Preface	ix
Note to instructors	xi
Case studies and mini-projects	xiii
Chapter 1. Dimensional analysis	1
1.1. Units and dimensions	1
1.2. Axioms of dimensions	2
1.3. Dimensionless quantities	3
1.4. Change of units	4
1.5. Unit-free equations	4
1.6. Buckingham π -theorem	7
1.7. Case study	11
Reference notes	14
Exercises	14
Mini-project	17
Chapter 2. Scaling	19
2.1. Domains and scales	19
2.2. Scale transformations	20
2.3. Derivative relations	22
2.4. Natural scales	23
2.5. Scaling theorem	26
2.6. Case study	29
Reference notes	31

Exercises	31
Mini-project	34
Chapter 3. One-dimensional dynamics	37
3.1. Preliminaries	37
3.2. Solvability theorem	38
3.3. Equilibria	39
3.4. Monotonicity theorem	40
3.5. Stability of equilibria	41
3.6. Derivative test for stability	43
3.7. Bifurcation of equilibria	44
3.8. Case study	46
Reference notes	50
Exercises	50
Mini-project	53
Chapter 4. Two-dimensional dynamics	55
4.1. Preliminaries	55
4.2. Solvability theorem	56
4.3. Direction field, nullclines	57
4.4. Path equation, first integrals	58
4.5. Equilibria	60
4.6. Periodic orbits	62
4.7. Linear systems	64
4.8. Equilibria in nonlinear systems	70
4.9. Periodic orbits in nonlinear systems	73
4.10. Bifurcation	77
4.11. Case study	77
4.12. Case study	81
Reference notes	86
Exercises	86
Mini-project 1	92
Mini-project 2	92
Mini-project 3	93
Chapter 5. Perturbation methods	95
5.1. Perturbed equations	95
5.2. Regular versus singular behavior	96
5.3. Assumptions, analytic functions	98
5.4. Notation, order symbols	99

5.5. Regular algebraic case	100
5.6. Regular differential case	107
5.7. Case study	110
5.8. Poincaré–Lindstedt method	114
5.9. Singular algebraic case	118
5.10. Singular differential case	121
5.11. Case study	127
Reference notes	132
Exercises	133
Mini-project 1	139
Mini-project 2	140
Mini-project 3	141
Chapter 6. Calculus of variations	143
6.1. Preliminaries	143
6.2. Absolute extrema	145
6.3. Local extrema	147
6.4. Necessary conditions	150
6.5. First-order problems	154
6.6. Simplifications, essential results	158
6.7. Case study	161
6.8. Natural boundary conditions	166
6.9. Case study	170
6.10. Second-order problems	174
6.11. Case study	177
6.12. Constraints	181
6.13. Case study	186
6.14. A sufficient condition	189
Reference notes	193
Exercises	193
Mini-project 1	200
Mini-project 2	201
Mini-project 3	202
Bibliography	205
Index	207
