In Part One

Preface.....	ix
華人數學大會前言	xi
Welcome Letter from the Congress President	xii
Past Congresses of ICCM.....	xiii
Past Morningside Medalists, Chern Prize Recipients, and ICCM International Cooperation Award Recipients.....	xiii
On the Works of the 2010 Morningside Medalists	xv
About the Medals and Awards of ICCM	xviii
The Committees of the Congress.....	xix
Sponsors, Donors and Contributors	xxi
Photographs	xxii

Papers on Pure Mathematics

Gradient and oscillation estimates and their applications in geometric PDE	3
BEN ANDREWS	
On canonical and explicit classification of algebraic threefolds.....	21
JUNGKAI A. CHEN AND MENG CHEN	
Canonical pseudonorms on pluricanonical spaces.....	33
CHEN-YU CHI	
The enigmatic Tate-Shafarevich group	43
JOHN COATES	
Eta invariants for even-dimensional manifolds	51
XIANZHE DAI	

Ricci flow on 4-manifolds and Seiberg-Witten equations	61
FUQUAN FANG AND ZHENLEI ZHANG	
Vector bundles and p -adic Galois representations	77
LAURENT FARGUES AND JEAN-MARC FONTAINE	
Geometry of nilpotent orbits: results and conjectures.....	115
BAOHUA FU	
Integrable connections and Galois representations	127
LEI FU	
Asymptotic Chow polystability in Kähler geometry	139
AKITO FUTAKI	
Representations of metaplectic groups.....	155
WEE TECK GAN	
Notes on partial conjugation	171
CHUYING FANG AND XUHUA HE	
Geometric modular forms and the cohomology of torsion automorphic sheaves.....	183
KAI-WEN LAN	
SYZ transformations for toric varieties	209
NAICHUNG CONAN LEUNG	
Some variational problems in conformal geometry	221
BIN GUO AND HAIZHONG LI	
Geometry of tamed almost complex structures on 4-dimensional manifolds	233
TEDI DRAGHICI, TIAN-JUN LI, AND WEIYI ZHANG	
The arithmetic of noncongruence modular forms.....	253
WEN-CHING WINNIE LI	
Analytic continuations of quantum cohomology	269
YUAN-PIN LEE, HUI-WEN LIN, AND CHIN-LUNG WANG	
Mathematical aspects of string duality	283
KEFENG LIU AND PAN PENG	
The tame kernels of number fields	293
XUEJUN GUO AND HOURONG QIN	
Notes on MVW-extensions.....	305
BINYONG SUN	
Vertex operator representations for a class of BCv-graded Lie algebras	315
FULIN CHEN AND SHAOBIN TAN	
Notes on orbifold Gromov-Witten theory	327
HSIAN-HUA TSENG	
Cohomologies and elliptic operators on symplectic manifolds	341
LI-SHENG TSENG	
Quasilocal mass from a mathematical perspective	355
MU-TAO WANG	
On dimension data and local vs. global conjugacy	365
SONG WANG	
Variational problems of Monge-Ampère type	383
XU-JIA WANG AND BIN ZHOU	
Wellposedness of the two and three dimensional full water wave problem	397
SIJUE WU	

Recent developments in differentiable sphere theorems	415
HONG-WEI XU	
New invariants for complex manifolds, singularities, and CR manifolds with applications	431
RONG DU AND STEPHEN YAU	
Gross-Zagier formula and arithmetic fundamental lemma	447
WEI ZHANG	
Integrality properties of mirror maps	461
JIAN ZHOU	
Ohsawa-Takegoshi L^2 extension theorem: revisited	475
XIANGYU ZHOU AND LANGFENG ZHU	

In Part Two

Papers on Applied Mathematics

Regularity of Einstein spacetimes	493
BING-LONG CHEN	
A survey on retrograde and prograde orbits of the three-body problem by variational methods	499
KUO-CHANG CHEN	
Recent development of computational conformal geometry	515
DAVID XIANFENG GU, WEI ZENG, LOK MING LUI, FENG LUO, AND SHING-TUNG YAU	
Some developments in spectral methods	561
BEN-YU GUO, CHAO ZHANG, AND TAO SUN	
On the center of mass in general relativity	575
LAN-HSUAN HUANG	
Tailored finite point method for numerical simulation of partial differential equations	593
ZHONGYI HUANG	
Loop symmetric functions and factorizing matrix polynomials	609
THOMAS LAM	
Spectral inequalities for partial differential equations and their applications	629
ARI LAPTEV	
Structured doubling algorithms for solving g -palindromic quadratic eigenvalue problems	645
ERIC KING-WAH CHU, TSUNG-MING HUANG, AND WEN-WEI LIN	
Ricci curvature and functional inequalities on graphs	663
YONG LIN	
Complexity dichotomies of counting problems	677
PINYAN LU	
A survey on recent development in computational quasi-conformal geometry and its applications	697
LOK MING LUI, TSZ WAI WONG, WEI ZENG, XIANFENG GU, PAUL M. THOMPSON, TONY F. CHAN, SHING-TUNG YAU	

Dynamics of shock fronts for some hyperbolic systems	719
TAO LUO	
Time-stepping methods for linear complementarity systems	731
LANSHAN HAN AND JONG-SHI PANG	
A brief survey of high order accurate maximum principle satisfying and positivity preserving discontinuous Galerkin and finite volume schemes for conservation laws	747
CHIWANG SHU	
A one parameter family of expanding wave solutions of the Einstein equations that induces an anomalous acceleration into the standard model of cosmology	759
JOEL SMOLLER AND BLAKE TEMPLE	
Banded matrices with banded inverses and $A = LPU$	771
GILBERT STRANG	
Dissimilarity data in statistical model building and machine learning	785
GRACE WAHBA	
Some progress on computational geometry	811
REN-HONG WANG	
Geometrization program of semilinear elliptic equations	831
JUNCHENG WEI	
Fast and near-optimal matrix completion via randomized basis pursuit	859
ZHISU ZHU, ANTHONY MAN-CHO SO, AND YINYU YE	
Mathematical questions of quantum dilute gases	883
JUN YIN	
Algebraic dynamics, canonical heights and Arakelov geometry	893
XINYI YUAN	
Well-posedness and control of the Korteweg-de Vries equation on a bounded domain	931
BING-YU ZHANG	
Statistical analysis in genetic association studies of mental illnesses	957
YUAN JIANG, HEPING ZHANG, AND WENSHENG ZHU	
Compressible Navier-Stokes equations with large density oscillation	971
HUIJIANG ZHAO	
Some results on variational and topological methods	987
WENMING ZOU
