## AMS (MOS) MAJOR SUBJECT HEADINGS (1970)

The letters in parentheses indicate groupings which are used in the table of contents of each issue and in the volume index.

00 (H) General
01 (H) History and Biography
02 (E) Logic and Foundations
04 (E) Set Theory
05 (A) Combinatorics
06 (A) Order, Lattices, Ordered Algebraic Structures
08 (A) General Mathematical Systems
10 (A) Number Theory
12 (A) Algebraic Number Theory, Field Theory and Polynomials
13 (A) Commutative Rings and Algebras
14 (A) Algebraic Geometry
15 (A) Linear and Multilinear Algebra, Matrix Theory (finite and infinite)
16 (A) Associative Rings and Algebras
17 (A) Nonassociative Rings and Algebras
18 (A) Category Theory, Homological Algebra
20 (A) Group Theory and Generalizations
(G) Topological Groups, Lie Groups
26 (B) Real Functions
28 (B) Measure and Integration
30 (B) Functions of a Complex Variable
31 (B) Potential Theory
32 (B) Several Complex Variables and Analytic Spaces
33 (B) Special Functions
34 (B) Ordinary Differential Equations
35 (B) Partial Differential Equations
39 (B) Finite Differences and Functional Equations
40 (B) Sequences, Series, Summability
41 (B) Approximations and Expansions
42 (B) Fourier Analysis
43 (B) Abstract Harmonic Analysis

44 (B) Integral Transforms, Operational Calculus
45 (B) Integral Equations
46 (B) Functional Analysis
47 (B) Operator Theory
49 (B) Calculus of Variations and Optimal Control
50 (D) Geometry
52 (D) Convex Sets and Geometric Inequalities
(D) Differential Geometry
(G) General Topology
(G) Algebraic Topology
(G) Manifolds and Cell Complexes
(G) Global Analysis, Analysis on Manifolds
60 (F) Probability Theory and Stochastic Processes
62 (F) Statistics
65 (C) Numerical Analysis
68 (C) Computer Science
70 (C) Mechanics of Particles and Systems
(C) Mechanics of Solids
(C) Fluid Mechanics

78 (C) Optics, Electromagnetic Theory
80 (C) Classical Thermodynamics, Heat Transfer
(C) Quantum Mechanics

82 (C) Statistical Physics, Structure of Matter
83 (C) Relativity
85 (C) Astronomy and Astrophysics
86 (C) Geophysics
90 (C) Economics, Operations Research, Programming, Games
92 (C) Biology and Behavioral Sciences
83 (C) Systems, Control
94 (C) Information and Communication, Circuits, Automata
96 (H) Mathematical Education, Elementary
97 (H) Mathematical Education, Secondary
98 (H) Mathematical Education, Collegiate

# INDEX TO VOLUME 37 

## SUBJECT INDEX

*Starred items are "Shorter Notes"

## A. Algebra and Number Theory

## 05. Combinatoric

Howard, F. T. Formulas for the number of binomial coefficients divisible by a fixed power of a prime, 358.
*O'Neil, P. V. A short proof of Mac Lane's planarity theorem, 619.
Parker, E. T. Edge coloring numbers of some regular graphs, 423.
06. Order, Lattices, Ordered Algebraic Structures

Hung, H. H. The amalgamation property for G-metric spaces, 53.
Lakser, Harry. Principal congruences of pseudocomplemented distributive lattices, 32.

Reynolds, William H. A note on embedding a partially ordered ring in a division algebra, 37.
Rival, Ivan. Maximal sublattices of finite distributive lattices, 417.
08. General Mathematical Systems

Hung, H. H. The amalgamation property for G-metric spaces, 53.
10. Number Theory

Berndt, Bruce C. A new proof of the functional equation of Dirichlet L-functions, 355.

Brown, Ezra. Biquadratic reciprocity laws, 374.
Evans, Ronald J. Modular forms on Hecke's modular groups, 411.
Suryanarayana, D. and Rao, R. Sita Rama Chandra. Distribution of semi-k-free integers, 340.
12. Algebraic Number Theory, Field Theory and Polynomials

Rosenlicht, Maxwell. An analogue of L'Hospital's rule, 369.
13. Commutative Rings and Algebras

Alamelu, S. On commutativity of endomorphism rings of ideals, 29.
Arnold, J. T. and Brewer, J. W. When $(D[[X]])_{P[[x]]}$ is a valuation ring, 326.
Cowsik, R. C. On a question of M. Hochster, 75.
Gersten, S. M. K $K_{3}$ of a ring is $\mathrm{H}_{3}$ of the Steinberg group, 366.
Kuku, Aderemi O. Some algebraic $K$-theoretic applications of the LF and NF functors, 363.
Pomfret, J. Similarity of matrices over finite rings, 421.
Roberts, Leslie G. An example of a Hilbert ring with maximal ideals of different height, 425.
14. Algebraic Geometry

Eklof, Paul C. Lefschetz's principle and local functors, 333.
Ogus, Arthur. Zariski's theorem on several linear systems, 59.
15. Linear and Multilinear Algebra; Matrix Theory (finite and infinite)

Chung, I. Y. Direct decomposition of tensor products into subtensor products, 1. de Oliveira, G. N. Matrices with prescribed entries and eigenvalues. I, 381. Pomfret, J. Similarity of matrices over finite rings, 421.

## 16. Associative Rings and Algebras

Chacron, M. and Chacron, J. Rings with involution all of whose symmetric elements are nilpotent or regular, 397.
Gersten, S. M. $K_{3}$ of a ring is $H_{3}$ of the Steinberg group, 366.
Michler, Gerhard O. The kernel of a block of a group algebra, 47.
Wehlen, Joseph A. Triangular matrix algebras over Hensel rings, 69.
18. Category Theory, Homological Algebra

Barr, Michael. Embedding of categories, 42.
Gersten, S. M. $K_{3}$ of a ring is $H_{3}$ of the Steinberg group, 366.
Kuku, Aderemi O. Some algebraic K-theoretic applications of the LF and NF functors, 363.
20. Group Theory and Generalizations

Alperin, J. and Janusz, G. Resolutions and periodicity, 403.
Berger, T. R. Hall-Higman type theorems. IV, 317.
Boler, James and Evans, Benny. The free product of residually finite groups amalgamated along retracts is residually finite, 50.
Groves, J. R. J. On direct products of regular p-groups, 377.
Herzog, Marcel. On Sylow intersections, 352.
Karrass, A. and Solitar, D. On finitely generated subgroups which are of finite index in generalized free products, 22.
Lady, E. L. Countable torsion products of abelian p-groups, 10.
Lorimer, Peter. A property of the groups $P \Gamma L(m, q), q \geqq 5,393$.
Nico, William R. A property of projective ideals in semigroup algebras, 407.
Pomfret, J. Similarity of matrices over finite rings, 421.
Ribes, Luis. Amalgamated products of profinite groups: Counterexamples, 413.
Sehgal, Surinder K. Generalized projectors and Carter subgroups of finite groups, 347.

Tang, C. Y. On the Frattini subgroups of certain generalized free products of groups, 63.
Walker, Elbert A. Ulm's theorem for totally projective groups, 387.
Warne, R. J. On the structure of idempotent semigroups, 17.

## B. Analysis

26. Real Functions

Adams, David R. and Polking, John C. The equivalence of two definitions of capacity, 529.
Fadell, Albert. On the existence of regular approximate differentials, 541.
Helton, Jon C. Some interdependencies of sum and product integrals, 201.
Seeley, Robert T. Addendum to "Extension of $C^{\infty}$ functions defined in a half space", 622.
Wilkins, J. Ernest, Jr. Bounds for the variational ratio of arbitrary linear systems, 128.
28. Measure and Integration

Breckenridge, J. C. The significant cylindrical condition and a Hausdorff rectifiable set, 549.
Ridge, William C. Spectrum of a composition operator, 121.
Snell, Roy C. The range of invariant means on locally compact groups and semigroups, 441.
30. Functions of a Complex Variable

Behan, Donald F. Commuting analytic functions without fixed points, 114.
Gaier, Dieter. A note on Hall's lemma, 97.
*Globevnik, J. and Vidav, I. A note on normal-operator-valued analytic functions, 617.

Gresser, John T. The compactness of the set of arc cluster sets of an arbitrary function, 195.
Herrero, Domingo A. Mean growth of inner functions, 175.
Metzger, Thomas A. On polynomial approximation in $A_{\theta}(D), 468$.
Miller, Sanford S., Mocanu, Petru and Reade, Maxwell O. All $\alpha$-convex functions are univalent and starlike, 553.
Näkki, Raimo and Palka, Bruce. Uniform equicontinuity of quasiconformal mappings, 427.
Ow, Wellington H. PD-minimal solutions of $\Delta u=P u$ on open Riemann surfaces, 85.

Shaffer, Dorothy Browne. On bounds for the derivative of analytic functions, 517.
Sibner, R. J. An elementary proof of a theorem concerning infinitely connected domains, 459.
Styer, D. and Wright, D. On the valence of the sum of two convex functions, 511.

## 31. Potential Theory

Adams, David R. and Polking, John C. The equivalence of two definitions of capacity, 529.
Davis, Burgess. An inequality for the distribution of the Brownian gradient function, 189.

McCoy, Peter A. Value distribution of potentials in three real variables, 471.
Ow, Wellington H. PD-minimal solutions of $\Delta u=P u$ on open Riemann surfaces, 85.
32. Several Complex Variables and Analytic Spaces

Chen, Su-shing. On a class of quasiconformal functions in Banach spaces, 545. Gilman, Jane. Compact Riemann surfaces with conformal involutions, 105.

## 34. Ordinary Differential Equations

Bownds, J. M. and Diaz, J. B. On restricted uniqueness for systems of ordinary differential equations, 100.
Brown, R. C. and Krall, Allan M. Adjoints of multipoint-integral boundary value problems, 213.
Dickey, R. W. A quasilinear evolution equation and the method of Galerkin, 149.

George, J. H. and York, R. J. Application of Liapunov theory to boundary value problems. II, 207.

## 35. Partial Differential Equations

Ballou, Donald P. Weak solutions with unbounded variation, 181.
Diederich, J. R. Weyl's lemina for pointwise solutions of elliptic equations, 476.
Swanson, C. A. A comparison theorem for eigenfunctions, 537.
*Uhlenbeck, K. A new proof of a regularity theorem for elliptic systems, 315.
40. Sequences, Series, Summability

Atalla, Robert E. Regular matrices and P-sets in $\beta N \backslash N, 157$.
42. Fourier Analysis

Blei, Ron C. On subsets with associated compacta in discrete abelian groups, 453.
43. Abstract Harmonic Analysis

Miller, John J. H. and Simms, D. J. On the coefficients of an asymptotic expansion of spherical functions on symmetric spaces, 448.
Mueller-Roemer, Peter R. A tauberian group algebra, 163.
44. Integral Transforms, Operational Calculus

McCoy, Peter A. Value distribution of potentials in three real variables, 471.

## 45. Integral Equations <br> Sours, Richard E. Absolutely continuous component of a class of integral operators, 521.

46. Functional Analysis

Behncke, H. Nilpotent elements in Banach algebras, 137.
Busby, Robert C. On the equivalence of twisted group algebras and Banach *-algebraic bundles, 142.
Clancey, Kevin. Invariant subspaces of infinite codimension for some nonnormal operators, 525.
Cochran, Allan C. Inductive limits of A-convex algebras, 489.
Davis, William J. and Johnson, William B. A renorming of nonreflexive Banach spaces, 486.
Eifler, Larry Q. Inverting sets for function algebras, 96.
Howard, Joe. Mackey compactness in Banach spaces, 108.
Johnson, Gordon G. Inner products characterized by difference equations, 535.
Loy, R. J. Continuity of higher derivations, 505.
McCharen, Edith A. A new topology on $B^{*}$-algebras arising from the Arens products, 77.
——. A characterization of dual $B^{*}$-algebras, 84.
Mueller-Roemer, Peter R. A tauberian group algebra, 163.
Randtke, Daniel J. A simple example of a universal Schwartz space, 185.
Shields, Paul C. Weakly compact positive operators on summable functions, 456.
Sidney, S. J. A note on enveloped measures, 167.
Terzioğlu, T. Smooth sequence spaces and associated nuclearity, 497.
Wong, Pak-Ken. On the Arens product and commutative Banach algebras, 111.
Woods, Paul Carlton. Markuschevich bases and semireflexivity, 217.
47. Operator Theory

Clancey, Kevin. Invariant subspaces of infinite codimension for some nonnormal operators, 525.
Crandall, Michael G. A generalized domain for semigroup generators, 434.
Hochstadt, Harry. One dimensional perturbations of compact operators, 465.
Loy, R. J. Continuity of higher derivations, 505.
Okazawa, Noboru. Perturbations of linear M-accretive operators, 169.
Randtke, Daniel J. Representation theorems for compact operators, 481.
Ridge, William C. Spectrum of a composition operator, 121.
Shields, Paul C. Weakly compact positive operators on summable functions, 456.
Sours, Richard E. Absolutely continuous component of a class of integral operators, 521.
49. Calculus of Variations and Optimal Control

Silverman, Edward. A necessary condition in the calculus of variations, 462.

## C. Applied Mathematics

68. Computer Science

Young, Paul. Easy constructions in complexity theory: Gap and speed-up theorems, 555.

## D. Geometry

50. Geometry

Lorimer, Peter. A property of the groups $P \Gamma L(m, q), q \geqq 5,393$.
52. Convex Sets and Geometric Inequalities

Loveland, L. D. and Valentine, J. E. Convex metric spaces with 0-dimensional midsets, 568.

## 53. Differential Geometry

Chen, Bang-yen. A characterization of standard flat tori, 564.
Gordon, William B. An analytical criterion for the completeness of riemannian manifolds, 221.

## E. Logic and Foundations

2. Logic and Foundations

Blass, Andreas. Determinateness and continuity, 572.
Eklof, Paul C. Lefschetz's principle and local functors, 333.
Young, Paul. Easy constructions in complexity theory: Gap and speed-up theorems 555.

## F. Statistics and Probability

60. Probability Theory and Stochastic Processes

Davis, Burgess. An inequality for the distribution of the Brownian gradient function, 189.

Hanson, D. L. and Wright, F. T. A theorem about the oscillation of sums of independent random variables, 226.
Lange, Kenneth. Decompositions of substochastic transition functions, 575.
Rogge, Lothar. The convergence determining class of regular open sets, 581.

## G. Topology

22. Topological Groups, Lie Groups

Lee, D. H. On the homomorphisms of locally compact groups, 246.
Snell, Roy C. The range of invariant means on locally compact groups and semigroups, 441.
54. General Topology

Chimenti, Frank A. Tychonoff's theorem for hyperspaces, 281.
Choe, Tae Ho. Injective compact distributive lattices, 241.
Friedler, Louis. Quotients of proximity spaces, 589.
Fuller, R. V. A characterization of local compactness, 615.
Gazik, R. J. A hyperspace for convergence spaces, 234.
Hindman, Neil. Preimages of points under the natural map from $\beta(N \times N)$ to $\beta N \times \beta N, 603$.
Hung, H. H. The annalgamation property for G-metric spaces, 53.
Loveland, L. D. and Valentine, J. E. Convex metric spaces with 0-dimensional midsets, 568.
Michael, E. and Nagami, K. Compact-covering images of metric spaces, 260.
Slaughter, F. G., Jr. The closed image of a metrizable space is $M_{1}, 309$.

## 55. Algebraic Topology

Boler, James and Evans, Benny. The free product of residually finite groups amalgamated along retracts is residually finite, 50.
Chapman, T. A. Locally-trivial bundles and microbundles with infinite-dimensional fibers, 595.
Hardie, K. A. On composite loop functors, 586.
Heil, Wolfgang. 3-manifolds that are sums of solid tori and Seifert fiber spaces, 609.

Wood, John C. A theorem on injectivity of the cup product, 301.

## 57. Manifolds and Cell Complexes

Brown, Robert F. The real cohomology of compact disconnected Lie groups, 255. Dieffenbach, Robert M. Homotopic PL n-balls are isotopic, 271.

Heil, Wolfgang. 3-manifolds that are sums of solid tori and Seifert fiber spaces, 609.

Narvarte, J. A. A model for closed orientable 3-manifolds of genus 1, 287.
Porter, Richard D. An H-space with finite dimensional homology whose loop space has torsion, 291.
Schochet, Claude. On the bordism ring of complex projective space, 267.
Wright, Perrin. Formal 3-deformations of 2-polyhedra, 305.
58. Global Analysis, Analysis on Manifolds

Franks, John. Absolutely structurally stable diffeomorphisms, 293.
Gordon, William B. Analytical criterion for the completeness of riemannian manifolds, 221.
Plante, J. F. Homology of closed orbits of Anosov flows, 297.

## Proceedings of the American Mathematical Society

This Journal is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. The maximum length of an acceptable paper is about 8 printed pages. Since a page of the Procerdings contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.
Shorter notes. Very short notes not to exceed 1 printed page of an unusual nature are also accepted, and appear under the heading Shorter Notes. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the Shorter Notes department.
Preparation of the manuscript. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary. Submission of two copies of the manuscript is helpful, but by no means necessary.
Form of manuscript. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to your paper, but placed before the first footnote, there should be first the AMS (MOS) subject classification numbers representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to Mathematical Reviews, Index to Volume 39 (June 1970). See the June 1970 Notices for more details, as well as illustrative examples.
Submission of manuscripts, Reprints and Address changes. See the last page of this issue.
Galley proof. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.
Backlog: None. Two-thirds of the papers currently being received by the editors will be published in 8-10 months.
(6) The paper used in this book is acid-free and falls within the guidelines
estahlished to ensure permanence and durability.

# PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY CONTENTS* 

Vol. 37, No. 1 JANUARY 1973 Whole No. 163
Page
A. Algebra and Number Theory
Direct decomposition of tensor products into subtensor products. By I. Y. Chung ..... 1
Countable torsion products of abelian p-groups. By E. L. LaDY ..... 10
On the structure of idempotent semigroups. By R. J. Warne ..... 17
On finitely generated subgroups which are of finite index in generalized free prod- ucts. By A. Karrass and D. Solitar ..... 22
On commutativity of endomorphism rings of ideals. By S. Alamelu. ..... 29
Principal congruences of pseudocomplemented distributive lattices. By Harry Lakser ..... 32
A note on embedding a partially ordered ring in a division algebra. By William H. Reynolds ..... 37
Embedding of categories. By Mrchael Barr ..... 42
The kernel of a block of a group albegra. By Gerhard O. Michler ..... 47
The free product of residually finite groups amalgamated along retracts is residu- ally finite. By James Boler and Benny Evans ..... 50
The amalgamation property for G-metric spaces. By H. H. Hung ..... 53
Zariski's theorem on several linear systems. By Arthur Ogus ..... 59
On the Frattini subgroups of certain generalized free products of groups. By C. Y. TANG. ..... 63
Triangular matrix algebras over Hensel rings. By Joseph A. Wehlen ..... 69
On a question of M. Hochster. By R. C. Cowsik ..... 75
B. Analysis
A new topology on $B^{*}$-algebras arising from the Arens products. By Edith A. McCharen ..... 77
A characterization of dual $B^{*}$-algebras. By Edith A. McCharen ..... 84
$P D$-minimal solutions of $\Delta u=P u$ on open Riemann surfaces. By Wellington H. Ow ..... 85
Inverting sets for function algebras. By Larry Q. Eifler ..... 92
A note on Hall's lemma. By Dieter Gaier ..... 97
On restricted uniqueness for systems of ordinary differential equations. By J. M. Bownds and J. B. Diaz ..... 100
Compact Riemann surfaces with conformal involutions. By Jane Gilman ..... 105
Mackey compactness in Banach spaces. By Joe Howard ..... 108
On the Arens product and commutative Banach algebras. By Pak-Ken Wong ..... 111
Commuting analytic functions without fixed points. By Donald F. Behan ..... 114
Spectrum of a composition operator. By William C. Ridge ..... 121
Bounds for the variational ratio of arbitrary linear systems. By J. Ernest Wilkins, JR. ..... 128
Nilpotent elements in Banach algebras. By H. Behncke ..... 137
On the equivalence of twisted group algebras and Banach *-algebraic bundles. By Robert C. Busby ..... 142
A quasi-linear evolution equation and the method of Galerkin. By R. W. Dickey. ..... 149 ..... 149

[^0]Regular matrices and $P$-sets in $\beta N \backslash N$. By R. E. Atalla ..... 157
A tauberian group algebra. By Peter R. Mueller-Roemer ..... 163
A note on enveloped measures. By S. J. Sidney ..... 167
Perturbations of linear $m$-accretive operators. By Noboru Okazawa ..... 169
Mean growth of inner functions. By Domingo A. Herrero. ..... 175
Weak solutions with unbounded variation. By Donald P. Ballou ..... 181
A simple example of a universal Schwartz space. By Daniel J. Randtike. ..... 185
An inequality for the distribution of the Brownian gradient function. By Burgess Davis ..... 189
The compactness of the set of arc cluster sets of an arbitrary function. By John T. Gresser ..... 195
Some interdependencies of sum and product integrals. By Jon C. Helton ..... 201
Application of Liapunov theory to boundary value problems. II. By J. H. George and R. J. York. ..... 207
Adjoints of multipoint-integral boundary value problems. By R. C. Brown and Allan M. Krall ..... 213
Markuschevich bases and semireflexivity. By Paul Carlton Woods ..... 217
D. Geometry
An analytical criterion for the completeness of riemannian manifolds. By William B. Gordon ..... 221
F. Statistics and Probability
A theorem about the oscillation of sums of independent random variables. By D. L. Hanson and F. T. Wright ..... 226
G. Topology
A hyperspace for convergence spaces. By R. J. Gazik ..... 234
Injective compact distributive lattices. By Tae Ho Choe. ..... 241
On the homomorphisms of locally compact groups. By D. H. Lee. ..... 246
The real cohomology of compact disconnected Lie groups. By Robert F. Brown ..... 255
Compact-covering images of metric spaces. By E. Michael and K. Nagami ..... 260 ..... 260
On the bordism ring of complex projective space. By Claude Schochet ..... 267
Homotopic PL $n$-balls are isotopic. By Robert M. Dieffenbach ..... 271
Tychonoff's theorem for hyperspaces. By Frank A. Chimenti ..... 281
A model for closed orientable 3-manifolds of genus 1. By J. A. Narvarte ..... 287
An $\boldsymbol{H}$-space with finite dimensional homology whose loop space has torsion. By Richard D. Porter. ..... 291
Absolutely structurally stable diffeomorphisms. By John Franks. ..... 293
Homology of closed orbits of Anosov flows. By J. F. Plante ..... 297
A theorem on injectivity of the cup product. By John C. Wood. ..... 301
Formal 3-deformations of 2-polyhedra. By Perrin Wright. ..... 305
The closed image of a metrizable space is $M_{1}$. By F. G. Slaughter, Jr. ..... 309
Shorter Notes
A new proof of a regularity theorem for elliptic systems. By K. Uhlenbeck ..... 315
Vol. 37, No. 2 FEBRUARY 1973 Whole No. 164
Page
A. Algebra and Number Theory
Hall-Higman type theorems. IV. By T. R. Berger ..... 317
When $(D[[X]])_{P[[x]]}$ is a valuation ring. By J. T. Arnold and J. W. Brewer ..... 326
Lefschetz's principle and local functors. By Paul C. Eklof ..... 333
Distribution of semi- $k$-free integers. By D. Suryanarayana and R. Sita Rama Chandra Rao ..... 340
Generalized projectors and Carter subgroups of finite groups. By Surinder K. Sehgal ..... 347
On Sylow intersections. By Marcel Herzog ..... 352
A new proof of the functional equation of Dirichlet $L$-functions. By Bruce $\mathbf{C}$. Berndt ..... 355
Formulas for the number of binomial coefficients divisible by a fixed power of a prime. By F. T. Howard ..... 358
Some algebraic $K$-theoretic applications of the LF and NF functors. By Aderemi O. KUKU ..... 363
$K_{3}$ of a ring is $H_{3}$ of the Steinberg group. By S. M. Gersten ..... 366
An analogue of L'Hospital's rule. By Maxwell Rosenlicht ..... 369
Biquadratic reciprocity laws. By Ezra Brown ..... 374
On direct products of regular p-groups. By J. R. J. Groves ..... 377
Matrices with prescribed entries and eigenvalues. I. By G. N. de Oliveira ..... 380
Ulm's theorem for totally projective groups. By Elbert A. Walker ..... 387
A property of the groups $P \Gamma L(m, q), q \geqq 5$. By Peter Lorimer ..... 393
Rings with involution all of whose symmetric elements are nilpotent or regular. By J. Chacron and M. Chacron ..... 397
Resolutions and periodicity. By J. Alperin and G. Janusz ..... 403
A property of projective ideals in semigroup algebras. By William R. Nico ..... 407
Modular forms on Hecke's modular groups. By Ronald J. Evans ..... 411
Amalgamated products of profinite groups: Counterexamples. By Lus Ribes ..... 413
Maximal sublattices of finite distributive lattices. By Ivan Rival ..... 417
Similarity of matrices over finite rings. By J. Pomfret ..... 421
Edge coloring numbers of some regular graphs. By E. T. Parker ..... 423
An example of a Hilbert ring with maximal ideals of different height. By LesLIE G. Roberts ..... 425
B. Analysis
Uniform equicontinuity of quasiconformal mappings. By Raimo NäKKI and Bruce Palka ..... 427
A generalized domain for semigroup generators. By Michael G. Crandall. ..... 434
The range of invariant means on locally compact groups and semigroups. By Roy C. Snell ..... 441
On the coefficients of an asymptotic expansion of spherical functions on symmetric spaces. By John J. H. Miller and D. J. Simms ..... 448
On subsets with associated compacta in discrete abelian groups. By Ron C. Blei ..... 453
Weakly compact positive operators on summable functions. By Paul C. Shields ..... 456
An elementary proof of a theorem concerning infinitely connected domains. By R. J. Sibner ..... 459
A necessary condition in the calculus of variations. By Edward Silverman ..... 462
One dimensional perturbations of compact operators. By Harry Hochstadt ..... 465
On polynomial approximation in $A_{0}(D)$. By Thomas A. Metzger ..... 468
Value distribution of potentials in three real variables. By Peter A. McCoy ..... 471
Weyl's lemma for pointwise solutions of elliptic equations. By J. R. Diederich ..... 476
Representation theorems for compact operators. By Daniel J. Randtike ..... 481
A renorming of nonreflexive Banach spaces. By William J. Davis and William B. Johnson ..... 486
Inductive limits of $A$-convex algebras. By Allan C. Cochran ..... 489
Smooth sequence spaces and associated nuclearity. By T. Terziơ̌lu ..... 497
Continuity of higher derivations. By R. J. Loy ..... 505
On the valence of the sum of two convex functions. By D. Styer and D. Wright ..... 511
On bounds for the derivative of analytic functions. By Dorothy Browne Shaffer ..... 517
Absolutely continuous component of a class of integral operators. By Richard E. Sours ..... 521
Invariant subspaces of infinite codimension for some nonnormal operators. By Kevin Clancey ..... 525
The equivalence of two definitions of capacity. By David R. Adams and John C. Polking ..... 529
Inner products characterized by difference equations. By Gordon G. Johnson ..... 535
A comparison theorem for eigenfunctions. By C. A. Swanson ..... 537
On the existence of regular approximate differentials. By Albert Fadell ..... 541
On a class of quasiconformal functions in Banach spaces. By Su-shing Chen ..... 545
The significant cylindrical condition and a Hausdorff rectifiable set. By J. C. Breckenridge ..... 549
All $\alpha$-convex functions are univalent and starlike. By Sanford S. Miller, Petru Mocanu and Maxwell O. Reade ..... 553
C. Applied Mathematics
Easy constructions in complexity theory: Gap and speed-up theorems. By Paul Young ..... 555
D. Geometry
A characterization of standard flat tori. By Bang-yen Chen ..... 564
Convex metric spaces with 0-dimensional midsets. By L. D. Loveland and J. E. Valentine ..... 568
E. Logic and Foundations
Determinateness and continuity. By Andreas Blass ..... 572
F. Statistics and Probability
Decompositions of substochastic transition functions. By Kenneth Lange ..... 575
The convergence determining class of regular open sets. By Lothar Rogge ..... 581
G. Topology
On composite loop functors. By K. A. Hardie ..... 586
Quotients of proximity spaces. By Louis Friedler ..... 589
Locally-trivial bundles and microbundles with infinite-dimensional fibers. By T. A. Chapman ..... 595
Preimages of points under the natural map from $\beta(N \times N)$ to $\beta N \times \beta N$. By Neil Hindman ..... 603
3-manifolds that are sums of solid tori and Seifert fiber spaces. By Wolfgang Heil ..... 609
A characterization of local compactness. By R. V. Fuller ..... 615
Shorter Notes
A short proof of Mac Lane's planarity theorem. By P. V. O'Neil ..... 617
A note on normal-operator-valued analytic functions. By J. Globevnik and I. Vidav ..... 619
Addendum to "Extension of $C^{\infty}$ functions defined in a half space". By Robert T. Seeley ..... 622
AMS (MOS) Major Subject Headings (1970) ..... 623
Index to Volume 37 ..... 625

0002-9939(197301/02)37:1/2;1-0

[^0]:    * The volume indexes contain a mapping showing the correspondence between sections A-G and the AMS (MOS) subject classification numbers.
