# Index

- analytic function, 98
- ballistic targeting model, 110, 139
- bifurcation diagram
  - definition of, 44
  - turning points, 49
- biochemical switch model, 53
- brachistochrone, 162
- Buckingham  $\pi$ -theorem, 8
- $C^n[a, b]$ 
  - definition of, 143
  - distance, 147
  - neighborhood, 147
  - norm, 147
- calculus of variations
  - boundary condition
    - essential, 167, 175, 182
    - natural, 167, 175, 182
  - concavity theorem, 189
  - cost functional, 179
  - extremal, 155, 175, 182
  - extremum
    - absolute, 145
    - local, 148
  - first integral, 158
  - first-order problem
    - constrained, 181
    - fixed-fixed, 154
    - fixed-free, 166
  - functional
    - definition of, 144
    - first variation, 152
    - second variation, 152
  - fundamental lemma, 156, 160
  - necessary conditions, 151
  - reduced forms, 158
  - second-order problem, 174
  - sign lemma, 156, 161
  - sufficient condition, 189
  - variations
    - of a function, 151
    - space of, 150
- catenary curve, 188, 201
- catenoid surface, 201
- contraction mapping theorem, 110
- cycloid curve, 165
- digestion model, 16, 196
- dimension
  - axioms of, 3
  - basis of, 1
  - definition of, 1
- dimensional exponents, 2
- dimensionless quantity, 3
- domino toppling model, 16
- duBois-Reymond lemma, 195
- dynamical system, 1D
  - bifurcation diagram, 44
  - definition of, 37
  - derivative test, 43
  - equilibrium
    - asymptotically stable, 41
    - attractor, 42
    - definition of, 39
    - hyperbolic, 42
    - neutrally stable, 41

- repeller, 42
  - unstable, 41
- monotonicity theorem, 40
- phase view, 37
- potential function, 51
- solvability theorem, 38
- time view, 37
- velocity, 37
- dynamical system, 2D
  - bifurcation, 77
  - definition of, 55
  - direction field, 57
  - equilibrium
    - asymptotically stable, 60
    - definition of, 60
    - neutrally stable, 60
    - unstable, 60
  - first integral, 59
  - incr/decreasing regions, 57
  - linear
    - center, 68
    - definition of, 64
    - improper node, 67
    - nondegenerate, 64
    - phase diagrams, 65
    - saddle, hyperbolic point, 66
    - spiral, 68
    - stable node, attractor, 65
    - unstable node, repeller, 66
  - maximal orbit, path, 56
  - nonlinear center theorem, 76
  - nullclines, 57
  - orbit, path, 55
  - path equation, 58
  - periodic orbit theorem, 73
  - periodic, closed orbit
    - asymptotically stable, 63
    - definition of, 62
    - limit cycle, 63
    - neutrally stable, 63
    - period, 62
    - unstable, 63
  - phase view, 55
  - solvability theorem, 56
  - time view, 55
  - trapping region, 74
  - velocity, 55
- Dzhanibekov effect, 84
- epidemic, SIR
  - basic reproduction number, 79
  - generalized model, 91
  - outbreak condition, 81
  - plain model, 78
  - recovery coefficient, 79
  - transmission coefficient, 78
- Euler equations, 82, 94
- Euler's formula, 67
- Euler-Lagrange eqns, 155, 175, 182
- explosion model, 16
- Fermat's principle, 196
- fishery model, 52
- fuel consumption model, 17
- glycolysis dynamics, 93
- growth model, 16
- Hartman-Grobman theorem, 70
- Holling consumption model, 47
- implicit function theorem, 104
- insecticide dynamics, 88
- isoperimetric problem, 181
- Jacobian, 70
- Lagrange multiplier rule, 182
- Lagrangian, 154, 174
- Legendre condition, 155, 175, 182
- linear space, 144
- Lipschitz condition, 110
- liquid-gas interface
  - meniscus, 127
  - model, 127, 139, 141
  - surface tension, 127
  - wetting angle, 127
- logistic growth model, 47
- Lotka-Volterra equations, 90
- Lyapunov function, 89
- Mercury orbit model, 140
- Michaelis-Menten model, 138
- multiscale function, 24
- Newton polygon method, 105
- non-ideal gas model, 136
- optimal shape, control
  - boat steering, 170, 201
  - car acceleration, 177, 199
  - food intake schedule, 196
  - hanging chain, 186, 202
  - playground slide, 161
  - soap film, 200
- order symbols  $o, O$ , 99

- oscillations
  - chemical, 90, 93
  - electrical, 91
  - see also* pendulum
  - see also* predator-prey system
  - see also* spring-mass
- parameter
  - definition of, 19
  - for bifurcation, 44
- pendulum
  - damped, 91
  - equation of motion, 13, 17
  - model, 12
  - period equation, 13
  - period law, 14
- perturbed equation
  - definition of, 95
  - regular algebraic
    - approximation, 101
    - degenerate root, 105
    - standard series, 101
    - theorem on, 100
  - regular differential
    - approximation, 108
    - periodic solution, 114
    - secular term, 115
    - standard series, 107
    - theorem on, 107
