Mathematical Reviews

SPONSORED BY
The American Mathematical Society &
The Mathematical Association of America

January, 1940

TABLE OF CONTENTS

Algebra ........................................ 1
Abstract algebra ............................... 2
Theory of numbers .............................. 4
Theory of groups ................................ 5
Analysis ........................................ 7
Theory of sets, theory of functions of real
variables ....................................... 8
Theory of functions of complex variables .... 8
Theory of series ................................ 10
Fourier series and integrals, theory of approx-
imation ..................................... 11
Differential equations .......................... 15
Integral equations and functional analysis ... 17
Calculus of variations .......................... 19
Dynamics, celestial mechanics, relativity .... 19
Mechanics of continua ........................ 20
Theory of probability .......................... 21
Theoretical statistics ........................... 22
Applications of the theory of probability,
economics .................................... 23
Mathematical physics ........................... 24
Geometry ....................................... 25
Algebraic geometry ............................. 26
Differential geometry ........................... 27
Topology ....................................... 29
Numerical and graphical methods ............ 31
Bibliographical notes .......................... 32

Vol. 1, No. 1
