
Index

- Addition Law for Sines, 38
- addresses for the same point in
 - K -geometry, 94
- angle, 10, 54, 81, 99, 115
- area, 54, 127
- area in central projection coordinates, 88
- area in stereographic projection
 - coordinates, 94
- area of a smooth surface, 59
- axiom, 9

- cartesian coordinate system, 20
- Cavalieri's principle, 42
- central projection, 83
- central projection coordinates, 83
- Ceva's theorem, 30
- Chain Rule, 4, 73
- chord, 123
- Common Core State Standards in Mathematics, 2
- concurrence theorems, 29
- conformal, 93, 128
- congruence, 11, 100
- cross-ratio, 124
- cross-ratio of points on a circle, 35
- cube, 41
- curvature, 3, 72, 73

- determinant, 55
- dilation, 24
- disco-ball, 43
- displacement, 52
- distance, 21, 51

- dot-product, 53

- edge of the universe, 122, 124
- EG, 5
- Euclid's *Elements*, 9
- Euclidean coordinates, 11
- Euclidean plane, 20
- Euclidean three-space, 51
- exterior angle, 12

- group, 64, 66, 82

- HG, 5
- homogeneous, 2, 101, 103, 115
- hyperbolic geometry, 2
- hyperbolic triangle, 132
- hypotenuse, 21

- infinite hexagon, 131
- infinite K -triangle, 131
- instantaneous velocity, 56

- K -congruence, 82
- K -coordinates, 79
- K -distances, 124
- K -dot-product, 75
- K -geometry, 3, 73, 83
- K -lines, 129
- K -orthogonal, 82
- K -orthogonal matrices, 100
- K -orthogonal transformations, 100
- K -perpendicularity, 123
- K -right angles, 124
- K -rigid motion, 82, 116
- Klein model, 123

- Law of Cosines, 23
- Law of Sines, 22
- length, 75, 105
- length and angle in central projection
 - coordinates, 85
- length and angle in stereographic
 - projection coordinates, 91
- length of a smooth curve, 57
- light cone, 113
- line, 9, 104, 106, 122
- linear algebra, 4
- linear fractional transformation, 65, 126
- linear transformation, 62
- lines in hyperbolic geometry, 119
- lines in spherical geometry, 104
- lune, 46, 127, 130

- magnification factor, 24
- magnification principle, 42
- matrix notation, 53
- measure, 10

- n-gon, 14, 47, 132
- neutral geometry, 10
- NG, 5
- North Pole, 71

- orthogonal matrix, 63

- parallel, 10
- Parallel Postulate, 19
- parallelogram, 54, 75
- perpendicular, 20
- plane geometry, 9
- plane section, 88, 93
- Poincaré K-disk, 128
- Poincaré model, 128, 131
- point, 52
- position, 52
- Ptolemy's theorem, 37
- pyramid, 41
- Pythagorean theorem, 21

- quadrilateral, 14

- R-sphere, 72
- ray, 10
- rectangle, 14, 20
- regular n-gon, 44
- Riemannian geometry, 2, 71
- right angle, 10
- rigid motion, 11, 61, 80, 99, 100
- rigid motion in central projection
 - coordinates, 85
- segment, 9
- SG, 5
- shortest path, 104, 106, 121
- similar, 26
- slope, 20
- smooth curve, 56
- spherical area, 107
- spherical coordinates, 60
- spherical geometry, 99
- spherical triangles, 46, 108
- SSS, SAS, and ASA, 11
- stereographic projection, 89, 108
- stereographic projection coordinates, 89
- Substitution Rule, 5
- surface area, 43
- surface area of the sphere, 44

- tangent vector, 56
- transformations, 61
- transversal line, 12, 19
- triangle, 12
- triangle inequality, 22

- vector, 52
- vertical angle, 12
- volume of a pyramid, 43

- world sheet, 113
