

The Proceedings of the American Mathematical Society is published monthly. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Soclety, 321 South Main Street, P.O. Box 6248, Providence, R.I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices.

# RESEARCH AND REVIEW JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY 

## Bulletin of the American Mathematical Society

The journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The current issue of the journal lists editors to whom prospective publications should be addressed. Publication is bimonthly.

## Transactions of the American Mathematical Society

This monthly journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the Proceedings.

The current issue of the journal lists editors to whom prospective publications should be addressed.

## Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

## Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Currently publication is monthly; two volumes are published each year, each volume consisting of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

## Soviet Mathematics—Doklady

This bimonthly is a translation journal containing the entire pure mathematics section of the Dorlady Akademir Nauk SSSR, the Reports of the Academy of Sciences of the USSR. The Doklady for a year contains about 500 articles, each about 4 pages long.

## Mathematics of the USSR-Izvestija

This journal is a cover-to-cover translation of Izvestija Arademir Nauk SSSR Serija Matematičeskaja, published bimonthly by the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. Starting with Volume 1, Number 1, January-February 1967, which corresponds to the Russian original Tom 31, Number 1, the translation is prepared by the Plenum Publishing Corporation with the cooperation of the American Mathematical Society, and is published bimonthly by the American Mathematical Society.

## Mathematics of the USSR—Sbornik

This journal is a cover-to-cover translation of Matematičeskił Sbornik (New Series), published monthly by the Moscow Mathematical Society and the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published monthly starting with Volume 1, Number 1, January 1967, which corresponds to the Russian original Tom 72 (114), No. 1.

Requests for information concerning any of these journals should be addressed to the American Mathematical Society, Box 6248, Providence, Rhode Island 02904. Papers for publication should be sent to an appropriate editor rather than to the Providence Office.

## SUBMISSION OF MANUSCRIPT

Send papers directly to one of the authors listed under the subject field of the paper.

## Algebra and number theory.

George B. Seligman, Department of Mathematics, Yale University, New Haven, Connecticut 06520
Joseph J. Rotman, Mathematics Department, University of Illinois, Urbana, Illinois 61801

Modern or classical analysis.
Irving Glicksberg, Mathematics Department, University of Washington, Seattle, Washington 98105
W. H. J. Fuchs, Department of Mathematics, White Hall, Cornell University, Ithaca, New York 14850
Allen Shields, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48104

## Algebraic geometry.

George B. Seligman, Department of Mathematics, Yale University, New Haven, Connecticut 06520

Set-theoretic and general topology.
Ernest Michael, Mathematics Department, University of Washington, Seattle, Washington 98105

Algebraic topology and all other types of geometry.
P. Emery Thomas, Mathematics Department, University of California, Berkeley, California 94720

Applied mathematics, differential equations, and related areas of analysis.
Fred Brauer, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706

Probability, statistics, and related fields.
Joshua Chover, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706

Logic, set theory, and related areas.
W. W. Boone, Mathematics Department, University of Illinois, Urbana, Illinois 61801

All other communications should be addressed to the Managing Editor, W. H. J. Fuchs, at the above address.

Reprints and address changes. Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

## Contents-Continued from back cover

Graph closures and metric compactifications of $N$. By A. K. Steiner and E. F. Steiner. ..... 593
Two theorems on Riemann surfaces with noncyclic automorphism groups. By Robert D. M. Accola ..... 598
On the ideals of strictly singular and inessential operators. By William Pfaffenberger ..... 603
Irregularities of distribution. V. By Wolfgang M. Schmidt ..... 608
Groups with an irreducible character of large degree are solvable. By Frank DeMeyer. ..... 615
A proof of Whitman's representation theorem for finite lattices. By S. K. Thomason ..... 618
A note on the Brauer-Speiser theorem. By Burton Fein ..... 620
Maximal C*-subalgebras of a Banach algebra. By Ellen Torrance. ..... 622
Well-known LCA groups characterized by their closed subgroups. By D. L. Armacost. ..... 625
Cyclotomic splitting fields. By Murray M. Schacher ..... 630
Extension of a result of Dieudonné. By J. M. Worrell, Jr. and H. H. Wicke ..... 634
Degrees of sums in a separable field extension. By I. M. IsaAcs. ..... 638
Property $P_{3}$ and the union of two convex sets. By E. O. Buchman ..... $64 \%$
A characterization of covering dimension for collectionwise normal spaces. By James Austin French ..... 646
Atomic and nonatomic measures. By Roy A. Johnson ..... 650
A comparison theorem for conjugate points of general selfadjoint differ- ential equations. By Kurt Kreith ..... 656
Primary factorization in a weak Bezout domain. By R. A. Beauregard and R. E. Johnson ..... 662
Application of Liapunov theory to boundary value problems. By J. H. George and W. G. Sutton ..... 666
A note on quantum probability spaces. By Tibor Neubrunn ..... 672
The connection between $P$-fractions and associated fractions. By Arne Magnus ..... 676
Unit groups of infinite abelian extensions. By Warren May ..... 680
On the absolute Nörlund summability factors of infinite series. By S. R. Singh ..... 684
Divergence of interpolation polynomials in the complex domain. By P. J. O'Hara. ..... 690
Inequalities for a symmetric elliptic integral. By B. C. Carlson ..... 698
Some strengthenings of the Ulam nonmeasurability condition. By S. Mrówka ..... 704
Shorter Notes
Curvature forms for 2-manifolds. By N. R. Wallach and F. W. Warner. ..... 712
An extension of Hartogs' theorem for domains whose boundary is not smooth. By David G. Schaeffer. ..... 714
Finite linear groups containing an irreducible sc/lvable normal subgroup. By David L. Winter ..... 716

## CONTENTS

Vol. 25, No. 3 ..... JULY, 1970
Whole No. ..... 133
Page
Oscillation of solutions of certain ordinary differential equations of $n$th order. By Gerald H. Ryder and David V. V. Wend ..... 463
Tensor products of Banach algebras. II. By Bernard R. Gelbaum ..... 470
Maximal two-sided ideals in tensor products of Banach algebras. By Kjeld B. Laursen ..... 475
On regular matrices that induce the Gibbs phenomenon. By Joaquin Bustoz ..... 481
Analyticity and quasi-analyticity for one-parameter semigroups. By J. W. Neuberger ..... 488
A characterization of holomorphic semigroups. By Tosio Kato ..... 495
Regularity of semigroup rings. By Julian Weissglass ..... 499
On the solution of linear functional equations by averaging iteration. By W. G. Dotson, Jr ..... 504
The number of permutational products of two finite groups. By Norman R. Reilly ..... 507
Units in modular group rings. By D. B. Coleman and D. S. Passman ..... 510
On the homotopy theory of simplicial Lie algebras. By Stewart B. Priddy ..... 513
Not all semiregular Urysohn-closed spaces are Katětov-Urysohn. By Jack R. Porter ..... 518
Some asymptotic theorems for abstract differential equations. By S. Zard- MAN ..... 521
Jordan automorphisms on a semisimple Banach algebra. By A. M. Sinclair ..... 526
The Arens product and duality in $B^{*}$-algebras. By B. J. Tomius and Pak-Ken Wong ..... 529
Analyticity and continuation of certain functions of two complex variables. By Carl H. Fitzgerald ..... 530
Locally compact spaces of measures. By Norman Y. Luther ..... 541
Extending homeomorphisms in compactification of Fréchet spaces. By Raymond Y. T. Wong ..... 548
Uniform spaces of countable type. By Giovanni Vidossich ..... 551
On a transformation of bilateral series with applications. By George E. Andrews ..... 554
Rings of polynomials. By A. Evyatar and A. Zaks ..... 559
Rings having solvable adjoint groups. By P. B. Bhattacharya and S. K. Jain ..... 563
An imbedding problem. By J. W. Cannon and S, G. Wayment ..... 566
Liapunov functions and global existence without uniqueness. By STEPHaN R. Bernfeld ..... 571
On $4 / n=1 / x+1 / y+1 / z$. By William A. Webb ..... 578
Subalgebras of $L_{\infty}$ of the circle group. By Leon Brown ..... 585
Some results concerning hyperbolic manifolds. By Peter Kiernan ..... 588
