1099-13-209   **Evan Houston*** (`eghousto@uncc.edu`), Dept. of Mathematics, UNC Charlotte, Charlotte, NC 28223. *Local Noetherian domains admitting only finitely many star operations.* Preliminary report.

In a previous paper, the author and M.H. Park characterized local Noetherian domains R admitting only finitely many star operations under the assumption that R has infinite residue field. In this talk, we report progress on the finite residue field case. (Received February 09, 2014)
