<b>Preface</b>	<b>vii</b>
<b>Acknowledgements</b>	<b>xi</b>
<b>Introduction</b>	<b>xiii</b>
<b>0 Preliminaries</b>	<b>1</b>
0.1 The Natural Numbers . . . . .	1
0.2 The Rationals . . . . .	3
<b>1 The Real Numbers and Completeness</b>	<b>11</b>
1.0 Introduction . . . . .	11
1.1 Interval Arithmetic . . . . .	12
1.2 Families of Intersecting Intervals . . . . .	22
1.3 Fine Families . . . . .	32
1.4 Definition of the Reals . . . . .	39
1.5 Real Number Arithmetic . . . . .	43
1.6 Rational Approximations . . . . .	55
1.7 Real Intervals and Completeness . . . . .	58
1.8 Limits and Limiting Families . . . . .	63
Appendix: The Goldbach Number and Trichotomy . . . . .	67
<b>2 An Inverse Function Theorem and Its Application</b>	<b>69</b>
2.0 Introduction . . . . .	69
2.1 Functions and Inverses . . . . .	70
2.2 An Inverse Function Theorem . . . . .	74
2.3 The Exponential Function . . . . .	83
2.4 Natural Logs and the Euler Number $e$ . . . . .	94
<b>3 Limits, Sequences and Series</b>	<b>99</b>
3.1 Sequences and Convergence . . . . .	99
3.2 Limits of Functions . . . . .	108
3.3 Series of Numbers . . . . .	112
Appendix I: Some Properties of Exp and Log . . . . .	131
Appendix II: Rearrangements of Series . . . . .	134
<b>4 Uniform Continuity</b>	<b>139</b>
4.1 Definitions and Elementary Properties . . . . .	139
4.2 Limits and Extensions . . . . .	147
Appendix I: Are There Non-Continuous Functions? . . . . .	157
Appendix II: Continuity of Double-Sided Inverses . . . . .	161

Appendix III: The Goldbach Function . . . . .	163
<b>5 The Riemann Integral</b>	<b>165</b>
5.1 Definition and Existence . . . . .	165
5.2 Elementary Properties . . . . .	172
5.3 Extensions and Improper Integrals . . . . .	176
<b>6 Differentiation</b>	<b>185</b>
6.1 Definitions and Basic Properties . . . . .	185
6.2 The Arithmetic of Differentiability . . . . .	191
6.3 Two Important Theorems . . . . .	196
6.4 Derivative Tools . . . . .	204
6.5 Integral Tools . . . . .	211
<b>7 Sequences and Series of Functions</b>	<b>223</b>
7.1 Sequences of Functions . . . . .	223
7.2 Integrals and Derivatives of Sequences . . . . .	233
7.3 Power Series . . . . .	239
7.4 Taylor Series . . . . .	253
7.5 The Periodic Functions . . . . .	261
Appendix: Raabe's Test and Binomial Issues . . . . .	269
<b>8 The Complex Numbers and Fourier Series</b>	<b>271</b>
8.0 Introduction . . . . .	271
8.1 The Complex Numbers $\mathbb{C}$ . . . . .	275
8.2 Complex Functions and Vectors . . . . .	278
8.3 Fourier Series Theory . . . . .	284
