

CONTENTS

CHAPTER	PAGE
1. FUNDAMENTALS OF COMBINATORIAL MATHEMATICS	1
1. What is combinatorial mathematics?	1
2. Sets	3
3. Samples	5
4. Unordered selections	7
5. Binomial coefficients	12
References for Chapter 1	16
2. THE PRINCIPLE OF INCLUSION AND EXCLUSION	17
1. A fundamental formula	17
2. Applications to number theory	19
3. Derangements	22
4. The permanent	24
References for Chapter 2	28
3. RECURRENCE RELATIONS	29
1. Some elementary recurrences	29
2. Ménage numbers	31
3. Latin rectangles	35
References for Chapter 3	37
4. A THEOREM OF RAMSEY	38
1. A fundamental theorem	38
2. Applications	43
References for Chapter 4	46
5. SYSTEMS OF DISTINCT REPRESENTATIVES	47
1. A fundamental theorem	47
2. Partitions	50
3. Latin rectangles	52
4. Matrices of zeros and ones	53
5. Term rank	55
References for Chapter 5	59

6. MATRICES OF ZEROS AND ONES	61
1. The class $\mathfrak{U}(R, S)$	61
2. An application to Latin rectangles	65
3. Interchanges	67
4. Maximal term rank	70
5. Related problems	76
References for Chapter 6	78
7. ORTHOGONAL LATIN SQUARES	79
1. Existence theorems	79
2. The Euler conjecture	84
3. Finite projective planes	89
4. Projective planes and Latin squares	92
References for Chapter 7	94
8. COMBINATORIAL DESIGNS	96
1. The (b, v, r, k, λ) -configuration	96
2. The (v, k, λ) -configuration	102
3. A nonexistence theorem	108
4. The matrix equation $AA^T = B$	116
5. Extremal problems	122
References for Chapter 8	127
9. PERFECT DIFFERENCE SETS	131
1. Perfect difference sets	131
2. The multiplier theorem	134
References for Chapter 9	141
LIST OF NOTATION	143
INDEX	147
