Michael Gekhtman* (mgekhtma@nd.edu), Department of Mathematics, University of Notre Dame, Notre Dame, IN 46530. *Generalized cluster structures in Poisson-Lie groups*. Preliminary report.

We will explain how generalized cluster structures naturally appear in the context of Poisson-Lie groups associated with the Belavin-Drinfeld classification. This is a joint project with M. Shapiro and A. Vainshtein. (Received August 25, 2016)
