APPLIED MATHEMATICS

EDITED BY

H. L. DRYDEN
J. M. LESSELLS

T. C. FRY
W. PRAGER
J. L. SYNGE

TH. v. KÁRMÁN
I. S. SOKOLNIKOFF

WITH THE COLLABORATION OF

H. BATEMAN
J. P. DEN HARTOG
K. O. FRIEDRICHS
F. D. MURNAGHAN
R. V. SOUTHWELL

M. A. BIOT
H. W. EMMONS
J. N. GOODIER
S. A. SCHELKUNOFF
G. I. TAYLOR

L. N. BRILLOUIN
W. FELLER
P. LE CORBEILLER
W. R. SEARS
S. P. TIMOSHENKO

QUARTERLY
OF
APPLIED MATHEMATICS

This periodical is published quarterly under the sponsorship of Brown University, Providence, R.I. For its support, an operational fund is being set up to which industrial organizations may contribute. To date, contributions of the following industrial companies are gratefully acknowledged:

BELL TELEPHONE LABORATORIES, INC.; NEW YORK, N. Y.,
THE BRISTOL COMPANY; WATERBURY, CONN.,
CURTISS WRIGHT CORPORATION; AIRPLANE DIVISION; BUFFALO, N. Y.,
EASTMAN KODAK COMPANY; ROCHESTER, N. Y.,
GENERAL ELECTRIC COMPANY; SCHENECTADY, N. Y.,
GULF RESEARCH AND DEVELOPMENT COMPANY; PITTSBURGH, PA.,
LEEDS & NORTHRUP COMPANY; PHILADELPHIA, PA.,
PRATT & WHITNEY, DIVISION NILES-BEMENT-POND COMPANY; WEST HARTFORD, CONN.,
REPUBLIC AVIATION CORPORATION; FARMINGDALE, LONG ISLAND, N. Y.,
UNITED AIRCRAFT CORPORATION; EAST HARTFORD, CONN.,
WESTINGHOUSE ELECTRIC AND MANUFACTURING COMPANY; PITTSBURGH, PA.

The QUARTERLY prints original papers in applied mathematics which have an intimate connection with application in industry or practical science. It is expected that each paper will be of a high scientific standard; that the presentation will be of such character that the paper can be easily read by those to whom it would be of interest; and that the mathematical argument, judged by the standard of the field of application, will be of an advanced character.

Manuscripts submitted for publication in the QUARTERLY OF APPLIED MATHEMATICS should be sent to the Managing Editor, Professor W. Prager, Quarterly of Applied Mathematics, Brown University, Providence 12, R. I., either directly or through any one of the Editors or Collaborators. In accordance with their general policy, the Editors welcome particularly contributions which will be of interest both to mathematicians and to engineers. Authors will receive galley proofs only. Seventy-five reprints without covers will be furnished free; additional reprints and covers will be supplied at cost.

The subscription price for the QUARTERLY is \$6.00 per volume (April-January), single copies \$2.00. Subscriptions and orders for single copies may be addressed to: Quarterly of Applied Mathematics, Brown University, Providence 12, R.I., or to 450 Ahnaip St., Menasha, Wisconsin.

Entered as second class matter March 14, 1944, at the post office at Providence, Rhode Island, under the act of March 3, 1879. Additional entry at Menasha, Wisconsin.

Reprinted 1974 in U. S. A.

CONTENTS

T. Alfrey: Methods of representing the properties of viscoelastic materials . . .	143
H. J. Barten: On the deflection of a cantilever beam	275
K. E. Bisshopp: The inverse of a stiffness matrix	82
K. E. Bisshopp and D. C. Drucker: Large deflection of cantilever beams . . .	272
D. R. Blaskett and H. Schwerdtfeger: A formula for the solution of an arbitrary analytic equation	266
M. H. Blewett: (<i>See H. Poritsky</i>)	
E. Bromberg and J. J. Stoker: Non-linear theory of curved elastic sheets . .	246
G. F. Carrier: On the non-linear vibration problem of the elastic string . .	157
G. F. Carrier: On the vibrations of the rotating ring	235
P. Y. Chou: On velocity correlations and the solutions of the equations of turbulent fluctuation	38
P. Y. Chou: Pressure flow of a turbulent fluid between two infinite parallel planes	198
N. Coburn: The Kármán-Tsien pressure-volume relation in the two-dimensional supersonic flow of compressible fluids	106
J. W. Craggs and C. J. Tranter: The capacity of twin cable	268, 380
C. H. Dix, C. Y. Fu and E. W. McLemore: Rayleigh waves and free surface reflections	151
D. C. Drucker: (<i>See K. E. Bisshopp</i>)	
C. M. Fowler: Analysis of numerical solutions of transient heat-flow problems .	361
T. C. Fry: Some numerical methods for locating roots of polynomials	89
C. Y. Fu: (<i>See C. H. Dix</i>)	
W. Horenstein: On certain integrals in the theory of heat conductions . . .	183
J. C. Jaeger: Diffusion in turbulent flow between parallel planes	210
Th. v. Kármán and H. S. Tsien: Lifting-line theory for a wing in non-uniform flow	1
R. King and D. Middleton: The cylindrical antenna; current and impedance .	302
E. G. Kogbetliantz: Quantitative interpretation of maps of magnetic and gravitational anomalies by mathematical methods	55
W. Kohn: The spherical gyrocompass	87
C. C. Lin: On the stability of two-dimensional parallel flows.	
I. General theory	117
II. Stability in an inviscid fluid	218
III. Stability in a viscous fluid	277
A. N. Lowan: On the problem of heat conduction in a semi-infinite radiating wire	84
E. W. McLemore: (<i>See C. H. Dix</i>)	
D. Middleton: (<i>See R. King</i>)	
I. Opatowski: Cantilever beams of uniform strength	76
A. A. Popoff: A new method of integration by means of orthogonality foci . .	166
H. Poritsky and M. H. Blewett: A method of solution of field problems by means of overlapping regions	336
W. Prager: On plane elastic strain in doubly-connected domains	377

A. Preisman: Graphical analyses of nonlinear circuits	185
M. Richardson: The pressure distribution on a body in shear flow	175
H. A. Robinson: On A. A. Popoff's method of integration by orthogonality foci	383
S. A. Schaaf: A cylinder cooling problem	356
S. A. Schelkunoff: Solution of linear and slightly nonlinear differential equations	348
H. Schwerdtfeger: (<i>See D. R. Blaskett</i>)	
C. H. W. Sedgewick: On plastic bodies with rotational symmetry	178
J. J. Stoker: (<i>See E. Bromberg</i>)	
S. Timoshenko: On the treatment of discontinuities in beam deflection problems	182
C. J. Tranter: (<i>See J. W. Craggs</i>)	
H. S. Tsien: (<i>See Th. v. Kármán</i>)	
A. Vazsonyi: On rotational gas flows	29
S. E. Warschawski: On Theodorsen's method of conformal mapping of nearly circular regions	12
Book Reviews	384
