

Contents

Preface	vii
Representations of two-parameter quantum orthogonal and symplectic groups N. BERGERON, Y. GAO, and N. HU	1
Optimal control of the Liouville equation R. W. BROCKETT	23
Real structures on torus bundles and their deformations F. CATANESE and P. FREDIANI	37
Cubic equations of rational triple points of dimension two Z. CHEN, R. DU, S.-L. TAN, and F. YU	63
Multi-parameter cells of finite Coxeter groups J. DU and H. RUI	77
On Some rigidity problems in Cauchy-Riemann analysis X. HUANG and S. JI	89
From CR geometry to algebraic geometry and combinatorial geometry L. JIA, H. S. LUK, and S. S.-T. YAU	109
Periods of automorphic forms D. JIANG	125
Some problems related to hamiltonian line graphs H.-J. LAI and Y. SHAO	149
Composition operators and isometries on holomorphic function spaces over domains in \mathbb{C}^n S.-Y. LI	161
Localization and string duality K. LIU	175
Polyhedral and geometric convergence of Kleinian groups Z. LONG, X. WANG, and Y. WANG	193
Rigidity problems on compact quotients of bounded symmetric domains N. MOK	201
The second main theorem with hypersurfaces over function fields M. RU	251

Presentations for finite complex reflection groups J.-Y. SHI	263
Representations of finite Lie algebras and geometry of reductive Lie algebras B. SHU	277
Perspectives on geometric analysis S. T. YAU	289
Automorphisms of K3 surfaces D.-Q. ZHANG	379
Vector bundles on certain surfaces without divisors L. ZHAO, X. ZHOU, and Q. LI	393
