

## Graduate Student Profile

Table 6A summarizes information gathered by the 2005 Departmental Profile survey about graduate students enrolled in fall 2005. This table gives the number of full-time, full-time first-year, and part-time graduate students for each type of graduate department. These same numbers are also given for female graduate students and for U.S. citizen graduate students.

Although the estimated total number of graduate students in all mathematics groups combined increased from 12,853 in 2004 to 13,068 in 2005, the total number of full-time graduate students in Groups I, II, III, and Va combined decreased from 10,707 in 2004 to 10,565 in 2005. The number of U.S. citizen full-time graduate students in Groups I, II, III, and Va combined increased by 1% to 5,915. The number of first-year full-time students in Groups I, II, III, and Va combined decreased by 6%, from 3,004 last year to 2,832 this year (both the number of first-year U.S. citizens and the number of first-year non-U.S. citizens were down). The num-

ber of female full-time graduate students in Groups I, II, III, and Va combined decreased from 3,245 to 3,111. In Group IV the number of full-time graduate students increased by 3% to 4,310 and the number of U.S. citizen full-time graduate students decreased by 4% to 1,572. The first-year full-time graduate student enrollment in Group IV increased by 8 to 1,345, but the number of first-year full-time U.S. citizens was down from 582 to 550. The number of female full-time graduate students in Group IV decreased from 2,144 to 2,076, a 3% decrease. The percentage of full-time graduate students who are U.S. citizens in the mathematics groups combined is 59% while the percentage of full-time graduate students who are U.S. citizens in Group IV is 36%; the percentage of women is 31% in mathematics groups combined and 48% in Group IV. The number of full-time graduate students in Group M increased from 2,146 to 2,503. There is a great deal of variability in the number of full-time graduate students in Group M, even in universities that are roughly the same size, and this is reflected in the standard errors of 247 (160 last

year). The number of part-time graduate students in Groups I, II, III, and Va decreased 1% to 1,764 this year, and in Group IV increased 20% to 749. Group III has 896 (51%) of the part-time graduate students in the doctoral mathematics groups. In the doctoral mathematics groups, 38% of the part-time graduate students are females and 82% are U.S. citizens, and in Group IV 52% of the part-time graduate students are females and 73% are U.S. citizens. The number of Group M part-time graduate students increased from 1,794 to 3,181, with a standard error of 341 this year and 188 last year. For Group M, 51% of the part-time graduate students are females and 88% are U.S. citizens.

Table 6B gives the total number of full-time and full-time first-year graduate students in Groups I, II, III, and Va combined, and the percentages of women and of U.S. citizens in each category, for fall 1996 through fall 2005. From this data we can see that total full-time graduate enrollment in the doctoral mathematics groups has been generally increasing since 1999, although it is down this year. Similarly, the number of first-year full-time graduate students declined this year after steadily increasing since 1998. The number of full-time graduate students who are U.S. citizens has been increasing since 2002, and the number of non-U.S. citizens has been decreasing since 2003. The number of female full-time graduate students which had been increasing since 2002 dropped 4% this year. The percentage of females among full-time graduate students in the combined mathematics groups has remained relatively stable over the 10-year period shown.
