Florin P Boca* (fboca@math.uiuc.edu), Department of Mathematics, University of Illinois,
1409 W. Green Street, Urbana, IL 61801. *Continued fractions and AF algebras.*

An AF algebra associated with the Farey tessellation and capturing the geometry of the continued fraction algorithm is defined and studied. The Effros-Shen rotation AF algebras are naturally obtained as quotients of this algebra. (Received July 20, 2006)
