1171-05-48　　　　**Benjamin Braun*** (`benjamin.braun@uky.edu`), University of Kentucky. *On Lattice Polytopes.*
This talk will be about lattice polytopes. It might be about triangulations of order polytopes, or it might be about symmetric edge polytopes, or it might be about arithmetic properties of simplices. We'll see what happens. But if you like lattice polytopes, and if you like combinatorics, hopefully you'll find something interesting in this talk. (Received August 06, 2021)
