**Brooke M Andersen\*** ([brandersen@assumption.edu](mailto:brandersen@assumption.edu)), 500 Salisbury Street, Worcester, MA 01520. *Using complete sets to distinguish reducibilities.*

We discuss using complete sets to distinguish strong notions of reducibility. In particular, we look at  $D^+$  reducibility, and compare this reducibility to other (positive) notions of reducibility. (Received February 11, 2013)
