Preface	vii
Some basic notation	xi
Chapter 1. Background	1
1.1. One-variable calculus	2
1.2. Euclidean spaces	17
1.3. Vector spaces and linear transformations	22
1.4. Determinants	31
Chapter 2. Multivariable differential calculus	39
2.1. The derivative	39
2.2. Inverse function and implicit function theorems	56
2.3. Systems of differential equations and vector fields	68
Chapter 3. Multivariable integral calculus and calculus on surfaces	87
3.1. The Riemann integral in n variables	88
3.2. Surfaces and surface integrals	117
3.3. Partitions of unity	145
3.4. Sard's theorem	146
3.5. Morse functions	147
3.6. The tangent space to a manifold	148
Chapter 4. Differential forms and the Gauss-Green-Stokes formula	153
4.1. Differential forms	154
4.2. Products and exterior derivatives of forms	160
4.3. The general Stokes formula	164

4.4. The classical Gauss, Green, and Stokes formulas	169
4.5. Differential forms and the change of variable formula	179
Chapter 5. Applications of the Gauss-Green-Stokes formula	185
5.1. Holomorphic functions and harmonic functions	186
5.2. Differential forms, homotopy, and the Lie derivative	200
5.3. Differential forms and degree theory	205
Chapter 6. Differential geometry of surfaces	221
6.1. Geometry of surfaces I: geodesics	225
6.2. Geometry of surfaces II: curvature	238
6.3. Geometry of surfaces III: the Gauss-Bonnet theorem	252
6.4. Smooth matrix groups	265
6.5. The derivative of the exponential map	283
6.6. A spectral mapping theorem	288
Chapter 7. Fourier analysis	291
7.1. Fourier series	294
7.2. The Fourier transform	310
7.3. Poisson summation formulas	330
7.4. Spherical harmonics	332
7.5. Fourier series on compact matrix groups	372
7.6. Isoperimetric inequality	378
Appendix A. Complementary material	381
A.1. Metric spaces, convergence, and compactness	382
A.2. Inner product spaces	393
A.3. Eigenvalues and eigenvectors	398
A.4. Complements on power series	402
A.5. The Weierstrass theorem and the Stone-Weierstrass theorem	408
A.6. Further results on harmonic functions	410
A.7. Beyond degree theory—introduction to de Rham theory	416
Bibliography	437
Index	441
