Preface to the Fourth Edition	vii
Preface to the Third Edition	ix
1 Sets	1
1 Sets	1
2 Sets of real numbers	5
3 Countable and uncountable sets	8
4 Metric spaces	21
5 Open and closed sets	25
6 Dense and nowhere dense sets	38
7 Compactness	45
8 Convergence and completeness	52
9 Nested sets and Baire's theorem	61
10 Some applications of Baire's Theorem	66
11 Sets of measure zero	73
2 Functions	77
12 Functions	77
13 Continuous functions	83
14 Properties of continuous functions	90
15 Upper and lower limits	105

16	Sequences of functions	108
17	Uniform convergence	112
18	Pointwise limits of continuous functions . .	123
19	Approximations to continuous functions . .	126
20	Linear functions	132
21	Derivatives	139
22	Monotonic functions	158
23	Convex functions	175
24	Infinitely differentiable functions	186
3	Integration	195
25	Lebesgue measure	195
26	Measurable functions	201
27	Definition of the Lebesgue integral	206
28	Properties of Lebesgue integrals	211
29	Applications of the Lebesgue integral	217
30	Stieltjes integrals	224
31	Applications of the Stieltjes integral	229
32	Partial sums of infinite series	237
	Answers to Exercises	245
	Index	281
