Li**, Department of Mathematics, Southwest Petroleum University, Chengdu, Sichuan , Peoples Rep of China, and **Z. Wang**, Department of Mathematics, University of British Columbia, Kelowna, BC V1V1V7, Canada. *The Bregman Proximal Average*.

Proximal average is important in optimization algorithms. We provide a proximal average with respect to Legendre functions. This is a joint work with H. Bauschke, X. Li and Z. Wang. (Received September 15, 2020)
