MAA Notes and Reports Series

The MAA Notes and Reports Series, started in 1982, addresses a broad range of topics and themes of interest to all who are involved with undergraduate mathematics. The volumes in this series are readable, informative, and useful, and help the mathematical community keep up with developments of importance to mathematics.

MAA Notes

1. Problem Solving in the Mathematics Curriculum,
Committee on the Teaching of Undergraduate Mathematics,
a subcommittee of the Committee on the Undergraduate Program in Mathematics, *Alan H. Schoenfeld*, Editor
2. Recommendations on the Mathematical Preparation of Teachers,
Committee on the Undergraduate Program in Mathematics, Panel on Teacher Training.
3. Undergraduate Mathematics Education in the People's Republic of China,
Lynn A. Steen, Editor.
4. Notes on Primality Testing and Factoring, *Carl Pomerance*.
5. American Perspectives on the Fifth International Congress on Mathematical Education,
Warren Page, Editor.
6. Toward a Lean and Lively Calculus, *Ronald G. Douglas*, Editor.
7. Undergraduate Programs in the Mathematical and Computer Sciences: The 1985-86 Survey,
D. J. Albers, R. D. Anderson, D. O. Loftsgaarden, Editors.
8. Calculus for a New Century, *Lynn A. Steen*, Editor.
9. Computers and Mathematics: The Use of Computers in Undergraduate Instruction,
Committee on Computers in Mathematics Education, D. A. Smith, G. J. Porter, L. C. Leinbach, and R. H. Wenger, Editors.
10. Guidelines for the Continuing Mathematical Education of Teachers,
Committee on the Mathematical Education of Teachers.
11. Keys to Improved Instruction by Teaching Assistants and Part-Time Instructors,
Committee on Teaching Assistants and Part-Time Instructors, Bettye Anne Case, Editor.
12. The Use of Calculators in the Standardized Testing of Mathematics,
John Kenelly, Editor, published jointly with The College Board.
13. Reshaping College Mathematics,
Committee on the Undergraduate Program in Mathematics, Lynn A. Steen, Editor.
14. Mathematical Writing, by *Donald E. Knuth, Tracy Larrabee, and Paul M. Roberts*.
15. Discrete Mathematics in the First Two Years, *Anthony Ralston*, Editor.
16. Using Writing to Teach Mathematics, *Andrew Sterrett*, Editor.
17. Priming the Calculus Pump: Innovations and Resources,
Committee on Calculus Reform and the First Two Years,
a subcommittee of the Committee on the Undergraduate Program in Mathematics, *Thomas W. Tucker*, Editor.
18. Models for Undergraduate Research in Mathematics, *Lester Senechal*, Editor.
19. Visualization in Teaching and Learning Mathematics,
Committee on Computers in Mathematics Education, Steve Cunningham and Walter S. Zimmermann, Editors.

20. The Laboratory Approach to Teaching Calculus, *L. Carl Leinbach et al.*, Editors.
21. Perspectives on Contemporary Statistics, *David C. Hoaglin and David S. Moore*, Editors.
22. Heeding the Call for Change: Suggestions for Curricular Action, *Lynn A. Steen*, Editor.
23. Statistical Abstract of Undergraduate Programs in the Mathematical Sciences and Computer Science in the United States: 1990–91 CBMS Survey, *Donald J. Albers, Don O. Loftsgaarden, Donald C. Rung, and Ann E. Watkins*.

MAA Reports

1. A Curriculum in Flux: Mathematics at Two-Year Colleges,
Subcommittee on Mathematics Curriculum at Two-Year Colleges,
a joint committee of the MAA and the American Mathematical Association of Two-Year Colleges, *Ronald M. Davis*, Editor.
2. A Source Book for College Mathematics Teaching,
Committee on the Teaching of Undergraduate Mathematics, *Alan H. Schoenfeld*, Editor.
3. A Call for Change: Recommendations for the Mathematical Preparation of Teachers of Mathematics,
Committee on the Mathematical Education of Teachers, *James R. C. Leitzel*, Editor.
4. Library Recommendations for Undergraduate Mathematics,
CUPM ad hoc Subcommittee, *Lynn A. Steen*, Editor.
5. Two-Year College Mathematics Library Recommendations,
CUPM ad hoc Subcommittee, *Lynn A. Steen*, Editor.

This survey was supported by the National Science Foundation under grant SRS-8914939.
Any opinions, findings, conclusions, or recommendations expressed herein do not necessarily

ACKNOWLEDGEMENTS

The cooperation of the departmental chairs and their staffs in completing the lengthy survey form was indispensable to this report. The assistance provided by both Dr. James Maxwell, Associate Executive Director, and Ms. Monica Foulkes, Staff Assistant, the American Mathematical Society, was crucial to the data collection effort. Members of the survey committee (listed on the back cover) contributed to the configuration of the survey forms with special thanks due to Professor Ingram Olkin of Stanford University for his assistance in the design of the tables.

This survey was supported by the NSF under Grant SRS-8914939. The NSF also supported the 1970, 1975, 1980, and 1985 surveys. The effort of Dr. Mary Golladay, Director, Education and Human Resources Program, Division of Science Resource Studies, the National Science Foundation, is appreciated. The careful administration of the grant by Ms. Rhoda Goldstein, Associate Director for Finance and Administration, and the guidance provided by Ms. Beverly Ruedi, Editorial Assistant, the Mathematical Association of America are also appreciated.

Thanks are due to the Conference Board of the Mathematical Sciences for its continued support.

The format and organization of this report differs from that of past surveys. Hopefully the reader will find the contents useful and the format pleasing.

FOREWORD

This is the sixth in a series of CBMS reports on undergraduate programs in the mathematical sciences and computer science. The first report was published in 1965 and a new one has appeared every five years thereafter. This report compiles statistical information on a broad range of measures in both two-year and four-year institutions in the United States. It contains information on course enrollment, faculty, baccalaureate degrees, class size and format for selected introductory courses, and computer science programs, all of which were reported in previous surveys. The data were collected in fall 1990 and, in most instances, are based upon figures for this academic period. Information collected for the first time in the 1990 survey includes

- statistics on mathematical science libraries;
- information on programs for majors;
- requirements for mathematics majors;
- number of support staff in departments;
- institutional travel funds expenditures in 1989-90;
- instructional contributions of graduate teaching assistants.

This report does not contain any information on graduate programs.

The data from four-year college and university departments are reported by discipline: mathematics, statistics, and computer science. Here "mathematics department" means a department in which mathematics is the primary discipline although it may be a multiply-titled department or it may contain subunits in related disciplines. Data from other related departments, such as operations research or applied mathematics, are reported with mathematics departments.

Data on two-year colleges were obtained from the head of the mathematical sciences program. The mathematical sciences program generally includes computer science. This report uses the phrase "two-year college mathematics programs" to describe both the academic activities and the faculty of such programs.

The four-year and university departments were further divided according to the highest **mathematics** degree offered by the institution. Thus the division of statistics and computer science departments into PhD, master's, and bachelor's granting institutions may not be by that department's highest degree. In an analysis of respondents, however, there were only 3 computer science departments whose highest degree did not match the corresponding mathematics department's highest degree. Similarly, there was a good fit in statistics departments.

All estimates in this report were obtained from a sample of institutions. As such, they are subject to statistical errors caused by design, reporting techniques, and non-response. They likely differ from the numbers that would have been obtained had there been a complete census using the same survey procedures. The response rate from four-year college departments of computer science was 33%; thus data for this group have a lower confidence level than do data from the other groups. All previous CBMS surveys were based upon

samples of institutions as well. A description of the technical aspects of the survey can be found in Appendix II.

The report is organized into nine chapters. The first is a summary chapter presenting data from both two-year and four-year institutions. Chapters 2-7 give data on four-year colleges and universities in the following areas: enrollment, faculty, introductory courses including calculus I and II, programs for majors, further details on computer science majors, and mathematical science libraries. Chapter 8 presents information on enrollment and courses in two-year colleges. Chapter 9 provides data on faculty in two-year colleges. Appendix I contains detailed enrollment numbers in all four-year and university departmental courses since 1970. Appendix II is a description of survey techniques and response rates and Appendix III lists the survey respondents. Appendixes IV and V contain, respectively, the survey form for the four-year colleges and universities, and the two-year colleges.

Most tables in the report are accompanied by figures highlighting aspects of the table and a few lines of text amplifying the table or comparing the table to other tables in the report. Each chapter begins with a brief summary page which also identifies those tables in the chapter of special interest to either four-year mathematics, statistics, computer science, or two-year mathematics.

The data in this survey are in good agreement with relevant data from three other surveys. The Higher Education Survey No. 5, "A Survey of Mathematics and Statistics Departments at Higher Education Institutions," sponsored by the National Science Foundation, reported that the fall 1989 enrollment in four-year colleges and universities was 1,870,000; the 1990 figure as reported by this survey was 1,795,000. (The HES survey asked for mathematical/statistical course enrollment by level which may have been interpreted by some respondents to include departmental computer science enrollment. Enrollment data in this CBMS survey are obtained from individual course enrollment. The mathematics/statistics course total in this survey does not include the 180,000 students enrolled in computer science courses taught in mathematics departments.) The 1989 HES two-year college enrollment was 1,047,000, while this survey's 1990 figure was 1,295,000. The HES survey gave full-time four-year mathematics/statistics faculty size as 17,850; this survey reported 19,411 full-time faculty of which 16,090 taught only mathematics/statistics, 1492 taught only computer science and 1829 regularly taught both. How respondents to the HES survey reported the last two categories of faculty is not clear. The HES survey reported 6,600 full-time two-year mathematics program faculty in 1989; this survey reports 7,222 in 1990.

The Computer Science Board conducts a survey of (only) PhD granting departments, the Taulbee survey. While they combine U.S. and Canadian departments in their report, a private communication from the survey directors indicates that the U.S. PhD computer science faculty in fall 1990 numbered 2569 tenured or tenure track (or research) faculty plus 366 full-time equivalent non-tenure track teachers which included part-time faculty. This survey reported 2756 full-time faculty. The Taulbee survey reported 7,080 bachelor degrees awarded in 1989-90; this survey's figure is 7201.

In 1990 the American Mathematical Society commissioned a survey of mathematical science libraries in (only) PhD granting mathematics departments. Except for one minor category, that report is in general agreement with the relevant data from this survey, which also includes information on mathematical science libraries in non-PhD granting four-year colleges and universities.

The phrase "mathematical sciences," as used in CBMS reports prior to 1985, included computer science, but now does not, agreeing with the present NSF taxonomy. This report uses this phrase only in describing the mathematical science library. Otherwise, the phrases used are "mathematics," "statistics," and "computer science" in the hope that this makes for greater clarity.

Don O. Loftsgaarden was the consulting statistician for this survey and report. Ann E. Watkins was the principal author of the two-year college chapters with contributions by Donald J. Albers. Donald C. Rung wrote the remaining sections and was the overall supervisor.

Comments on this volume are welcome, as are suggestions for future surveys.

Chapter 1. Summary	1
Table S.1 Enrollment (thousands) in Mathematics, Statistics, and Computer Science courses at four-year colleges and universities and two-year colleges: Fall 1970, 1980, 1985, 1990; Fall 1990 broken down by department.	2
Table S.2 Enrollment (thousands) by level in Mathematics, Statistics, and Computer Science courses in four-year college and university Departments of Mathematics, Statistics, and Computer Science and in two-year college Mathematics Programs: Fall 1970, 1980, 1985, 1990.	4
Table S.3 Number of Bachelor's Degrees awarded by four-year college and university Departments of Mathematics, Statistics, and Computer Science (combined) between July 1 and June 30 in 1974-75, 1979-80, 1984-85, and 1989-90, by selected majors and by sex for totals in 1989-90.	6
Table S.4 Number of full-time faculty in four-year college and university Departments of Mathematics, Statistics, and Computer Science and in two-year college Mathematics Programs: Fall 1970, 1980, 1985, 1990.	8
Table S.5 Number of full-time faculty in four-year college and university Departments of Mathematics by highest degree and in 1990 by teaching responsibility: Fall 1970, 1980, 1985, 1990.	10

Table S.6 Number of full-time faculty in two-year college Mathematics Programs by highest degree: Fall 1970, 1980, 1985, 1990. 11

Table S.7 Full-time faculty in four-year college and university Departments of Statistics by highest degree: Fall 1970, 1980, 1985, 1990. 12

Table S.8 Full-time faculty in four-year college and university Departments of Computer Science by highest degree: Fall 1970, 1980, 1985, 1990. 13

Table S.9 Age distribution of full-time faculty in four-year college and university Departments of Mathematics, Statistics, and Computer Science and two-year college Mathematics Programs for Fall 1990 and average age: Fall 1975, 1985, 1990. 14

Table S.10 Percent women among full-time faculty in four-year college and university Departments of Mathematics, Statistics, and Computer Science and two-year college Mathematics Programs: Fall 1975, 1980, 1985, 1990; percent women among faculty aged less than 35: Fall 1990. 16

Table S.11 Percent of sections taught by full-time and part-time faculty and graduate teaching assistants in four-year college and university Departments of Mathematics, Statistics, and Computer Science and two-year college Mathematics Programs: Fall 1990. 17

Table S.12 Number of part-time faculty and graduate teaching assistants in four-year college and university Departments of Mathematics, Statistics, and Computer Science and two-year college Mathematics Programs: Fall 1970, 1980, 1985, 1990. Part-time faculty as a percent of full-time faculty is given in parentheses. Graduate TAs are available only for Fall 1990. 18

Chapter 2. Enrollment 21

Table E.1 Enrollment (thousands) for Mathematics, Statistics, and Computer Science courses in four-year college and university Departments of Mathematics, Statistics, and Computer Science by level of course and by type of school. Also full-time faculty: Fall 1990. 22

Table E.2 Number of sections of Mathematics, Statistics, and Computer Science courses in four-year college and university Departments of Mathematics, Statistics, and Computer Science by level of the course and by type of school: Fall 1990. 24

Table E.3 Average section size for Mathematics, Statistics, and Computer Science courses in four-year college and university Departments of Mathematics, Statistics, and Computer Science by level of the courses and by type of school: Fall 1990. 26

Table E.4	Percent of four-year college and university Departments of Mathematics offering selected advanced level mathematics courses within two consecutive academic years, 1989-91 by type of school and also for all departments 1984-86. 28
Table E.5	Bachelor's Degrees in Computer Science awarded by four-year college and university Departments of Mathematics and Computer Science between July 1, 1989 and June 30, 1990 by type of school and gender of the degree recipient. 29
Table E.6	Bachelor's Degrees in Mathematics, Statistics, and Mathematics Education awarded by four-year college and university Departments of Mathematics and Statistics between July 1, 1989 and June 30, 1990 by gender of degree recipient and type of school. 30
Chapter 3. Faculty.....		33
Table F.1	Number of full-time faculty in four-year college and university Departments of Mathematics, Statistics, and Computer Science by instructional responsibilities and type of school; also average number of faculty per department: Fall 1990. 34
Table F.2	Tenure status of full-time faculty in four-year college and university Departments of Mathematics, Statistics, and Computer Science by type of school for Fall 1990. Available data for 1975, 1980, and 1985 also given. 36
Table F.3	Gender and Racial/Ethnic groups among full-time faculty in four-year college and university Departments of Mathematics, Statistics, and Computer Science for Fall 1990 and among new PhDs from U.S. Departments of Mathematics and Statistics for 1980-1990. 37
Table F.4	Age distribution of full-time faculty in four-year college and university Departments of Mathematics, Statistics, and Computer Science by type of school: Fall 1990. 38
Table F.5	Deaths and retirements of full-time faculty from four-year college and university Departments of Mathematics, Statistics, and Computer Science from Sept. 1, 1989 to Aug. 31, 1990 given as a percent of full-time faculty. Historical data is included when available. 40
Table F.6	Percent of departments having various weekly loads in classroom contact hours for full-time faculty in four-year college and university Departments of Mathematics, Statistics, and Computer Science by type of school: Fall 1990. 40
Table F.7	Full-time faculty in four-year college and university Departments of Mathematics by highest degree and type of school: Fall 1990. 42

Table F.8	Full-time faculty in four-year college and university Departments of Statistics by highest degree and type of school: Fall 1990.	42
Table F.9	Full-time faculty in four-year college and university Departments of Computer Science by highest degree and type of school: Fall 1990	42
Table F.10	Percent of sections taught by full-time and part-time faculty and graduate teaching assistants in four-year college and university Departments of Mathematics by type of school: Fall 1990.	43
Table F.11	Percent of sections taught by full-time and part-time faculty and graduate teaching assistants in four-year college and university Departments of Statistics by type of school: Fall 1990.	44
Table F.12	Percent of sections taught by full-time and part-time faculty and graduate teaching assistants in four-year college and university Departments of Computer Science by type of school: Fall 1990.	45
Table F.13	Number of part-time faculty and graduate teaching assistants in four-year college and university Departments of Mathematics, Statistics, and Computer Science by type of school. The percent that part-time faculty and graduate TAs are of full-time faculty is given in parentheses: Fall 1990.	46
Chapter 4. Introductory Courses in Calculus, Statistics, and Computer Science.		49
Table C.1	Enrollment in thousands and average section size in some Calculus level courses in four-year college and university Departments of Mathematics by type of school: Fall 1990.	50
Table C.2	Instructional formats for mainstream and non-mainstream Calculus I in four-year college and university Departments of Mathematics; percent of total sections in each format by type of school: Fall 1990.	52
Table C.3	Number of sections (percent in parentheses) of mainstream Calculus I and II requiring extra features in four-year college and university Departments of Mathematics by type of school: Fall 1990.	53
Table C.4	Instructional formats for Elementary Statistics in four-year college and university Departments of Mathematics and Statistics; percent of total sections in each format by type of school: Fall 1990.	54
Table C.5	Instructional formats for Computer Programming I in four-year college and university Departments of Mathematics and Computer Science; percent of total sections in each format by type of school: Fall 1990.	56

Chapter 5. Departmental Characteristics	59
Table D.1 Features available to majors in four-year college and university. Departments of Mathematics, Statistics, and Computer Science; percent of departments or programs with the feature by type of school: Fall 1990.	60
Table D.2 Percent of four-year college and university Mathematics options. (tracks) that require certain junior-senior courses or other curricular features in Departments of Mathematics by type of school; also for Statistics options (tracks) in Univ (PhD) Stat Depts: Fall 1990.	62
Table D.3 Type of office for full-time faculty in four-year college and university. Departments of Mathematics, Statistics, and Computer Science by type of school: Fall 1990.	63
Table D.4 Average number of support staff positions per full-time faculty. member in four-year college and university Departments of Mathematics, Statistics, and Computer Science by type of school: Fall 1990.	64
Table D.5 Institutional travel funds expended in 1989-90 per full-time. faculty member in four-year college and university Departments of Mathematics, Statistics, and Computer Science by type of school.	65
Chapter 6. Computer Science Programs.....	67
Table CS.1 Number of semester credits in Mathematics or Statistics at or above. the Calculus level normally taken by Computer Science majors in four-year colleges and universities by type of school: Fall 1990.	68
Table CS.2 Mathematics and statistics courses required by four-year college. and university Computer Science programs; percent of programs requiring the course by type of school: Fall 1990.	69
Table CS.3 Average student enrollment per computer station in four-year. college and university Computer Science programs; percent of programs with each enrollment by type of school: Fall 1990.	70
Table CS.4 Accessibility of computer stations both for students and for course. work in four-year college and university Computer Science programs by level of courses and by type of school: Fall 1990.	71

Chapter 7. Mathematical Science Libraries	73
Table L.1 Location of mathematical sciences library of four-year college and university Departments of Mathematics as a percent by type of school; also percent of these libraries that display current unbound mathematical sciences journals separately: Fall 1990.	74
Table L.2 Volumes in and mathematical sciences journals received by the mathematical sciences library of four-year college and university Departments of Mathematics by type of school: Fall 1990.	75
Table L.3 Overall effectiveness of the mathematical sciences library at four-year colleges and universities as judged by the Department of Mathematics by type of school: Fall 1990.	76
Table L.4 Electronic products available in four-year college and university mathematical sciences libraries by type of school: Fall 1990.	78
 An Overview of Two-Year Colleges: The Boom Continues	 79
Chapter 8. Two-Year College Mathematics Programs Enrollment Course Offerings, and Instructional Practices	81
Highlights	81
Enrollment, Class Size, and Course Offerings	82
Table TYR.1 Total enrollment in two-year colleges: Fall 1966, 1970, 1975, 1980, 1985, 1990.	82
Table TYR.2 Enrollment in mathematics programs at two-year colleges: Fall 1966, 1970, 1975, 1980, 1985, 1990.	84
Table TYR.3 Enrollment (in thousands) in mathematical sciences and computer science courses in mathematics programs at two-year colleges: Fall 1966, 1970, 1975, 1980, 1985, 1990.	85
Table TYR.4 Enrollment (in thousands) in mathematical sciences and computer science courses by level of courses in mathematics programs at two-year colleges: Fall 1966, 1970, 1975, 1980, 1985, 1990.	86
Table TYR.5 Average section size for selected two-year college mathematics courses: Fall 1990.	87
Table TYR.6 Average section size by level of course in two-year colleges and four-year colleges and universities: Fall 1990.	88

Table TYR.7	Percentage of two-year college mathematics programs teaching selected mathematical sciences and computer science courses: Fall 1970, 1985, 1990.	89
Mathematics and Computer Science Courses Taught Outside of Mathematics Programs		89
Table TYR.8	Estimated enrollment (in thousands) in mathematical sciences and computer science courses taught at two-year colleges but outside of mathematics programs at two-year colleges: Fall 1970, 1975, 1980, 1985, 1990.	90
Table TYR.9	Estimated enrollment (in thousands) in mathematical sciences or computer science courses taught outside of mathematics programs by division where taught at two-year colleges: Fall 1990.	92
Instructional Practices		92
Table TYR.10	Instructional formats used by faculty in mathematics programs at two-year colleges: Fall 1980, 1985, 1990.	93
Table TYR.11	Percent of calculus sections in two-year colleges that assign group projects and that have a writing component: Fall 1990.	93
Table TYR.12	The percent of sections of selected two-year college courses in which computer assignments are regularly given and in which calculators are recommended: Fall 1990.	94
Table TYR.13	Use of computers by faculty in mathematics programs at two-year colleges (a typical week): Fall 1990.	95
Table TYR.14.A	Average number per college of personal computers, terminals, and workstations available to mathematics faculty and students for various uses by size of two-year college: Fall 1990.	95
Table TYR.14.B	Percent of two-year colleges reporting no computers for each category below concerning the availability of personal computers, terminals, and workstations for faculty and students for various uses by size of the two-year college: Fall 1990.	96
Student Services		96
Table TYR.15	Sources of personnel for mathematics laboratories in mathematics programs at two-year colleges: Fall 1985, 1990.	96

Table TYR.16 Percent of two-year colleges offering various services to students: 97
 Fall 1990.

Chapter 9. Two-Year College Mathematics Program Faculty. 99

Highlights 99

The Number and Teaching Load of Full-Time and Part-Time Mathematics Program Faculty . . . 100

Table TYR.17 Number of full-time and part-time faculty in mathematics. 100
 programs at two-year colleges: Fall 1966, 1970, 1975, 1980, 1985,
 1990.

Table TYR.18 The ratio of number of part-time faculty to full-time faculty. 101
 in mathematics programs in two-year colleges by geographic
 region: Fall 1990.

Table TYR.19 Percent of sections taught by part-time faculty in two-year. 102
 college mathematics programs: Fall 1990.

Table TYR.20 Teaching load for full-time faculty members in mathematics. 102
 programs at two-year colleges: Fall 1990.

Table TYR.21 Teaching load for full-time faculty members in mathematics. 103
 programs at two-year colleges by geographic region: Fall 1990.

Table TYR.22 Average weekly teaching load in contact hours for part-time. 104
 faculty members in mathematics programs at two-year colleges:
 Fall 1990.

Education of Full-Time Two-Year College Mathematics Program Faculty. 104

Table TYR.23 Percent of doctorates among full-time faculty in mathematics. 105
 programs at two-year colleges: Fall 1970, 1975, 1980, 1985, 1990.

Table TYR.24 Highest degree of full-time faculty in mathematics programs at 106
 two-year colleges: Fall 1970, 1975, 1980, 1985, 1990.

Table TYR.25 Highest degree of full-time faculty in mathematics programs at 106
 two-year colleges by geographic region of USA: Fall 1990.

Table TYR.26 Highest degree of full-time faculty in mathematics programs at 107
 two-year colleges by field and level of highest degree: Fall 1990.

Education of Part-Time Two-Year College Mathematics Program Faculty.....	108
Table TYR.27 Highest degree of part-time faculty in mathematics programs at two-year colleges: Fall 1970, 1975, 1980, 1985, 1990.	108
Table TYR.28 Highest degree of part-time faculty in mathematics programs at two-year colleges by geographic region in USA: Fall 1990.	109
Table TYR.29 Highest degree of part-time faculty in mathematics programs at two-year colleges by field: Fall 1990.	110
Gender, Ethnic Composition, and Age of Full-Time Two-Year College Mathematics Program Faculty.....	111
Table TYR.30 Number of full-time faculty in mathematics programs at two-year colleges: Fall 1975, 1980, 1985, 1990.	111
Table TYR.31 Number of ethnic minority full-time faculty members in mathematics programs at two-year colleges: Fall 1975, 1980, 1985, 1990.	112
Table TYR.32 Ethnic group distribution of full-time faculty in mathematics programs at two-year colleges: Fall 1980, 1985, 1990.	113
Table TYR.33 Ethnic group distribution of full-time faculty and of full-time faculty under age 40 in mathematics programs at two-year colleges (Fall 1990) and percent of master's degrees in mathematical sciences awarded (1985).	113
Table TYR.34 Age distribution of full-time faculty members in mathematics programs at two-year colleges: Fall 1975, 1980, 1985, 1990.	114
Table TYR.35 Percent breakdown of full-time faculty in mathematics programs at two-year colleges by age class and sex; also percent female in each age class and overall: Fall 1990.	114
Table TYR.36 Age distribution of ethnic minority full-time faculty members in mathematics programs at two-year colleges: Fall 1980, 1985, 1990.	115
Sources and Destinations of Mathematics Program Faculty in Two-Year Colleges, 1990.....	116
Table TYR.37 Source of new full-time faculty for mathematics programs at two-year colleges: 1989-1990.	116
Table TYR.38 Other employment of part-time faculty in two-year college mathematics programs: Fall 1990.	117

Professional Activities of Two-Year College Mathematics Program Faculty.....	117
Table TYR.39 Outflow of full-time faculty from mathematics programs at two-year colleges: 1989-1990.	118
