Preface	xiii
Historical Prologue	xvii
Part 1. Systems of Nonlinear Differential Equations	
Chapter 1. Geometric Approach to Differential Equations	3
Chapter 2. Linear Systems	11
2.1. Fundamental Set of Solutions	13
Exercises 2.1	19
2.2. Constant Coefficients: Solutions and Phase Portraits	21
Exercises 2.2	48
2.3. Nonhomogeneous Systems: Time-dependent Forcing	49
Exercises 2.3	52
2.4. Applications	52
Exercises 2.4	56
2.5. Theory and Proofs	59
Chapter 3. The Flow: Solutions of Nonlinear Equations	75
3.1. Solutions of Nonlinear Equations	75
Exercises 3.1	83
3.2. Numerical Solutions of Differential Equations	84
Exercises 3.2	96
3.3. Theory and Proofs	97
Chapter 4. Phase Portraits with Emphasis on Fixed Points	109
4.1. Limit Sets	109

Exercises 4.1	114
4.2. Stability of Fixed Points	114
Exercises 4.2	119
4.3. Scalar Equations	119
Exercises 4.3	124
4.4. Two Dimensions and Nullclines	126
Exercises 4.4	133
4.5. Linearized Stability of Fixed Points	134
Exercises 4.5	143
4.6. Competitive Populations	145
Exercises 4.6	150
4.7. Applications	152
Exercises 4.7	158
4.8. Theory and Proofs	159
Chapter 5. Phase Portraits Using Scalar Functions	169
5.1. Predator–Prey Systems	169
Exercises 5.1	172
5.2. Undamped Forces	173
Exercises 5.2	182
5.3. Lyapunov Functions for Damped Systems	183
Exercises 5.3	190
5.4. Bounding Functions	191
Exercises 5.4	195
5.5. Gradient Systems	195
Exercises 5.5	199
5.6. Applications	199
Exercises 5.6	210
5.7. Theory and Proofs	210
Chapter 6. Periodic Orbits	213
6.1. Introduction to Periodic Orbits	214
Exercises 6.1	218
6.2. Poincaré–Bendixson Theorem	219
Exercises 6.2	226
6.3. Self-Excited Oscillator	229
Exercises 6.3	232
6.4. Andronov–Hopf Bifurcation	232
Exercises 6.4	240
6.5. Homoclinic Bifurcation	242

Exercises 6.5	246
6.6. Rate of Change of Volume	247
Exercises 6.6	249
6.7. Poincaré Map	251
Exercises 6.7	261
6.8. Applications	262
Exercises 6.8	271
6.9. Theory and Proofs	272
Chapter 7. Chaotic Attractors	285
7.1. Attractors	285
Exercises 7.1	289
7.2. Chaotic Attractors	291
Exercise 7.2	296
7.3. Lorenz System	297
Exercises 7.3	312
7.4. Rössler Attractor	313
Exercises 7.4	316
7.5. Forced Oscillator	317
Exercises 7.5	319
7.6. Lyapunov Exponents	320
Exercises 7.6	328
7.7. Test for Chaotic Attractors	329
Exercises 7.7	331
7.8. Applications	331
7.9. Theory and Proofs	336

Part 2. Iteration of Functions

Chapter 8. Iteration of Functions as Dynamics	343
8.1. One-Dimensional Maps	343
8.2. Functions with Several Variables	349
Chapter 9. Periodic Points of One-Dimensional Maps	353
9.1. Periodic Points	353
Exercises 9.1	362
9.2. Iteration Using the Graph	362
Exercises 9.2	366
9.3. Stability of Periodic Points	367
Exercises 9.3	382
9.4. Critical Points and Basins	386

Exercises 9.4	390
9.5. Bifurcation of Periodic Points	391
Exercises 9.5	404
9.6. Conjugacy	406
Exercises 9.6	411
9.7. Applications	412
Exercises 9.7	416
9.8. Theory and Proofs	417
Chapter 10. Itineraries for One-Dimensional Maps	423
10.1. Periodic Points from Transition Graphs	424
Exercises 10.1	435
10.2. Topological Transitivity	437
Exercises 10.2	441
10.3. Sequences of Symbols	442
Exercises 10.3	451
10.4. Sensitive Dependence on Initial Conditions	451
Exercises 10.4	454
10.5. Cantor Sets	455
Exercises 10.5	463
10.6. Piecewise Expanding Maps and Subshifts	464
Exercises 10.6	473
10.7. Applications	475
Exercises 10.7	478
10.8. Theory and Proofs	479
Chapter 11. Invariant Sets for One-Dimensional Maps	487
11.1. Limit Sets	487
Exercises 11.1	490
11.2. Chaotic Attractors	490
Exercises 11.2	505
11.3. Lyapunov Exponents	507
Exercises 11.3	513
11.4. Invariant Measures	514
Exercises 11.4	533
11.5. Applications	534
11.6. Theory and Proofs	537
Chapter 12. Periodic Points of Higher Dimensional Maps	541
12.1. Dynamics of Linear Maps	541

Exercises 12.1	555
12.2. Classification of Periodic Points	555
Exercises 12.2	566
12.3. Stable Manifolds	567
Exercises 12.3	575
12.4. Hyperbolic Toral Automorphisms	575
Exercises 12.4	580
12.5. Applications	580
Exercises 12.5	594
12.6. Theory and Proofs	595
Chapter 13. Invariant Sets for Higher Dimensional Maps	597
13.1. Geometric Horseshoe	598
Exercises 13.1	611
13.2. Symbolic Dynamics	612
Exercises 13.2	632
13.3. Homoclinic Points and Horseshoes	636
Exercises 13.3	639
13.4. Attractors	639
Exercises 13.4	649
13.5. Lyapunov Exponents	650
Exercises 13.5	661
13.6. Applications	662
13.7. Theory and Proofs	664
Chapter 14. Fractals	669
14.1. Box Dimension	670
Exercises 14.1	679
14.2. Dimension of Orbits	680
Exercises 14.2	684
14.3. Iterated-Function Systems	684
Exercises 14.3	696
14.4. Theory and Proofs	697
Appendix A. Background and Terminology	705
A.1. Calculus Background and Notation	705
A.2. Analysis and Topology Terminology	707
A.3. Matrix Algebra	713
Appendix B. Generic Properties	717
Bibliography	721
Index	727
