## Faculty Profile

The Departmental Profile, sent in fall 2006 to mathematical sciences departments at four-year colleges and universities as part of the Annual Survey, gathered information about faculties at these schools in fall 2006; this section presents some of that data. The 2006 First Report presented data collected earlier about faculty salaries (pages 239–44 of the February 2007 issue of the Notices of the AMS).

### Faculty Size

Table 1A gives the number of faculty for different categories of faculty broken down by survey group, Table 1B gives the same information for females only, and Table 1C gives some percentages based on the information in Tables 1A and 1B. The estimated total number of full-time faculty in the mathematics groups (Groups I, II, III, Va, M, and B combined) is 22,086, up just 183 from last year, with a standard error of 399. The doctoral mathematics departments (Groups I, II, III, and Va) are up 13 full-time faculty members, Group M is up 173 faculty members, and Group B is down 3. Given the size of the standard errors, these changes are clearly not significant. The total faculty size in the statistics and biostatistics group (Group IV) is up to 1,702 this year from 1,626 last year, a 5% increase.

This year the estimated number of part-time faculty in Groups I, II, III, Va, B, and M combined is up to 6,543, essentially unchanged from last year's estimate of 6,526. The number of non-tenure-track doctoral faculty (including postdoctoral positions) is estimated at 2,289 this year, up 5% from 2,180 last year. Another category that has been increasing

the past few years is the nondoctoral full-time faculty; this year this group is estimated at 4,107 in Groups I, II, III, Va, M, and B combined, up from 3,804 last year, an 8% increase. In Group IV the number of part-time faculty decreased from 254 last year to 201 this year, and the number of non-tenure-track doctoral faculty increased from 376 last year to 402 this year due to the increased number of postdoctoral appointments.

Table 1D gives an eight-year history of tenured/tenure-track, non-tenure-track, and part-time faculty for Groups I, II, III, and Va combined, for Group M, and for Group B. Also shown for each number in this table is the percentage of females. Comparing the 2006 values to the 1999 values, we see that for Groups I, II, III, and Va combined the number of tenured/tenure-track faculty is down 2%, the number of non-tenure-track doctoral faculty is up 44%, and the number of part-time faculty is down 7%. Likewise for Group M, the number of tenured/tenure-track faculty is down 6%, the number of non-tenure-track doctoral faculty is up 94%, and the number of part-time faculty is down 16%. Finally in Group B, the number of tenured/tenure-track faculty is up 45%, the number of non-tenure-track doctoral faculty is up 6%, and the number of part-time faculty is up 19%.

Table 1E gives a summary of the various types of faculty found in departments of mathematical sciences by sex and group.

Tables 1F and 1G give more information about two types of faculty: full-time faculty without a doctorate and part-time faculty. The top half of Table 1F is a somewhat condensed version of the doctoral full-time faculty in Table 1A broken down by sex. The bottom half of Table 1F shows this

same information for the 4,107 full-time faculty who do not have doctoral degrees. The majority of these faculty, 3,436 (84%), are found in Groups M and B departments. Table 1G shows the part-time faculty broken down by sex and whether they have a doctoral degree. Comparing Table 1G to last year's table, we see that the biggest decline in part-time faculty is in doctoral part-time faculty (down 19% from 1,633 last year to 1,326 this year).

### Female Faculty

Table 1B gives a complete breakdown of all categories of female faculty by group and shows small increases in the (estimated) number of female faculty in all categories, except Group I Public. For 2006-2007 the estimated total number of full-time faculty in Groups I, II, III, Va, M, and B combined is 22,086, of which 6,063 (27%) are females, up from 5,638 (26%) last year. In Group B the estimated number of doctoral female faculty increased from 1,859 last year to 1,903 this year, tenured female faculty increased from 1,080 to 1,158, untenured but tenure-track female faculty decreased from 614 to 610, and non-tenure-track doctoral female faculty (including postdoctoral appointments) decreased from 166 to 135. In Group M the doctoral full-time female faculty increased from 883 last year to 916 this year.

Table 1C compares the number of full-time and female full-time faculty that fall into each reporting group for fall 2006. The percentage who are female in each group is given in the bottom row of Table 1C. These percentages vary considerably among the groups, from a low of 13% for Group I Private to a high of 33% for Group B.

Table 1D contains information about the percentage of female faculty among the tenured/tenure-track and non-tenure-track doctoral full-time faculty and among the part-time faculty for the years 1999 to 2006.

Table 1E gives the male/female breakdown by

the percentage of tenured faculty who are women is highest in Groups M and B combined.

Table 1F shows that of the 4,107 nondoctoral full-time faculty in Groups I, II, III, Va, M, and B combined, 2,194 (53%) are females. From Table 1G we see that in these same groups there are 6,543 part-time faculty, of which 2,642 (40%) are females.

### Faculty Recruitment

Table 2A contains detailed information on the number of full-time doctoral faculty positions in mathematical sciences departments under recruitment during 2005–2006 for employment beginning in the academic year 2006–2007. Among mathematics departments (Groups I, II, III, Va, M, and B), 1,798 positions were under recruitment, up 6% compared to those under recruitment during 2004–2005. Of those 1,798 positions, 1,595 (89%) were available to new doctoral recipients, and of those 1,595 positions, 1,073 (67%) were tenured/tenure-track positions. The 1,073 tenured/tenure-track positions open to new doctoral recipients is up 11% from the 969 such positions under recruitment in 2004–2005. The total number of tenured/tenure-track full-time doctoral positions under recruitment in Groups I, II, III, Va, M, and B combined is 1,231, up from last year's 1,176 (an increase of 5%). In Groups I, II, III, and Va combined, the total number of posted doctoral positions open at the associate/full level decreased from 100 last year to 93 this year.

Table 2B condenses the information in Table 2A. It also reorganizes the doctoral hires into one section for new doctoral hires and another for other doctoral hires (so excludes posted doctoral positions that were temporarily filled with a person without a doctorate). Table 2C is derived from Table 2B, with the percentage of the filled positions that were tenured/tenure-track included in the table.

This year the estimated total number of new doctoral hires in mathematics departments is up 28% (to 701 from 547) from last year; it is up 12% (to 271 from 241) in Groups I, II, III, and Va combined, and up 40% (to 430 from 306) in Groups M and B combined. The number of new doctoral tenure-track hires in the math groups combined is up 38% as a result of a small decrease in Groups I, II, III, and Va combined (down to 44 from 65) and a very large increase in Groups M & B combined (up to 362 from 230). Among the new doctoral hires in Groups I, II, III, and Va combined, 15% of all males and 20% of all females took tenure-track positions. In contrast, for new doctoral hires in Groups M and B combined, 79% of all males and 91% of all females took tenure-track positions. From Table 2C we see that in Groups I, II, III, and Va 16% of the hires of new doctoral recipients are in tenured/tenure-track positions (last year it was 27%), while in Groups M and B 84% of the new doctoral hires are in tenured/tenure-track positions (last year it was 75%).

From Table 2B we find that the total number of full-time doctoral positions filled in mathematics

departments (Groups I, II, III, Va, M, and B combined) is up to 1,435 from 1,385 last year (an increase of 4%); it is up 1% in Groups I, II, III, and Va combined and 5% in Groups M and B combined. This year Groups I, II, III, and Va combined filled 581 doctoral positions, of which 230 (40%) were tenured/tenure-track positions. Last year these same groups filled 574 doctoral positions, of which 266 (46%) were tenured/tenure-track. Groups M and B combined filled 854 doctoral positions this year, and 613 (72%) of these were tenured/tenure-track positions. Last year these two groups filled 811 doctoral positions, of which 562 (69%) were tenured/tenure-track.

Beginning with the 2004 Annual Survey, departments were asked to report the number of doctoral hires into tenured/tenure-track positions filled by individuals who held a non-tenure-track position the previous year and of those, how many were in postdoctoral appointments. For Groups I, II, III, and Va combined, 152 individuals reported having held a non-tenure-track position the previous year (66% of the 230 tenure-track hires), with 121 (53%) having held a postdoctoral appointment the previous year. This compares with last year's figure of 161 (61%) positions filled by individuals who held a postdoctoral appointment the previous year. For Groups M and B combined, 292 individuals (48% of the 613 tenure-track hires) reported having held a non-tenure-track position the previous year, with 137 (22%) having held a postdoctoral appointment the previous year. This compares with last year's figure of 83 (15%) positions filled by individuals who held a postdoctoral appointment the previous year.

The estimated number of not new doctoral hires in mathematics departments is 734, down from 838 last year. The total of not-new doctoral hires into tenured/tenure-track positions in all the mathematics groups combined is 436, down 18% from last year. It is down 8% in Groups I, II, III, and Va combined (to 185 from 201 last year), and down 24% in Groups M and B combined (251 from 332).

Figure 1 shows the number of full-time doctoral positions posted for all groups combined except Group IV, as well as the number of those that were tenured/tenure-track and the number unfilled for the years 1994 to 2006. The number of positions posted and the number of available tenured/tenure-track positions steadily increased, reaching a maximum in 2001. These numbers declined for the next two years. This year both the number of positions posted and the number of tenured/tenure-track positions posted increased over the previous two years.

Female	68	134	14

<sup>1</sup> New doctoral hires are individuals who have held a doctorate for less than one year at the time of hiring.

**Table 2C: Positions Posted and Filled, Fall 2006**

Positions	GROUP		
	I, II, III, & Va	M & B	IV
Posted positions opened to new doctoral recipients	536	1059	131
% tenured/tenure-track	43%	80%	79%
Positions filled by new doctoral recipients	271	430	71
% tenured/tenure-track	16%	84%	66%
Positions filled by not-new doctoral recipients <sup>1</sup>	310	424	48
% tenured/tenure-track	60%	59%	75%

<sup>1</sup> Not-new doctoral recipients are individuals who have held their doctorate for more than one year.

### Faculty Attrition

Table 3 displays losses of full-time mathematical sciences faculty due to retirements and deaths over the past year for each departmental grouping. The fall 2006 faculty attrition rate for Groups I, II, III, Va, M, and B combined is 2.3%, and it is 1.6% for Group IV. For fall 2006, Group Va had the lowest attrition rate at 1.2%, while Group II had the highest at 2.9%.

Figure 2 shows the trends in these attrition rates between 1993 and 2006. While the rates vary from group to group and from year to year within each group, for most of the 1990s the dominant trend was one of increasing attrition for all groups combined. In the late 1990s attrition leveled off then began dropping in 2003, reaching a new low for 2006.

**Table 3: Faculty Attrition,<sup>1</sup> Fall 2006**

	GROUP									
	I Public	I Private	II	III	Va	I, II, III, & Va	M	B	I, II, III, Va, M, & B	IV
<b>Full-time faculty who retired or died</b>										
Total number <i>(Standard error)</i>	38	15	73	61	3	190	103 <i>(19)</i>	221 <i>(36)</i>	514 <i>(41)</i>	27
Percentage	2.1%	1.5%	2.9%	2.8%	1.2%	2.4%	2.2%	2.2%	2.3%	1.6%

<sup>1</sup> Number and percentage of full-time faculty who were in the department in fall 2005 but were reported to have retired or died by fall 2006.
