

Faculty Salary Survey 1994-1995 Salaries

The charts on the following pages display faculty salary data for Groups I-V, M, and B: faculty salary distribution by rank, mean salaries by rank, information on quartiles by rank, and the number of usable returns for the group.

Departments were asked to report the number of faculty whose 1995-1996 academic-year salaries fell within

given salary intervals. Reporting salary data in this fashion eliminates some of the concerns about confidentiality but does not permit determination of actual quartiles. What can be determined is the salary interval in which the quartiles occur; the salary intervals containing the quartiles are denoted by $\langle n, n+5 \rangle$.

Editor's Note

Due to an editorial oversight, two tables (for Groups V and M) were omitted from the Faculty Salary Survey as published in the December 1995 issue of the *Notices* (AMS-IMS-MAA Survey, page 1504). The entire Faculty Salary Survey section (including the missing tables) is reprinted on these pages.
