## ERRATUM TO "OSCILLATION OF AN OPERATOR"

RY

### ROBERT WHITLEY

The definition of a  $c_0$ -operator on p. 66 should be reworded to make it clear that multiplicities are counted, e.g. T is a  $c_0$ -operator if the set  $\{s\colon \omega(T,\,s)>\epsilon\}$  is finite for each  $\epsilon>0$ .

# ERRATUM TO "AUTOMORPHISMS OF GROUP EXTENSIONS"

RV

### **CHARLES WELLS**

Note 3, page 191, is incorrect. The structure theorem for Aut(E; G) given here is a generalization of Theorem 2.4 of [2]. It is not a generalization of results given in the other references in Note 3, contrary to the statement made there. The author apologizes for this slip, which occurred during a revision of the paper.
