## Symbols

- $A^x$ , 88
  - $\mathbb{C}$ , 275
  - $\mathcal{C}2$ , 36
  - $e$ , 96
  - $\mathcal{F}^*$ , 35
  - $\subset$ , 13
  - $\langle \cdot, \cdot \rangle$ , *see* inner product
  - $\int_a^b g$ , 168
  - $\cap$ , 22
  - $\Lambda(a)$ , 94
  - $\leq$ , 28
  - $<$ , 27
  - $\lim(\mathcal{S})$ , 61
  - $\mathbb{N}$ , 1
  - $N_a(\epsilon)$ , 99
  - $\mathbb{Q}$ , 4
  - $\mathbb{R}$ , 39
  - $\mathbb{R}^*$ , 41
  - $\sim$ , 25
  - $\mathcal{S} \rightarrow X$ , 64
  - $A \cup B$ , 152
  - $x^u$ , 96
  - $\mathbb{Z}$ , 3
- 
- Abel
    - ’s Lemma, 249
    - ’s Summation Theorem, 249
    - ’s test, 126
    - summability, 250
    - summation, 249
    - summation, 129
  - absolutely integrable, 180
  - absolute value
    - of family of intervals, 25
    - of interval, 18
    - properties, 49
    - when  $|X - A| < E$ , 49
  - addition
    - of families of intervals, 25
    - of rational intervals, 14
  - alternating series test, 123
  - amalgamation of functions, 153
  - antiderivative, 198
  - approximation
    - of reals by rationals, 55
  - arcsine, 212
  - arctangent, 212
  - arithmetic operations on reals, 44
  - average value, 176, 183
  
  - Bessel’s inequality, 281
  - betweenness, 52
  - bisection method, 38
  - bounded
    - away from 0 on a set, 142
    - on a set, 142
    - positively, 74
  - bounds for families
    - rational, 28
    - real, 64
  
  - $\mathcal{C}2$  exercise, 38
  - cancellation law
    - for real addition, 45
    - for real multiplication, 45
  - can’t be ruled out, 50
  - Cauchy
    - Completeness Theorem, 103
    - product and Abel’s Theorem, 252
    - product of series, 136
    - sequence, 102
    - sequence of functions, 224
  - Cauchy-Schwartz inequality, 282
  - chain rule, 193
  - change of variables in integrals, 210
  - comparison test
    - for improper integrals, 180
    - for series, 117

- for series of functions, 240
- Completeness Theorem, 62
- complex numbers
  - definitions, 275
- concavity,
  - and the second derivative, 208
- consistent
  - families of intervals, 25
  - family of intervals, 24
  - for families of real intervals, 60
- continuity
  - at a point (exercise), 147
  - of inverse functions, 161
  - uniform, function of 1 variable, 139
  - uniform, function of 2 variables, 213
- contraction map, 129
- convergence
  - Abel's test, 126
  - alternating series test, 123
  - Cauchy criterion, 102
  - comparison test, 117
  - of a definite integral, 177
  - Dirichlet's test
    - for improper integrals, 217
    - for series of functions, 229
    - for series of numbers, 125
  - of a series of functions, 239
  - of Fourier Series for UD functions, 285
  - $p$ -series test, 117
  - of power series in a disk, 241
  - of power series: Main Theorem, 241
  - radius of convergence, 244
  - ratio test, 121
  - root test, 121
  - of a sequence
    - Cauchy criterion, 102
  - of a sequence of functions
    - pointwise, 223
    - uniform, 224
  - of a sequence, 99
  - of a series, 113
    - absolute convergence, 120
    - conditional convergence, 120
    - tail convergence
      - for integrals, 179
      - for series, 115
- convolution, 287
- cosine function, 262
- cross
  - functions don't cross, 174
- cube root of 2 (family), 36
  - exercise, 38
- decreasing, strictly decreasing, 198
- dense, 149
- derivative
  - continuity of, 188
  - definition, 187
  - $n$ th, 204
  - partial, 213
  - uniqueness of, 188
- difference quotient, 185

  - modulus of differentiability, 187
  - $n$  times, 204
- differentiation
  - of arithmetic combinations, 192
  - of compositions, 193
  - of  $e^x$ , 188
  - of inverse functions, 194
  - of  $\ln x$ , 189
  - of power functions, 194
  - of quotients, 193
  - under the integral sign, 214
- Dirichlet's test
  - for improper integrals, 217
  - for series of functions, 229
  - for series of numbers, 125
- discontinuous functions, 157
- divergence
  - of improper integral, 178
  - of a series, 113
- divide and average (square roots), 39
- division of reals, 45
- dominated convergence
  - for parametrized functions, 215, 216
  - for sequences of functions, 235
- don't cross
  - functions don't cross, 174

- $e$ , 96
- $\epsilon$ -trichotomy, 56
- epsilon-trichotomy, 56
- Eudoxus' Method of Exhaustion, 65
- Euler number  $e$ , 96
  - $\lim(1 + 1/k)^k$ , 111
- Euler's formula, 279
- exp
  - power series, 248
  - inverse to log (exercise), 219
- exponential functions
  - as power series, 248
  - definition, 88
  - fundamental inequality
    - for rational exponents, 85
    - for real exponents, 90
  - limiting family for, 87
