# Fall 2018 Departmental Profile Report 

Amanda L. Golbeck, Thomas H. Barr, and Colleen A. Rose

This report presents a digest of information about mathematical and statistical sciences (MSS) departments at fouryear colleges and universities in the United States, as of fall 2018. Obtained through a census of these departments, the information presented includes the numbers of faculty in various categories, undergraduate and graduate course enrollments, numbers of bachelor's and master's degrees awarded during the preceding year, and the numbers of graduate students. Definitions of categorized terms such as "Mathematical and Statistical Sciences," "Math," and "Stats," along with a description of the faculty categories are provided at the end of this report. Throughout this report we cite tables in [1] as a resource for much more detail than is provided here.

## Faculty

The estimated number of full-time faculty in MSS for fall 2018 is $25,875(\mathrm{SE}=236)$. Figure F. 1 gives a breakdown by department grouping. Of these, $90 \%, 23,224(\mathrm{SE}=195)$, were in Math and $10 \%$, 2,651 ( $\mathrm{SE}=55$ ), were in Stats. Approximately 22,265 of full-time faculty hold a doctorate (doctoral faculty, in this report). As a percentage, this group's size has varied only by one or two percentage points from the $86 \%$ for the fall 2018 survey. In Math, there were an estimated 8,290 part-time faculty, and in Stats, about 289. These figures are broken down in a variety of ways in Table F. 1 of [1].

In the five years following 2013, the full-time faculty count estimate has increased slightly by an average of about $1 \%$ per year, with Math and Stats growing on average, respectively, by roughly $1 \%$ and $2 \%$ annually.

## Employment Status, Credentials, and Gender

- The full-time faculty hold 13,371 tenured, 3,813 tenureeligible, and 8,691 non-tenure-track appointments; of these counts, Stats faculty account for 1,176 tenured, 535

Figure F.1. Full-time Faculty by Department Grouping

Total: 25,875
tenure-eligible, and 940 non-tenure-track appointments. The non-tenure-track estimate breaks down into 1,607 postdocs, 5,826 renewable, 1,062 fixed-term, and 196 other appointments.

- The estimated number of full-time doctoral faculty in MSS is $22,265(S E=94)$, of whom 19,774 are in Math and 2,491 in Stats. These values are up, respectively, by $2 \%$ and $11 \%$ from the fall 2017 estimates. In a breakdown of this overall count by tenure status and eligibility, there are an estimated 13,118 tenured, 3,718 tenure-eligible, and 5,429 non-tenure-eligible faculty. Figure F. 2 gives further breakdowns by department groupings in these categories.
- There are an estimated 3,610 full-time non-doctoral faculty, of whom 3,450 are in Math and 160 in Stats. Figure F. 3 shows the distribution of these faculty among the department groups. This count is about $5 \%$ lower than that for fall 2017, and the estimated number of

[^0]
## ANNUAL SURVEY

Figure F.2. Full-time Doctoral Faculty, Fall 2018 by Department Grouping and Faculty Category

Figure F.3. Full-time Non-doctoral Faculty by Department Grouping

tenured faculty in this category is 253, which extends a declining trend.

- In addition to full-time faculty, there are an estimated 8,579 faculty who have part-time appointments, 2,302 of whom hold a PhD and 6,277 of whom do not. These figures include those who are hired term-by-term and paid by the course. Overwhelmingly, these faculty are in Math departments. The fall 2018 count is the highest among the years 2014 to 2018, where it has fluctuated from a low of 7,889 in 2017. See Table F. 1 in [1] for more details on counts.
- Women account for $32 \%$ of all full-time faculty $(8,348)$ in MSS. Among faculty in Doctoral Math departments, women account for $24 \%$, in Masters and Bachelors departments, they account for $37 \%$, and in Stats departments they account for $36 \%$. Table F. 2 in [1] provides detailed breakdowns of these numbers and percentages. Figure F. 4 gives the distributions of full-time doctoral women faculty in the department groupings.

Figure F.4. Full-time DoctoralWomen Faculty by Department Grouping and Faculty Category

Figure F.5. Gender of Full-time Faculty

25,875

Figure F.6. Gender Identity of Department Chairs by Department Grouping

*The gender identity for 42 additional department chairs is unknown.

Figure UE.1. Undergraduate Course Enrollments (thousands) by Department Grouping, Fall 2018

This figure is based on Tables FF.1, FF.2, FF.3, and FF. 4 in [1].

- Forty-two percent of part-time faculty are women; Table F. 3 in [1] gives a breakdown by gender among part-time faculty.
- Of the chairpersons in the 1,504 MSS departments covered by this survey, approximately $27 \%$ are women. Figure F. 6 shows the gender distribution of chairperson counts by department groupings. Seventy-two percent of all women chairs are in bachelors-granting departments.

## Undergraduate Course Enrollments and Degrees

- The 2018 estimate of total undergraduate enrollments in MSS courses is 2,558,000 ( $\mathrm{SE}=32,000$ ). Figure UE. 1 gives a sorted breakdown of this number by department grouping. A 90\% confidence interval based on these data is approximately [2506000, 2610000]. In the years 2013 to 2018, the enrollment estimate has varied from a low of 2,460,000 in 2013, and the corresponding confidence

## ANNUAL SURVEY

Figure UD.1. Undergraduate Degrees Awarded by Major and Department Grouping (Degrees awarded between July 1, 2017 and June 30, 2018)

Figure UD.2. Undergraduate Degrees Awarded,'2012-2017, All Mathematics Departments

${ }^{1}$ Degrees awarded between July 1 and June 30.
${ }^{2}$ Due to the finer detail being collected on majors, it's possible departments have reported degrees not reported in the past.

Figure GE.1. Graduate Course Enrollments (thousands) by Department Grouping, Fall 2018

interval for that year is non-overlapping with the one for 2018, suggesting that the slight increasing trend in these values over five years is real.

- For the period 2017-18, an estimated 36,427 (SE = 689) bachelors degrees were awarded in MSS departments, up about $2 \%$ from 2016-17. Of these, 14,883 (41\%) were earned by women, a percentage that continues a trend of increases shown in Figure UD.2. Thirty-six majors were non-binary identifying. Figure UD. 1 gives a breakdown for 2018 by conferring department group of the particular majors associated with these degrees. Tables UD. 1 and UD. 2 in [1] provide further details.

## Graduate Course Enrollment

The estimated total number of graduate course enrollments for 2018 is $111,000(\mathrm{SE}=5,000)$. In 2012, these enrollments were $106,000(\mathrm{SE}=3,000)$, and in the intervening years the estimates have trended upward, suggesting overall average annual growth of about 2\%. Figure GE. 1 gives

Figure GE.2. Graduate Course Enrollment per Full-timeTenured \&Tenure-eligible Faculty Member, by Department Grouping, Fall 2018

a breakdown for this total among the departments with graduate programs, and Figure GE. 2 shows estimates for graduate enrollments per full-time tenured and tenureeligible faculty.

## Masters Degrees Awarded

For the period 2017-2018, the estimated number of masters degrees awarded in MS departments is 7,336 ( $\mathrm{SE}=240$ ), a slight increase from the 2016-2017 estimate of 7,246. Of these, 3,150 or $48 \%$ were earned by women, a $7 \%$ increase from the 2016-2017 estimate consisting of 2,944. In Math departments, the estimated number of masters degrees awarded is 4,731 , a count estimate consisting of 3,278 Math degrees, 375 Math Ed degrees, 623 Statistics-only degrees, 175 Computer Science-only degrees, and 280 other degrees. Approximately 1,894 of these are earned by women.

Figure MD. 1 shows the distribution by major, department grouping, and gender. Figure MD. 2 gives a longitudinal view of degree counts and percentages of women recipients.

Highlights of Masters Degrees:

- $39 \%(2,878)$ of masters degrees were in statistics.
- $22 \%(1,648)$ of masters degrees were awarded by Masters departments, 29\% $(2,161)$ by Statistics, and 3\% (207) by Math Priv Small.
- $46 \%(3,375)$ of masters degrees represented were awarded in mathematics.
- $33 \%(1,101)$ of these were awarded by Masters departments.
- $40 \%$ (442) of degrees awarded by Masters departments were to women.
- $5 \%$ (375) of masters degrees were in mathematics education.
- $67 \%$ (253) of these were awarded by Masters departments.
- Women earned 65\% (165) of all mathematics education degrees in master's departments.

Figure MD.1. Masters Degrees Awarded by Major and Department Grouping (Degrees awarded between July 1, 2017 and June 30, 2018)

## Graduate Students

In fall 2018, the total number of full-time graduate students is estimated at 24,246 , with 16,181 in Math (essentially unchanged from 16,285 in fall 2017) and 8,065 in Stats. Figure GS. 1 gives a breakdown by department grouping. The total number of full-time graduate students in Doctoral Math departments is 14,179 (from 13,896). Table GS. 2 provides insight into longer-term trends in characteristics of graduate student in doctorate-granting departments.
Features of full-time graduate student data:

- Women account for $36 \%$ of full-time graduate students and $40 \%$ of full-time first-year graduate students.
- US citizen and permanent resident graduate students is essentially unchanged at 11,517 (from 11,587 in fall 2017).
- Underrepresented minorities accounted for $13 \%$ of US citizen and permanent resident graduate students and $12 \%$ of first-year graduate students. Women compose $34 \%$ and $33 \%$, respectively, of these categories.
Features of part-time graduate student data:
- The overall count increased slightly to 4,758.
- Underrepresented minorities account for $9 \%$ of these students, down from 13\% in fall 2017.

## Faculty Categories

The faculty categories used in this report are described below. Departments were asked to report any faculty member who was considered to be full-time in the institution for the academic year and at least half-time in the department. Each faculty member was reported in exactly one of these categories.

Tenure-track faculty includes full-time faculty who hold tenured/tenure-eligible positions (i.e., only those individuals who are tenured full professors, other tenured and tenure-eligible faculty).

Postdoctoral faculty includes full-time faculty who have teaching and/or research responsibilities, but for a strictly limited term of employment (i.e., those individuals who hold a temporary position primarily intended to provide
an opportunity to continue training or to further research experience).

Non-tenure-track faculty includes full-time faculty eligible for benefits and with an appointment that lasts at least one academic year. These faculty hold appointments that are renewable (potentially unlimited), fixed-term but not renewable, or temporary. Typical titles for these positions are Lecturer, Senior Lecturer, Instructor, Senior Instructor, Associate/Assistant/Full Teaching Professor, Professor of the Practice, or Clinical Professor, and similar titles for research-only faculty.

Part-time faculty includes those individuals who are hired term-by-term, paid by the course, and/or those in phased retirement.

## Remarks on Statistical Procedures

The questionnaire on which this report is based, "Departmental Profile," is sent to all Doctoral, Masters, and Bachelors departments in the US.

Response rates vary substantially across the different department groups. For most of the data collected on the Departmental Profile form, the year-to-year changes in a given department's data are small when compared to the variations among the departments within a given group. As a result of this, the most recent prior year's response is used (imputed) if deemed suitable. After the inclusion of prior responses, standard adjustments for the remaining nonresponses are then made to arrive at the estimates reported for the entire grouping.

Standard errors were calculated for some of the key estimates for the Doctoral Math Group (Math Public, Math Private, and Applied Math), and for the Masters, Bachelors, Statistics, and Biostatistics Groups. Standard errors are calculated using the variability in the data and can be used to measure how close our estimate is to the true value for the population. As an example, the number of full-time faculty in the Masters Group is estimated at 4,121 with a standard error of 94 . This means the actual number of full-time faculty in the Masters Group is most likely between 4,121 plus or minus two standard errors, or
between 3,933 and 4,309. This is much more informative than simply giving the estimate of 4,121 .

Estimates are also given for parameters that are totals from all groups, such as the total number of full-time faculty. For example, an estimate of the total number of fulltime faculty in all groups except Statistics and Biostatistics combined is 23,224, with a standard error of 195 .

The careful reader will note that a row or column total may differ slightly from the sum of the individual entries. All table entries are the rounded values of the individual projections associated with each entry, and the differences are the result of this rounding (as the sum of rounded numbers is not always the same as the rounded sum).

## Department Groupings

In this report, Mathematical and Statistical Sciences departments are those in four-year institutions in the US that refer to themselves with a name that incorporates (with a few exceptions) "Mathematics" or "Statistics" in some form. For instance, the term includes, but is not limited to, departments of "Mathematics," "Mathematical Sciences," "Mathematics and Statistics," "Mathematics and Computer Science," "Applied Mathematics," "Statistics," and "Biostatistics." Also, Mathematics (Math) refers to departments that (with exceptions) have "Mathematics" in the name; Stats refers to departments that incorporate (again, with exceptions) "Statistics" or "Biostatistics" in the name but do not use "Mathematics."

Listings of the actual departments that comprise these groups are available on the AMS website at www.ams.org/annual-survey/groupings.

## Survey Response Rates by Grouping

| Group | Number | Percent | Imputed $^{1}$ |
| :--- | :--- | :---: | :---: |
| Math Public Large | 26 of 26 | $100 \%$ | 4 |
| Math Public Medium | 37 of 40 | $93 \%$ | 6 |
| Math Public Small | 65 of 70 | $93 \%$ | 12 |
| Math Private Large | 21 of 24 | $88 \%$ | 4 |
| Math Private Small | 25 of 28 | $89 \%$ | 7 |
| Applied Math | 24 of $26^{2}$ | $92 \%$ | 4 |
| Statistics | 47 of 60 | $78 \%$ | 10 |
| Biostatistics | 33 of $45^{2}$ | $73 \%$ | 5 |
| Masters | 98 of 171 | $57 \%$ | 26 |
| Bachelors | 571 of 1,014 | $56 \%$ | 233 |
| Total | 947 of 1,504 | $63 \%$ | 301 |

[^1]${ }^{2}$ The populations for Applied Math and Biostatistics are slightly less than for the Doctorates Granted Survey because some programs do not formally "house" faculty, teach undergraduate courses, or award undergraduate degrees.

| A department is in <br> Group... | ..when its subject area, <br> highest degree offered, and <br> PhD production rate is $p$ |
| :--- | :--- |
| Math Public Large | Math PhD, $7.0 \leq p$ |
| Math Public Medium | Math PhD, $3.9 \leq p<7.0$ |
| Math Public Small | Math PhD, $p<3.9$ |
| Math Private Large | Math PhD, $3.9 \leq p$ |

## Acknowledgments

The Annual Survey attempts to provide an accurate appraisal and analysis of various aspects of the academic mathematical sciences scene for the use and benefit of the community and for filling the information needs of the professional organizations. Every year, college and university departments in the United States are invited to respond. The Annual Survey relies heavily on the conscientious efforts of the dedicated staff members of these departments for the quality of its information. On behalf of the Data Committee and the Annual Survey Staff, we thank the many secretarial and administrative staff members in the mathematical sciences departments for their cooperation and assistance in responding to the survey questionnaires.
