- connected, 135, 183, 391  
 connection 1-form, 245  
 content, 89  
 continuous, 3, 40, 89, 386  
 contraction mapping theorem, 58, 69  
 convergence, 19  
 convergent power series, 50  
 convolution, 312, 376  
 coordinate chart, 117, 148  
 coordinate system, 154  
 cos, 82, 136, 139, 195  
 countable, 383  
 covariant derivative, 232  
 covariant derivative on normal fields, 242  
 Cramer's formula, 36, 56  
 critical point, 47, 53  
 critical point of a vector field, 76, 212  
 cross product, 37, 120  
 curl, 163, 174  
 curvature, 222, 238  
 curvature (2,2)-form, 249  
 curvature 2-form, 245  
 curvature vector, 238  
 curve, 120, 136, 154  
  
 Darboux theorem, 4, 89, 144  
 de Rham cohomology, 417  
 definition vs. formula, 34  
 deformation retract, 435  
 Deg, 205, 210  
 degree, 205, 209, 214, 416  
 degree of Gauss map, 252  
 dense, 338, 383  
 derivation, 75  
 derivative, 7, 40, 124  
 derived representation, 354, 358  
 det, 31, 86  
 determinant, 31, 55, 156  
 diffeomorphism, 57, 117, 133, 155  
 differentiability of power series, 51  
 differentiable, 7, 40, 124  
 differential equation, 68  
 differential form, 154  
 differential operator, 75  
 dimension, 25  
 Dini's theorem, 392  
 Dirichlet problem, 293, 308, 332, 342, 343, 411  
 disk, 378  
 distance, 18, 382  
 distribution, 305  
 div, 129, 163, 170, 203  
  
 divergence, 129, 203  
 divergence theorem, 170, 172, 175  
 dot product, 17  
 dual space, 302, 321  
 Duhamel's formula, 72, 86, 284  
  
 eigenfunction, 335  
 eigenspace, 398  
 eigenvalue, 134, 335, 398  
 eigenvector, 134, 398  
 ellipsoid, 113  
 embedding, 133  
 energy functional, 221, 226  
 Euclidean metric tensor, 121  
 Euclidean space, 17, 41  
 Euler characteristic, 213, 253, 428  
 Euler's formula, 82, 140, 402  
 Euler's other formula, 215, 257  
 $\text{Exp}_p$ , 233  
 exact form, 162, 200, 416  
 exactness criterion, 208  
 $\text{Exp}$ , 61, 86, 123, 140, 402  
 expansion by minors, 36  
 exponential function, 81  
 exponential map, 123, 222, 233, 283  
 exterior derivative, 161  
 exterior product, 160  
 extremal problem, 47  
  
 fixed point, 57  
 flat torus, 132  
 flow, 75  
 Fourier coefficients, 294  
 Fourier inversion formula, 291, 292, 294, 303, 306, 313, 317, 321, 325  
 Fourier series, 291, 294  
 Fourier transform, 292, 310  
 Fubini's theorem, 92, 102, 115  
 fundamental theorem of algebra, 191, 214, 398  
 fundamental theorem of calculus, 7, 40, 165, 226, 230, 233, 403  
 fundamental theorem of linear algebra, 27, 126, 337  
 Funk-Hecke theorem, 350, 375  
  
 $Gl(n, \mathbb{R})$ , 41  
 $Gl_+(n, \mathbb{R})$ , 134, 135, 182  
 Gamma function, 122, 197, 331  
 Gauss *theorema egregium*, 224, 246  
 Gauss angle defect formula, 257

- Gauss curvature, 216, 223, 239, 242, 244, 249, 250, 252, 261  
 Gauss linking number formula, 220  
 Gauss map, 213, 239  
 Gauss-Bonnet formula, 216  
 Gauss-Bonnet theorem, 224, 253  
 Gaussian integral, 103  
 Gegenbauer polynomials, 344  
 generalized eigenspace, 289, 402  
 generalized Gauss-Bonnet theorem, 260  
 generating function, 344  
 geodesic curvature, 258  
 geodesic equation, 221, 226, 229, 230, 237, 277  
 geodesic triangle, 257  
 geodesics, 221, 225  
 geometric series, 308  
 global diffeomorphism, 60  
 grad, 163  
 Gramm-Schmidt construction, 395  
 Green formulas, 173  
 Green's theorem, 169, 177, 187, 379  
 group, 278  
  
 Haar measure, 124, 208, 350  
 Hamiltonian system, 231  
 Hamiltonian vector field, 176  
 harmonic, 179, 187, 190, 198, 308, 410  
 harmonic conjugate, 193  
 harmonic form, 419, 420  
 harmonic function, 332  
 harmonic polynomial, 336, 342  
 Harnack's inequality, 413  
 Heine-Borel theorem, 21, 384  
 Hessian, 46  
 Hilbert space, 395  
 Hodge decomposition, 419, 422  
 Hodge Laplacian, 420  
 holomorphic, 53, 66, 186  
 homotopic, 200, 213  
 homotopy invariance, 210, 214  
 Hopf index theorem, 428  
 Hopf invariant, 429  
  
 implicit function theorem, 62, 125  
 index of a vector field, 212  
 inf, 2  
 injective, 25  
 inner product, 119, 151, 301, 314, 393  
 inner tube, 140, 217  
 integral equation, 68  
 integral of an  $n$ -form, 157  
  
 integral test, 15  
 integrating factor, 164  
 integration by parts, 14, 122  
 interior, 90, 383  
 interior product, 161, 201  
 intermediate value theorem, 391  
 interval, 2  
 inverse, 25  
 inverse Fourier transform, 310  
 inverse function theorem, 56, 117, 123, 124, 196  
 invertible, 29, 35  
 irreducible representation, 280, 352  
 isometric embedding, 134  
 isomorphism, 25  
 isoperimetric inequality, 378  
 isothermal coordinates, 248  
 iterated integral, 92  
  
 Jacobi field, 287  
 Jacobi inversion formula, 331  
 Jacobi variational equation, 286  
 Jordan curve theorem, 212  
 Jordan-Brouwer separation theorem, 211  
  
 Kunneth formula, 427  
  
 ladder operators, 356  
 Lagrange remainder formula, 48, 403, 407  
 Laplace operator, 172, 177, 178, 190, 198, 335, 410  
 Lebesgue integral, 300, 318  
 Lebesgue measure, 6  
 Legendre polynomials, 345, 360  
 length, 225  
 length functional, 221, 226  
 Levi-Civita covariant derivative, 222, 232  
 Lie algebra, 268  
 Lie algebra isomorphism, 359  
 Lie algebra representation, 354  
 Lie bracket, 78, 267, 353  
 Lie derivative, 78, 202  
 Lie group, 278  
 linear system of ODE, 71  
 linear transformation, 23, 40  
 linearization of an ODE, 73  
 linearly dependent, 25  
 linearly independent, 25  
 linking number, 219  
 Liouville's theorem, 191, 197, 413  
 Lipschitz, 92  
 local diffeomorphism, 60

- local maximum, 47, 53  
 local minimum, 47, 53  
 log, 81, 195  
 lower content, 5, 89
- $M(n, \mathbb{F})$ , 30, 31, 86  
 $M(n, \mathbb{R})$ , 123  
 manifold, 131, 148
