Preface	ix
Chapter 1. Hyperplane sections of $\ell_p$ -balls	1
1.1. Lecture 1	1
Chapter 2. Volume and the Fourier transform	9
2.1. Lecture 2	9
Chapter 3. Intersection bodies	21
3.1. Lecture 3	21
3.2. Intersection bodies and ellipsoids	26
3.3. Non-intersection bodies all of whose central sections are intersection bodies	30
3.4. Generalized intersection bodies	33
Chapter 4. The Busemann-Petty problem	39
4.1. Lecture 4	39
4.2. A modification of the Busemann-Petty problem	43
4.3. The Busemann-Petty problem in hyperbolic and spherical spaces	45
4.4. The lower dimensional Busemann-Petty problem	55
Chapter 5. Projections and the Fourier transform	59
5.1. Lecture 5	59
Chapter 6. Intersection bodies and $L_p$ -spaces	67
6.1. Lecture 6	67
Chapter 7. On the road between polar projection bodies and intersection bodies	75
7.1. Lecture 7	75
7.2. The geometry of $L_0$	77
7.3. A Banach subspace of $L_{1/2}$ that does not embed in $L_1$	80
7.4. Common subspaces of $L_p$ spaces	84
Chapter 8. Open problems	87
Bibliography	101
Index	107
