Instructors' Guide and Background	xi
Chapter 1. What is Calculus? The Six Pillars	1
Chapter 2. Predicting the Future: The SIR Model	7
2.1. Worried Sick	8
2.2. Building the SIR Model	9
2.3. Analyzing the Model Numerically	13
2.4. Theoretical Analysis: What Goes Up Has to Stop Before It Comes Down	17
2.5. Covid-19 and Modified SIR Models	18
2.6. Same Song, Different Singer: SIR and Product Marketing	21
2.7. Chapter Summary	23
2.8. Exercises	24
Chapter 3. Close is Good Enough	33
3.1. The Idea of Approximation	33
3.2. Functions	37
3.3. Linear Functions and Their Graphs	40
3.4. Linear Approximations and Microscopes	43
3.5. Euler's Method and Compound Interest	45
3.6. The SIR Model by Computer	48
3.7. Solving Algebraic Equations	51
3.8. Chapter Summary	54
3.9. Exercises	55

---

Chapter 4. Track the Changes	61
4.1. Atmospheric Carbon	61
4.2. Other Derivatives and Marginal Quantities	63
4.3. Local Linearity and Microscopes	65
4.4. The Derivative	68
4.5. A Global View	73
4.6. Chapter Summary	77
4.7. Exercises	79
Chapter 5. Computing and Using Derivatives (What Goes Up Has to Stop Before It Comes Down)	87
5.1. Building Blocks	88
5.2. Adding, Subtracting, Multiplying, and Dividing Functions	93
5.3. The Chain Rule	99
5.4. Optimization	103
5.5. The Shape of a Graph	107
5.6. Newton's Method	116
5.7. Chapter Summary	122
5.8. Supplemental Material: Small Angle Approximations	124
5.9. Exercises	126
Chapter 6. Models of Growth and Oscillation	137
6.1. Modeling with Differential Equations	139
6.2. Exponential Functions and Logarithms	146
6.3. Simple Models of Growth and Decay	153
6.4. Two Models of Oscillation	156
6.5. More Sophisticated Population Models	160
6.6. Chemistry	165
6.7. Chapter Summary	167
6.8. Supplemental Material: A Crash Course in Trigonometry	168
6.9. Exercises	180
Chapter 7. The Whole Is the Sum of the Parts	197
7.1. Slicing and Dicing	198
7.2. Riemann Sums	207
7.3. The Definite Integral	212
7.4. The Accumulation Function	217
7.5. Chapter Summary	220
7.6. Exercises	221

---

Chapter 8. The Fundamental Theorem of Calculus (One Step at a Time)	233
8.1. Three Different Quantities	234
8.2. FTC2: The Integral of the Derivative	237
8.3. FTC1: The Derivative of the Accumulation	240
8.4. Anti-Derivatives and Ballistics	245
8.5. Computing Anti-Derivatives	249
8.6. Chapter Summary	250
8.7. Exercises	251
Chapter 9. Methods of Integration	259
9.1. Integration by Substitution	260
9.2. Integration by Parts	263
9.3. Numerical Integration	269
9.4. Chapter Summary	276
9.5. Exercises	278
Chapter 10. One Variable at a Time	295
10.1. Partial Derivatives	296
10.2. Linear Approximations	302
10.3. Double Integrals and Iterated Integrals	305
10.4. Chapter Summary	311
10.5. Exercises	312
Chapter 11. Taylor Series	325
11.1. What Does $\pi = 3.14159265 \dots$ Mean?	326
11.2. Power Series	329
11.3. Taylor Polynomials and Taylor Series	331
11.4. Sines, Cosines, Exponentials, and Logs	335
11.5. Tests for Convergence	342
11.6. Intervals of Convergence	348
11.7. Chapter Summary	352
11.8. Exercises	353
Index	361
