

# Contents

<b>I</b>	<b>Complex Numbers</b>	<b>1</b>
I.1	The real number system . . . . .	1
I.2	Definition of the complex number field . . . . .	3
I.3	Elementary complex geometry . . . . .	8
I.4	Alternative definitions of the complex numbers . . .	12
I.5	Completeness . . . . .	15
I.6	Convergence for power series . . . . .	18
I.7	Trigonometry . . . . .	24
I.8	Roots of unity . . . . .	30
I.9	Summary . . . . .	32
<b>II</b>	<b>Complex Euclidean Spaces and Hilbert Spaces</b>	<b>33</b>
II.1	Hermitian inner products . . . . .	33
II.2	Orthogonality, projections and closed subspaces . .	45
II.3	Orthonormal expansion . . . . .	51
II.4	The polarization identity . . . . .	53
II.5	Generating functions and orthonormal systems . . .	55
<b>III</b>	<b>Complex Analysis in Several Variables</b>	<b>63</b>
III.1	Holomorphic functions . . . . .	63
III.2	Some calculus . . . . .	72
III.3	The Bergman kernel function . . . . .	78

<b>IV</b>	<b>Linear Transformations and Positivity Conditions</b>	<b>89</b>
IV.1	Adjoins and Hermitian forms . . . . .	90
IV.2	Solving linear equations . . . . .	97
IV.3	Linearization . . . . .	101
IV.4	Eigenvalues and the spectral theorem in finite dimensions . . . . .	105
IV.5	Positive definite linear transformations in finite dimensions . . . . .	110
IV.6	Hilbert's inequality . . . . .	124
IV.7	Additional inequalities from Fourier analysis . . . . .	129
<b>V</b>	<b>Compact and Integral Operators</b>	<b>143</b>
V.1	Convergence properties for bounded linear transformations . . . . .	143
V.2	Compact operators on Hilbert space . . . . .	146
V.3	The spectral theorem for compact Hermitian operators . . . . .	153
V.4	Integral operators . . . . .	162
V.5	A glimpse at singular integral operators . . . . .	166
<b>VI</b>	<b>Positivity Conditions for Real-valued Functions</b>	<b>175</b>
VI.1	Real variables analogues . . . . .	175
VI.2	Real-valued polynomials on $\mathbf{C}^n$ . . . . .	182
VI.3	Squared norms and quotients of squared norms . . . . .	193
VI.4	Plurisubharmonic functions . . . . .	197
VI.5	Positivity conditions for polynomials . . . . .	207
<b>VII</b>	<b>Stabilization and Applications</b>	<b>217</b>
VII.1	Stabilization for positive bihomogeneous polynomials . . . . .	217
VII.2	Positivity everywhere . . . . .	222
VII.3	Positivity on the unit sphere . . . . .	225
VII.4	Applications to proper holomorphic mappings between balls . . . . .	227

<b>Contents</b>	<b>ix</b>
VII.5 Positivity on zero sets.....	231
VII.6 Proof of stabilization.....	233
<b>VIII Afterword</b>	<b>243</b>
<b>Appendix A</b>	<b>247</b>
A.1 Algebra.....	247
A.2 Analysis.....	250
<b>Bibliography</b>	<b>257</b>
<b>Index</b>	<b>261</b>
