Introduction	xiii
Stéphane Guillermou & Pierre Schapira — <i>Construction of sheaves on the subanalytic site</i>	
Introduction	1
Acknowledgments	4
1. Subanalytic topologies	4
1.1. Linear coverings	4
Notations and conventions	4
The site M_{sa}	5
The site M_{sal}	5
1.2. Regular coverings	9
2. Sheaves on subanalytic topologies	12
2.1. Sheaves	12
Usual notations	12
Sheaves on M and M_{sa}	13
Sheaves on M and M_{sal}	13
Sheaves on M_{sa} and M_{sal}	14
2.2. Γ -acyclic sheaves	17
Čech complexes	17
Acyclic sheaves	18
2.3. The functor $\rho_{\text{sal}}^!$	20
Direct sums in derived categories	20
The functor $\text{R}\Gamma(U; \bullet)$	23
The functor $\text{R}\rho_{\text{sal}*}$	24
2.4. Open sets with Lipschitz boundaries	25
Normal cones and Lipschitz boundaries	25
A vanishing theorem	27
3. Operations on sheaves	30
3.1. Tensor product and internal hom	30
3.2. Operations for closed embeddings	30
f -regular open sets	30

Inverse and direct images by closed embeddings	34
3.3. Operations for submersions	36
Another subanalytic topology	36
Inverse and direct images	37
4. Construction of sheaves	38
4.1. Sheaves on the subanalytic site	38
Temperate growth	38
A cutoff lemma on M_{sa}	39
Gevrey growth	39
4.2. Sheaves on the linear subanalytic site	40
Temperate growth of a given order	40
Gevrey growth of a given order	41
Rings of differential operators	42
4.3. A refined cutoff lemma	43
4.4. A comparison result	44
4.5. Sheaves on complex manifolds	46
Sheaves on complex manifolds	46
Solutions of holonomic \mathcal{D} -modules	47
5. Filtrations	48
5.1. Derived categories of filtered objects	48
Complements on abelian categories	48
Abelian tensor categories	50
Derived categories of filtered objects	50
Complements on filtered objects	51
5.2. Filtrations on $\mathcal{O}_{X_{\text{sal}}}$	53
The filtered ring of differential operators	54
The L^∞ -filtration on $\mathcal{C}_{M_{\text{sal}}}^{\infty, \text{tp}}$	56
The L^∞ -filtration on $\mathcal{O}_{X_{\text{sal}}}^{\text{tp}}$	56
5.3. A functorial filtration on regular holonomic modules	57
References	59
Gilles Lebeau — Sobolev spaces and Sobolev sheaves	61
1. Introduction	62
Acknowledgement	63
2. Notations and basic results on Sobolev spaces	63
3. The case of Lipschitz U	65
The case $s \geq 0$	68
The case $s \leq 0$	70
4. The spaces $X^t(U)$ and $Y^s(U)$	72
4.1. The spaces $X^t(U)$	72
4.2. The spaces $Y^s(U)$	79
5. The sheaf \mathcal{H}^s	80

5.1. The sheaf \mathcal{H}^s for $s \leq 0$	81
5.2. The sheaf \mathcal{H}^s on \mathbb{R}^2 , with $s \leq 0$	83
6. Appendix	86
6.1. Interpolation	86
6.2. The usual definition of Sobolev spaces	89
The case $s \geq 0$	90
The case $s < 0$	92
References	94
Adam Parusiński — <i>Regular subanalytic covers</i>	95
1. Proofs	96
1.1. Reduction to the case $M = \mathbb{R}^n$	96
1.2. Regular projections	97
1.3. Cylindrical decomposition	97
1.4. The case of a regular projection	98
1.5. Proof of Theorem 0.2	98
1.6. L-regular sets	99
1.7. Proof of Theorem 0.3	100
1.8. Proof of Theorem 0.1	101
2. Remarks on the o-minimal case	102
References	102
Pierre Schapira & Jean-Pierre Schneiders — <i>Derived categories of filtered objects</i>	103
1. Introduction	103
2. A review on quasi-abelian categories	104
Derived categories	105
Left t -structure	106
Derived functors	106
3. Filtered objects	107
Basic properties of $F_\Lambda(\mathcal{C})$	108
The Rees functor	111
4. Filtered modules in an abelian tensor category	113
Abelian tensor categories	113
Λ -rings and Λ -modules	115
Filtered rings and modules	116
Example: modules over a filtered sheaf of rings	119
