

CONTENTS

Chapter One

THE CENTRAL FORCE PROBLEM

1

1. <i>Formulation of the problem</i>	1
2. <i>The conservation of angular momentum: Kepler's second law</i>	2
3. <i>The conservation of energy</i>	5
4. <i>The inverse square law: Kepler's first law</i>	6
5. <i>Relations among the constants</i>	10
6. <i>Orbits under non-Newtonian attraction</i>	14
7. <i>Position on the orbit: the case $h = 0$</i>	16
8. <i>Position on the orbit: the case $h \neq 0$</i>	20
9. <i>Position on the orbit: the case $h > 0$</i>	23
10. <i>Position on the orbit: the case $h < 0$</i>	24
11. <i>Determination of the path of a particle</i>	28
12. <i>Expansions in elliptic motion</i>	33
13. <i>Elements of an orbit</i>	36
14. <i>The two-body problem</i>	38
15. <i>The solar system</i>	43
16. <i>Disturbed motion</i>	46
17. <i>Disturbed motion: variation of the elements</i>	49
18. <i>Disturbed motion: geometric effects</i>	53

Chapter Two

INTRODUCTION TO THE n -BODY PROBLEM 57

- | | |
|---|----|
| 1. <i>The basic equations: conservation of linear momentum</i> | 57 |
| 2. <i>The conservation of energy: the Lagrange-Jacobi formula</i> | 60 |
| 3. <i>The conservation of angular momentum</i> | 63 |
| 4. <i>Sundman's theorem of total collapse</i> | 65 |
| 5. <i>The virial theorem</i> | 67 |
| 6. <i>Growth of the system</i> | 69 |
| 7. <i>The three-body problem: Jacobi coordinates</i> | 71 |
| 8. <i>The Lagrange solutions</i> | 74 |
| 9. <i>Euler's solution</i> | 76 |
| 10. <i>The restricted three-body problem</i> | 78 |
| 11. <i>The circular restricted problem: the Jacobi constant</i> | 82 |
| 12. <i>Equilibrium solutions</i> | 85 |
| 13. <i>The curves of zero velocity</i> | 90 |

Chapter Three

INTRODUCTION TO HAMILTON-JACOBI THEORY 93

- | | |
|--|-----|
| 1. <i>Canonical transformations</i> | 93 |
| 2. <i>An application of canonical transformations</i> | 98 |
| 3. <i>Canonical transformations generated by a function</i> | 102 |
| 4. <i>Generating functions</i> | 106 |
| 5. <i>Application to the central force and restricted problems</i> | 111 |
| 6. <i>Equilibrium points and their stability</i> | 117 |
| 7. <i>Infinitesimal stability</i> | 121 |
| 8. <i>The characteristic roots</i> | 124 |
| 9. <i>Conditions for stability</i> | 126 |
| 10. <i>The stability of the libration points</i> | 129 |
