

AMS (MOS) MAJOR SUBJECT HEADINGS (1970)

The letters in parentheses indicate groupings which are used in the table of contents of each issue and in the volume index.

00 (H) General	44 (B) Integral Transforms, Operational Calculus
01 (H) History and Biography	45 (B) Integral Equations
02 (E) Logic and Foundations	46 (B) Functional Analysis
04 (E) Set Theory	47 (B) Operator Theory
05 (A) Combinatorics	49 (B) Calculus of Variations and Optimal Control
06 (A) Order, Lattices, Ordered Algebraic Structures	50 (D) Geometry
08 (A) General Mathematical Systems	52 (D) Convex Sets and Geometric Inequalities
10 (A) Number Theory	53 (D) Differential Geometry
12 (A) Algebraic Number Theory, Field Theory and Polynomials	54 (G) General Topology
13 (A) Commutative Rings and Algebras	55 (G) Algebraic Topology
14 (A) Algebraic Geometry	57 (G) Manifolds and Cell Complexes
15 (A) Linear and Multilinear Algebra, Matrix Theory (finite and infinite)	58 (G) Global Analysis, Analysis on Manifolds
16 (A) Associative Rings and Algebras	60 (F) Probability Theory and Stochastic Processes
17 (A) Nonassociative Rings and Algebras	62 (F) Statistics
18 (A) Category Theory, Homological Algebra	65 (C) Numerical Analysis
20 (A) Group Theory and Generalizations	68 (C) Computer Science
22 (G) Topological Groups, Lie Groups	70 (C) Mechanics of Particles and Systems
26 (B) Real Functions	73 (C) Mechanics of Solids
28 (B) Measure and Integration	76 (C) Fluid Mechanics
30 (B) Functions of a Complex Variable	78 (C) Optics, Electromagnetic Theory
31 (B) Potential Theory	80 (C) Classical Thermodynamics, Heat Transfer
32 (B) Several Complex Variables and Analytic Spaces	81 (C) Quantum Mechanics
33 (B) Special Functions	82 (C) Statistical Physics, Structure of Matter
34 (B) Ordinary Differential Equations	83 (C) Relativity
35 (B) Partial Differential Equations	85 (C) Astronomy and Astrophysics
39 (B) Finite Differences and Functional Equations	86 (C) Geophysics
40 (B) Sequences, Series, Summability	90 (C) Economics, Operations Re- search, Programming, Games
41 (B) Approximations and Expansions	92 (C) Biology and Behavioral Sciences
42 (B) Fourier Analysis	83 (C) Systems, Control
43 (B) Abstract Harmonic Analysis	94 (C) Information and Communica- tion, Circuits, Automata
	96 (H) Mathematical Education, Elementary
	97 (H) Mathematical Education, Secondary
	98 (H) Mathematical Education, Collegiate

INDEX TO VOLUME 36

SUBJECT INDEX

*Starred items are "Shorter Notes"

A. ALGEBRA AND NUMBER THEORY

05. Combinatorics

Hartfiel, D. J. and Spellmann, J. W. *A role for double stochastic matrices in graph theory*, 389.

Kainen, Paul C. *On the stable crossing number of cubes*, 55.

Kallaher, Michael J. *Rank three affine planes*, 79.

Longyear, Judith Q. *Certain m.o.l.s. as groups*, 379.

06. Order, Lattices, Ordered Algebraic Structures

Baclawski, Kenneth. *Automorphisms and derivations of incidence algebras*, 351.

Berman, Joel. *On the congruence lattices of unary algebras*, 34.

Grätzer, G., Koh, K. M. and Makkai, M. *On the lattice of subalgebras of a Boolean algebra*, 87.

Johnson, E. W. and Lediaev, J. P. *Join-principal elements in Noether lattices*, 73.

Morash, Ronald P. *Orthomodularity and the direct sum of division subrings of the quaternions*, 63.

08. General Mathematical Systems

Berman, Joel. *On the congruence lattices of unary algebras*, 34.

10. Number Theory

Braun, P. B. and Zulauf, A. *A problem connected with the zeros of Riemann's zeta function*, 18.

Hindman, Neil. *The existence of certain ultrafilters on N and a conjecture of Graham and Rothschild*, 341.

Leitzel, James R. C. *Class number in constant extensions of function fields*, 47.

Osgood, Charles F. *The diophantine approximation of certain continued fractions*, 1.

Wagstaff, Samuel S., Jr. *Sequences not containing an infinite arithmetic progression*, 395.

12. Algebraic Number Theory, Field Theory and Polynomials

Adams, Helen E. *The completion of a ring with a valuation*, 21.

Leonard, Philip A. and Williams, Kenneth S. *Quartics over $GF(2^n)$* , 347.

13. Commutative Rings and Algebras

Adams, Helen E. *The completion of a ring with a valuation*, 21.

Barger, S. Floyd. *A theory of grade for commutative rings*, 365.

Brown, William C. *A splitting theorem for algebras over commutative von Neumann regular rings*, 369.

Foxby, Hans-Bjørn. *Embedding of modules over Gorenstein rings*, 336.

Hill, Paul. *On the complete integral closure of a domain*, 26.

Hornell, James. *Intersection theory in an equicharacteristic regular local ring and the relative intersection theory*, 8.

Johnson, E. W. and Lediaev, J. P. *Join-principal elements in Noether lattices*, 73.

Sally, Judith. *A note on integral closure*, 93.

14. Algebraic Geometry

Hornell, James. *Intersection theory in an equicharacteristic regular local ring and the relative intersection theory*, 8.

Sally, Judith. *A note on integral closure*, 93.

15. Linear and Multilinear Algebra; Matrix Theory (finite and infinite)

Berman, Abraham. *Consistency of linear inequalities over sets*, 13.

Markham, Thomas L. *Nonnegative matrices whose inverses are M-matrices*, 326.

16. Associative Rings and Algebras

Baclawski, Kenneth. *Automorphisms and derivations of incidence algebras*, 351.

Brown, William C. *A splitting theorem for algebras over commutative von Neumann regular rings*, 369.

Fieldhouse, David J. *Regular pure projective modules*, 69.

Formanek, Edward and Snider, Robert L. *Primitive group rings*, 357.

Gordon, Robert. *Classical quotient rings of PWD's*, 39.

Liebert, Wolfgang. *Endomorphism rings of reduced complete torsion-free modules over complete discrete valuation rings*, 375.

Raphael, R. *Some homological results on certain finite ring extensions*, 331.

17. Nonassociative Rings and Algebras

Tsai, Chester. *An internal characterization of the prime radical of a Jordan algebra*, 361.

20. Group Theory and Generalizations

Backhouse, N. B. and Bradley, C. J. *Projective representations of abelian groups*, 260.

Dickinson, Robert P., Jr. *Noncancellative congruences on N-semigroups*, 317.

Formanek, Edward and Snider, Robert L. *Primitive group rings*, 357.

Johnson, C. S., Jr. and McMorris, F. R. *Completely cyclic injective semilattices*, 385.

McCool, James and Pietrowski, Alfred. *On recognising certain one relation presentations*, 31.

Sacerdote, George S. *Some undecidable problems in group theory*, 231.

B. ANALYSIS**26. Real Functions**

Chidambaraswamy, J. *On the mean modulus of trigonometric polynomials and a conjecture of S. Chowla*, 195.

Hedberg, Lars Inge. *On certain convolution inequalities*, 505.

Helton, Jon C. *Existence theorems for sum and product integrals*, 407.

28. Measure and Integration

Graham, Colin C. *Compact independent sets and Haar measure*, 578.

Levin, Mark and Stiles, Wilbur. *On the regularity of measures on locally compact spaces*, 201.

Sigmund, Karl. *On mixing measures for Axiom A diffeomorphisms*, 497.

*Stromberg, Karl. *An elementary proof of Steinhaus's theorem*, 308.

Sundaresan, K. and Day, Peter W. *Regularity of group valued Baire and Borel measures*, 609.

30. Functions of a Complex Variable

Goldstein, M. and Walsh, J. L. *Approximation by rational functions on Riemann surfaces*, 464.

Siegel, Alan. *On the Müntz-Szász theorem for $C[0, 1]$* , 161.

Silverman, H. *On a class of close-to-convex functions*, 477.

Thomas, D. K. *On the coefficients of functions with bounded boundary rotation*, 123.

31. Potential Theory

Kuran, Ü. *On measures associated to superharmonic functions*, 179.

Taylor, Peter D. *Selection of representing measures for inner parts*, 537.

34. Ordinary Differential Equations

Bhagat, Bikan. *An equiconvergence theorem for a pair of second order differential equations*, 144.

Burton, T. A. *A differential equation of Lurie type*, 491.

Crandall, Michael G. *A generalization of Peano's existence theorem and flow invariance*, 151.

Fitzgibbon, W. E. *Time dependent nonlinear Cauchy problems in Banach spaces*, 525.

Grimm, L. J. *Analytic solutions of a neutral differential equation near a singular point*, 187.

Moeller, J. W. *Toeplitz operators and differential equations on a half-line*, 531.

St. Mary, Donald F. *On oscillation of complex linear differential systems*, 191.

Schmitt, Klaus. *Periodic solutions of small period of systems of n th order differential equations*, 459.

35. Partial Differential Equations

Young, Eutiquio C. *Uniqueness of solutions of the Dirichlet problem for singular ultrahyperbolic equations*, 130.

40. Sequences, Series, Summability

Mah, Peter F. *Matrix summability in amenable semigroups*, 414.

Moh, T. T. *On a general Tauberian theorem*, 167.

Schaefer, Paul. *Infinite matrices and invariant means*, 104.

41. Approximations and Expansions

Poreda, S. J. *On the continuity of best polynomial approximations*, 471.

Siegel, Alan. *On the Müntz-Szász theorem for $C[0, 1]$* , 161.

42. Fourier Analysis

Chidambaraswamy, J. *On the mean modulus of trigonometric polynomials and a conjecture of S. Chowla*, 195.

*Ebenstein, Samuel E. *$\Lambda(p)$ sets and Sidon sets*, 619.

Fefferman, Charles and Shapiro, Harold S. *A planar face on the unit sphere of the multiplier space M_p , $1 < p < \infty$* , 435.

Kaufman, Robert. *Kronecker sets and metric properties of M_0 -sets*, 519.

Redheffer, Ray. *Two consequences of the Beurling-Malliavin theory*, 116.

Young, Wo-Sang. *A note on maximal inequalities*, 207.

43. Abstract Harmonic Analysis

*Argabright, L. N. *On the mean value of a weakly almost periodic function*, 315.

Cambern, Michael. *The isometries of $H^\infty(K)$* , 173.

Graham, Colin C. *Compact independent sets and Haar measure*, 578.

46. Functional Analysis

Aron, Richard and Cima, Joseph A. *A theorem on holomorphic mappings into Banach spaces with basis*, 289.

Banilower, H. *Simultaneous extensions from discrete subspaces*, 451.

Basener, Richard F. *A condition for analytic structure*, 156.

Cambern, Michael. *The isometries of $H^\infty(K)$* , 173.

Casazza, P. *On a geometric condition related to boundedly complete bases and normal structure in Banach spaces*, 443.

Clark, James R. *Coreflexive and somewhat reflexive Banach spaces*, 421.

Crofts, G. *Generating classes of perfect Banach sequence spaces*, 137.

Digernes, Trond. *A new characterization of separable GCR-algebras*, 448.

- Giellis, George R. *A characterization of Hilbert modules*, 440.
 Holub, J. R. *Compactness in topological tensor products and operator spaces*, 398.
 Lindberg, Karl. *Contractive projections in continuous function spaces*, 97.
 Muhly, Paul S. *Maximal weak-* Dirichlet algebras*, 515.
 Schröder, Gunnar. *Differentiation of interval functions*, 485.
 Smith, James F. *The p -classes of a Hilbert module*, 428.
 *Wilansky, Albert. *Projections of Banach spaces*, 306.
 Young, Wo-Sang. *A note on maximal inequalities*, 207.

47. Operator Theory

- Gatica, Juan A. and Kirk, W. A. *Fixed-point theorems for lipschitzian pseudo-contractive mappings*, 111.
 Holub, J. R. *Compactness in topological tensor products and operator spaces*, 398.
 Lebow, Arnold. *Spectral radius of an absolutely continuous operator*, 511.
 Lindberg, Karl. *Contractive projections in continuous function spaces*, 97.
 Luecke, Glenn R. *A new proof of a theorem on quasitriangular operators*, 535.
 *Pedersen, Gert K. *Some operator monotone functions*, 309.
 *Pedersen, Gert K. and Takesaki, Masamichi. *The operator equation $THT=K$* , 311.
 Sato, Ryotaro. *On the individual ergodic theorem for positive operators*, 456.
 *Venkateswaran, S. *The existence of a solution of $f(x)=kx$ for a continuous not necessarily linear operator*, 313.
 *Wilansky, Albert. *Projections of Banach spaces*, 306.

49. Calculus of Variations and Optimal Control

- Erbacher, Joseph A. *A variational problem for submanifolds of Euclidean space*, 467.

C. APPLIED MATHEMATICS

90. Economics, Operations Research, Programming, Games

- Orkin, Michael. *An approximation theorem for infinite games*, 212.

D. GEOMETRY

50. Geometry

- Kallaher, Michael J. *Rank three affine planes*, 79.

52. Convex Sets and Geometric Inequalities

- Berman, Abraham. *Consistency of linear inequalities over sets*, 13.
 Lay, Steven R. *Separation by cylindrical surfaces*, 224.
 Stavrakas, Nick M. and Jamison, R. E. *Valentine's extensions of Tietze's theorem on convex sets*, 229.
 Stein, Sherman K. *A symmetric star body that tiles but not as a lattice*, 543.
 Taylor, Peter D. *Selection of representing measures for inner parts*, 537.

53. Differential Geometry

- Erbacher, Joseph A. *A variational problem for submanifolds of Euclidean space*, 467.
 Spruck, Joel. *An a priori estimate for the Gauss curvature of nonparametric surfaces of constant mean curvature*, 217.

E. LOGIC AND FOUNDATIONS

02. Logic and Foundations

- Barback, Joseph. *Universal regressive isols*, 549.
 Ellentuck, Erik. *Nonrecursive relations among the isols*, 239.
 Sacerdote, George S. *Some undecidable problems in group theory*, 231.

F. STATISTICS AND PROBABILITY

60. Probability Theory and Stochastic Processes

Rosencrans, Steven and Sawyer, Stanley. *An extremal property of independent random variables*, 552.

Samal, G. and Mishra, M. N. *On the lower bound of the number of real roots of a random algebraic equation with infinite variance*. II, 557.

G. TOPOLOGY

22. Topological Groups, Lie Groups

*Argabright, L. N. *On the mean value of a weakly almost periodic function*, 315.

Armacost, D. L. and Armacost, W. L. *On Q -dense and densely divisible LCA groups*, 301.

Backhouse, N. B. and Bradley, C. J. *Projective representations of abelian groups*, 260.

Graham, Colin C. *Compact independent sets and Haar measure*, 578.

Schochetman, I. *Kernels of representations and group extensions*, 564.

Sundaresan, K. and Day, Peter W. *Regularity of group valued Baire and Borel measures*, 609.

54. General Topology

Banilower, H. *Simultaneous extensions from discrete subspaces*, 451.

Franklin, S. P. and Walker, R. C. *Normality of powers implies compactness*, 295.

Fuller, R. V. *Condition for a function space to be locally compact*, 615.

Hass, Dennis C. *The ends of product manifolds*, 267.

Keynes, Harvey B. *Disjointness in transformation groups*, 253.

Klassen, Vyron M. *Complexes with the disappearing closed set property*, 583.

Noble, N. *Two examples on preimages of metric spaces*, 586.

Reed, G. M. *Concerning completable Moore spaces*, 591.

Thornton, Melvin C. *Characterizing topologies by functions*, 613.

*Waterhouse, William C. *An empty inverse limit*, 618.

Weller, Glenn P. *The intersection multiplicity of compact n -dimensional metric spaces*, 293.

West, James E. *The subcontinua of a dendron form a Hilbert cube factor*, 603.

55. Algebraic Topology

Gottlieb, Daniel Henry. *Homology tangent bundles and universal bundles*, 246.

Handel, David. *The diagonal fibration, H -spaces, and duality*, 275.

Lee, Ming-Jung. *Homotopy for functors*, 571.

Weller, Glenn P. *The intersection multiplicity of compact n -dimensional metric spaces*, 293.

57. Manifolds and Cell Complexes

Anderson, E. H. *Self-universal crumpled cubes and a dogbone space*, 280.

Bryant, J. L. *An example of a wild $(n-1)$ sphere in S^n in which each 2-complex is tame*, 283.

Gottlieb, Daniel Henry. *Homology tangent bundles and universal bundles*, 246.

Hass, Dennis C. *The ends of product manifolds*, 267.

Klassen, Vyron M. *Complexes with the disappearing closed set property*, 583.

Samelson, Hans. *Note on vector fields in manifolds*, 272.

Schultz, Reinhard. *Circle actions on homotopy spheres bounding plumbing manifolds*, 297.

Weller, Glenn P. *The intersection multiplicity of compact n -dimensional metric spaces*, 293.

West, James E. *The subcontinua of a dendron form a Hilbert cube factor*, 603.

58. Global Analysis, Analysis on Manifolds

Aron, Richard and Cima, Joseph A. *A theorem on holomorphic mappings into Banach spaces with basis*, 289.

Block, Louis and Franke, John. *A classification of the structurally stable contracting endomorphisms of S^1* , 597.

Sigmund, Karl. *On mixing measures for Axiom A diffeomorphisms*, 497.

PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9939

Proceedings of the American Mathematical Society

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. The maximum length of an acceptable paper is about 8 printed pages. Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.

SHORTER NOTES. Very short notes not to exceed 1 printed page of an unusual nature are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

PREPARATION OF THE MANUSCRIPT. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary. Submission of two copies of the manuscript is helpful, but by no means necessary.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to your paper, but placed before the first footnote, there should be first the AMS (MOS) *subject classification numbers* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to Mathematical Reviews, Index to Volume 39 (June 1970). See the June 1970 Notices for more details, as well as illustrative examples.

SUBMISSION OF MANUSCRIPTS, REPRINTS AND ADDRESS CHANGES. See the last page of this issue.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

CONTENTS*

Vol. 36, No. 1

NOVEMBER 1972

Whole No. 161

	Page
A. ALGEBRA AND NUMBER THEORY	
The diophantine approximation of certain continued fractions. By CHARLES F. OSGOOD	1
Intersection theory in an equicharacteristic regular local ring and the relative intersection theory. By JAMES HORNELL	8
Consistency of linear inequalities over sets. By ABRAHAM BERMAN	13
A problem connected with the zeros of Riemann's zeta function. By P. B. BRAUN and A. ZULAUF	18
The completion of a ring with a valuation. By HELEN E. ADAMS	21
On the complete integral closure of a domain. By PAUL HILL	26
On recognising certain one relation presentations. By JAMES MCCOOL and ALFRED PIETROWSKI	31
On the congruence lattices of unary algebras. By JOEL BERMAN	34
Classical quotient rings of PWD's. By ROBERT GORDON	39
Class number in constant extensions of function fields. By JAMES R. C. LEITZEL	47
On the stable crossing number of cubes. By PAUL C. KAINEN	55
Orthomodularity and the direct sum of division subrings of the quaternions. By RONALD P. MORASH	63
Regular pure projective modules. By DAVID J. FIELDHOUSE	69
Join-principal elements in Noether lattices. By E. W. JOHNSON and J. P. LEDIAEV	73
Rank three affine planes. By MICHAEL J. KALLAHER	79
On the lattice of subalgebras of a Boolean algebra. By G. GRÄTZER, K. M. KOH and M. MAKKI	87
A note on integral closure. By JUDITH SALLY	93
B. ANALYSIS	
Contractive projections in continuous function spaces. By KARL LINDBERG	97
Infinite matrices and invariant means. By PAUL SCHAEFER	104
Fixed point theorems for lipschitzian pseudo-contractive mappings. By JUAN A. GATICA and W. A. KIRK	111
Two consequences of the Beurling-Malliavin theory. By RAY REDHEFFER	116
On the coefficients of functions with bounded boundary rotation. By D. K. THOMAS	123
Uniqueness of solutions of the Dirichlet problem for singular ultrahyperbolic equations. By EUTIQVIO C. YOUNG	130
Generating classes of perfect Banach sequence spaces. By G. CROFTS	137
An equiconvergence theorem for a pair of second order differential equations. By BIKAN BHAGAT	144
A generalization of Peano's existence theorem and flow invariance. By MICHAEL G. CRANDALL	151
A condition for analytic structure. By RICHARD F. BASENER	156
On the Müntz-Szász theorem for $C[0, 1]$. By ALAN R. SIEGEL	161
On a general Tauberian theorem. By T. T. MOH	167
The isometries of $H^\infty(K)$. By MICHAEL CAMBERN	173
On measures associated to superharmonic functions. By Ü. KURAN	179
Analytic solutions of a neutral differential equation near a singular point. By L. J. GRIMM	187
On oscillation of complex linear differential systems. By DONALD F. ST. MARY	191
On the mean modulus of trigonometric polynomials and a conjecture of S. Chowla. By J. CHIDAMBARASWAMY	195
On the regularity of measures on locally compact spaces. By MARK LEVIN and WILBUR STILES	201
A note on maximal inequalities. By Wo-SANG YOUNG	207

* The volume indexes contain a mapping showing the correspondence between sections A-G and the AMS (MOS) subject classification numbers.

G. TOPOLOGY

Kernels of representations and group extensions. By I. SCHOCHETMAN.....	564
Homotopy for functors. By MING-JUNG LEE.....	571
Compact independent sets and Haar measure. By COLIN C. GRAHAM.....	578
Complexes with the disappearing closed set property. By VYRON M. KLASSEN ..	583
Two examples on preimages of metric spaces. By N. NOBLE.....	586
Concerning completable Moore spaces. By G. M. REED.....	591
A classification of the structurally stable contracting endomorphisms of S^1 . By LOUIS BLOCK and JOHN FRANKE.....	597
The subcontinua of a dendron form a Hilbert cube factor. By JAMES E. WEST ..	603
Regularity of group valued Baire and Borel measures. By K. SUNDARESAN and PETER W. DAY.....	609
Characterizing topologies by functions. By MELVIN C. THORNTON.....	613
Condition for a function space to be locally compact. By R. V. FULLER.....	615

SHORTER NOTES

An empty inverse limit. By WILLIAM C. WATERHOUSE.....	618
$\Lambda(p)$ sets and Sidon sets. By SAMUEL E. EBENSTEIN.....	619
AMS (MOS) Major Subject Headings (1970).....	621
Index to Volume 36.....	623

C. APPLIED MATHEMATICS

An approximation theorem for infinite games. By MICHAEL ORKIN	212
---	-----

D. GEOMETRY

An a priori estimate for the Gauss curvature of nonparametric surfaces of constant mean curvature. By JOEL SPRUCK	217
Separation by cylindrical surfaces. By STEVEN R. LAY	224
Valentine's extensions of Tietze's theorem on convex sets. By NICK M. STAVRAKAS and R. E. JAMISON	229

E. LOGIC AND FOUNDATIONS

Some undecidable problems in group theory. By GEORGE S. SACERDOTE	231
Nonrecursive relations among the isols. By ERIK ELLENTUCK	239

G. TOPOLOGY

Homology tangent bundles and universal bundles. By DANIEL HENRY GOTTLIEB..	246
Disjointness in transformation groups. By HARVEY B. KEYNES	253
Projective representations of abelian groups. By N. B. BACKHOUSE and C. J. BRADLEY	260
The ends of product manifolds. By DENNIS C. HASS	267
Note on vector fields in manifolds. By HANS SAMELSON	272
The diagonal fibration, H -spaces, and duality. By DAVID HANDEL	275
Self-universal crumpled cubes and a dogbone space. By E. H. ANDERSON.....	280
An example of a wild $(n-1)$ -sphere in S^n in which each 2-complex is tame. By J. L. BRYANT	283
A theorem on holomorphic mappings into Banach spaces with basis. By RICHARD ARON and JOSEPH A. CIMA	289
The intersection multiplicity of compact n -dimensional metric spaces. By GLENN P. WELLER	293
Normality of powers implies compactness. By S. P. FRANKLIN and R. C. WALKER.	295
Circle actions on homotopy spheres bounding plumbing manifolds. By REINHARD SCHULTZ.....	297
On Q -dense and densely divisible LCA groups. By D. L. ARMACOST and W. L. ARMACOST	301

SHORTER NOTES

Projections of Banach spaces. By ALBERT WILANSKY	306
An elementary proof of Steinhaus's theorem. By KARL STROMBERG	308
Some operator monotone functions. By GERT K. PEDERSEN.....	309
The operator equation $THT=K$. By GERT K. PEDERSEN and MASAMICHI TAKESAKI	311
The existence of a solution of $f(x)=kx$ for a continuous not necessarily linear operator. By S. VENKATESWARAN.....	313
On the mean value of a weakly almost periodic function. By L. N. ARGABRIGHT..	315

Vol. 36, No. 2

DECEMBER 1972

Whole No. 162

Page

A. ALGEBRA AND NUMBER THEORY

Noncancellative congruences on N -semigroups. By ROBERT P. DICKINSON, JR. ..	317
Nonnegative matrices whose inverses are M -matrices. By THOMAS L. MARKHAM..	326
Some homological results on certain finite ring extensions. By R. RAPHAEL	331
Embedding of modules over Gorenstein rings. By HANS-BJØRN FOXBY	336
The existence of certain ultrafilters on N and a conjecture of Graham and Rothschild. By NEIL HINDMAN.....	341
Quartics over $GF(2^n)$. By PHILIP A. LEONARD and KENNETH S. WILLIAMS.....	347
Automorphisms and derivations of incidence algebras. By KENNETH BACLAWSKI	351
Primitive group rings. By EDWARD FORMANEK and ROBERT L. SNIDER	357
An internal characterization of the prime radical of a Jordan algebra. By CHESTER TSAI.....	361

A theory of grade for commutative rings. By S. FLOYD BARGER	365
A splitting theorem for algebras over commutative von Neumann regular rings. By WILLIAM C. BROWN	369
Endomorphism rings of reduced complete torsion-free modules over complete discrete valuation rings. By WOLFGANG LIEBERT	375
Certain m.o.i.s. as groups. By JUDITH Q. LONGYEAR	379
Completely cyclic injective semilattices. By C. S. JOHNSON, JR. and F. R. MCMORRIS	385
A role for doubly stochastic matrices in graph theory. By D. J. HARTFIEL and J. W. SPELLMANN	389
Sequences not containing an infinite arithmetic progression. By SAMUEL S. WAGSTAFF, JR.	395

B. ANALYSIS

Compactness in topological tensor products and operator spaces. By J. R. HOLUB	398
Existence theorems for sum and product integrals. By JON C. HELTON	407
Matrix summability in amenable semigroups. By PETER F. MAH	414
Coreflexive and somewhat reflexive Banach spaces. By JAMES R. CLARK	421
The p -classes of a Hilbert module. By JAMES F. SMITH	428
A planar face on the unit sphere of the multiplier space M_p , $1 < p < \infty$. By CHARLES FEFFERMAN and HAROLD S. SHAPIRO	435
A characterization of Hilbert modules. By GEORGE R. GJELLIS	440
On a geometric condition related to boundedly complete bases and normal struc- ture in Banach spaces. By P. CASAZZA	443
A new characterization of separable GCR-algebras. By TROND DIGERNES	448
Simultaneous extensions from discrete subspaces. By H. BANILOWER	451
On the individual ergodic theorem for positive operators. By RYOTARO SATO ...	456
Periodic solutions of small period of systems of n th order differential equations. By KLAUS SCHMITT	459
Approximation by rational functions on Riemann surfaces. By M. GOLDSTEIN and J. L. WALSH	464
A variational problem for submanifolds of Euclidean space. By JOSEPH A. ERBACHER	467
On the continuity of best polynomial approximations. By S. J. POREDA	471
On a class of close-to-convex functions. By H. SILVERMAN	477
Differentiation of interval functions. By GUNNAR SCHRÖDER	485
A differential equation of Lurie type. By T. A. BURTON	491
On mixing measures for Axiom A diffeomorphisms. By KARL SIGMUND	497
On certain convolution inequalities. By LARS INGE HEDBERG	505
Spectral radius of an absolutely continuous operator. By ARNOLD LEBOW	511
Maximal weak-* Dirichlet algebras. By PAUL S. MUHLY	515
Kronecker sets and metric properties of M_0 -sets. By ROBERT KAUFMAN	519
Time dependent nonlinear Cauchy problems in Banach spaces. By W. E. FITZ- GIBBON	525
Toeplitz operators and differential equations on a half-line. By J. W. MOELLER	531
A new proof of a theorem on quasitriangular operators. By GLENN R. LUECKE	535

D. GEOMETRY

Selection of representing measures for inner parts. By PETER D. TAYLOR	537
A symmetric star body that tiles but not as a lattice. By SHERMAN K. STEIN	543

E. LOGIC AND FOUNDATIONS

Universal regressive isols. By JOSEPH BARBACK	549
---	-----

F. STATISTICS AND PROBABILITY

An extremal property of independent random variables. By STEVEN ROSENCRANS and STANLEY SAWYER	552
On the lower bound of the number of real roots of a random algebraic equation with infinite variance. II. By G. SAMAL and M. N. MISHRA	557

0002-9939(197201/02)36:1/2;1-2
