

# Index

- Additive character, 35
- Additive energy, 166
- Algebraic method, 31
- Arithmetic progression, 138
  
- Bézout's little theorem, 19
- Binary operation, 8
  
- Cap-set problem, 159
- Cauchy-Schwarz inequality, 16
- Cayley graph, 163
- Character, 35, 81
- Characteristic (field), 14
- Characteristic function, 37
- Chinese remainder theorem, 86, 103, 154
- Completing the square, 44, 103
- Convolution, 72
  
- Direction (of line), 4
- Distance graph, 121
- Distance set
  - Euclidean, 22
  - finite field, 28
  - integers mod  $n$ , 76
- Dot-product problem, 143
- Dvir's theorem, 151
  
- Elekes-Sharir framework, 23, 111
- Energy set, 112
- Equivalence class, 2
- Equivalence relation, 2
- Erdős distance problem, 22
- Erdős unit-distance problem, 23
- Erdős-Falconer distance problem
  - finite field, 31
  - integer mod  $n$ , 76
- Euclid's algorithm, 19
- Extension field, 14
  
- Falconer distance problem, 25
- Fano plane, 8
- Fermat's two-squares theorem, 33
- Field, 13
- Field trace, 36
- Finite configuration, 105
- Finite field distance problem, 29
- Finite field restriction problem, 72
- Fourier transform

- finite field, 37
  - integer mod  $n$ , 77
- Freiman's theorem, 140
- Gauss sum, 44, 82, 83
- General linear group, 13, 127
- Graph theory, 120
  - adjacent, 121
  - chromatic number, 121, 126
  - connected, 121
  - crossing number, 121
  - degree, 121
  - directed graph, 121
  - finite graph, 121
  - incident, 121
  - loop, 121
  - multigraph, 121
  - path, 121
  - regular graph, 121
  - simple graph, 121
  - undirected graph, 121
- Group, 12
- Hölder's inequality, 16
- Hausdorff dimension, 25, 147
- Hensel's lemma, 154
- Incidence, 24
- Incidence theory, 129
- Integers mod  $n$ , 2
- Interpolation, 103
- Inversion theorem
  - finite field, 38
  - integers mod  $n$ , 77
- $k$ -resultant set, 94
- $k$ -simplex, 106
- $k$ -star, 125
- Keakeya conjecture, 31, 146
- Kloosterman sum, 57, 88
- Kummer sum, 94
- Lagrange's four-square theorem, 23
- Lebesgue measure, 25
- Legendre symbol, 53
- Line, 4, 5
- Minkowski dimension, 147
- MSTD set, 166
- Multiplication table problem, 138
- multiplicative character, 36
- Multiplicative subgroup of the integers mod  $n$ , 12
- Nondegenerate, 107
- Null vector, 58
- Order (of a Finite Field), 14
- Orthogonal group, 13, 127
- Orthogonality
  - finite field, 37
  - integers mod  $n$ , 77
- Parameter counting argument, 151
- Pigeonhole principle, 1
- Pinned distance set, 98
- Plancherel's theorem
  - finite field, 38
  - integers mod  $n$ , 77
- Polynomial ring, 11
- Product set, 137
- Projective plane, 4

- Quotient set, 2, 137
- Ramsey theory, 156
- Regular variety, 97
- Restriction theory, 70
- Ring, 10
- Roth's theorem, 157
- Salem set, 51
- Salié sum, 88
- Semerédi's theorem, 158
- Special Euclidean group, 112
- Special orthogonal group, 13
- Spectral gap theorem, 161
- Spherical average, 42
- Sphere of radius  $t$ 
  - finite field, 6, 37
  - integer mod  $n$ , 77
- Splitting field, 14
- Steinhaus theorem, 27
- Subfield, 14
- Sum set, 137
- Sum-product problem, 24, 135, 138
- Szemerédi-Trotter theorem, 24, 129, 130
- Triangle, 106
- Triangle inequality, 16
- van der Waerden's theorem, 157
- Vanishing proposition, 151
- Waring's theorem, 152
