

Index

Inside the Index we have included names of some authors who played a major role in shaping our subject. However such lists of names are always incomplete, as is ours, and we apologize. Added caution: Papers by Jorgensen and co-authors are cited inside the book. The co-authors are named where cited, but, in order to keep our index to a manageable size, their names are not included in the Index below.

- a Heisenberg uncertainty theorem, 55
- Aronszajn, N., 101, 135
- cascade algorithm, 1, 10, 19
- conditional expectation, 156, 227, 229
- Cuntz algebra, 1, 9, 10, 17, 40, 69, 142, 143, 145
- Daubechies, Ingrid, 12, 18
- de Branges, Louis, 100, 183, 190
- filter, 2, 10, 12, 13, 19, 38, 69, 143
- Fourier duality, ix, 5, 17, 55, 100, 180
- Fourier transform, ix, 19, 24, 29, 56, 125, 175, 243
- Fourier-Stieltjes transform, 8
- frames, 6, 12, 16, 17, 73–76, 78, 180, 182, 194
- frequency band, 6, 10, 13, 14, 19, 142
- frequency response function, 13
- Fuglede, Bent, 5, 17, 45, 46, 51, 53, 59
- fundamental domains, 220
- Gaussian processes, x, 20, 135, 212
- generalized Fourier duality, 5
- Glimm, James, 143
- Hutchinson, John E., 8, 31, 34, 39, 42
- infinite Bernoulli convolution, 29, 34, 41
- inner product, 5, 14, 16, 29, 40, 41, 49, 61, 101, 111, 125, 154, 166, 167, 173, 181, 189, 198, 205, 226, 228, 234, 243
- Itô, Kiyoshi, 211, 214
- iterated function systems (IFS)
 - measures, 2, 10, 24, 29, 38, 69, 143, 146, 158
- Jaffe, Arthur, 20, 219
- Kaczmarz, S., 180, 184
- Kakutani, Shizuo, 166
- Kolmogorov, Andrey Nikolaevich, 153, 157
- Krein, M. G., 100, 230, 231
- Lagarias, Jeffrey C., 51, 55
- Lie group, 3, 20, 109, 115, 219, 227, 241
- Markov process, 2, 12, 20, 227
- measure
 - atomic -, 114
 - Borel -, 6, 126, 167
 - Cantor -, ix, 8, 161
 - Clark -, 191, 193
 - continuous -, 30, 196
 - convolution -, 29, 30
 - counting -, 27, 29, 59
 - Dirac -, 52, 115

- entropy -, 80
- equilibrium -, 38, 39
- fractal -, ix, 24, 27, 121, 143
- Gaussian -, 20
- Haar -, 106, 109, 115
- IFS -, ix, 29, 45
- Lüvy -, 134
- Lebesgue -, 5, 11, 45, 48, 55, 180
- Markov -, 2, 143
- maximal entropy -, 17
- projection-valued -, 109, 113, 124, 129, 132, 144, 155
- singular -, 16, 17, 20, 180, 181, 183, 187, 190
- spectral -, 8, 12, 17–19, 31, 69, 175, 180
- uniform -, 1
- middle third Cantor measure, 8, 12, 28, 34, 115, 161, 182
- multiple intervals, 58
- multiresolutions, 2, 10, 19, 69, 83, 143
- Nelson, Edward, 166
- non-orthogonal Fourier expansions, 73
- non-smooth, 1, 2, 20, 45, 83
- orthogonal decomposition, 35
- Osterwalder, Konrad, 20, 219, 226, 229, 241
- positive definite function, 3, 19, 99, 100, 102, 105, 108, 112, 115, 121, 175
- positive definite kernel, 135, 164, 175, 180, 212
- projection valued random variable, 143
- projection-valued measure (PVM), 109, 113, 124, 129, 132, 144, 155
- quantum physics, ix, 241
- reflection positive, 3, 20, 241
- representations of Lie group, 20, 109, 227, 241
- representations of the Cuntz algebra, 10, 17, 40, 69, 142, 143, 145
- reproducing Kernel Hilbert Spaces (RKHS), 3, 17, 99, 101, 109, 113, 135, 164, 181, 188
- Rudin, Walter, 100
- Ruelle transfer operator, 8
- scale-4 Cantor measure, 161
- scale-4 Cantor measure, 8, 23, 34, 182
- Schrader, Robert, 20, 219, 226, 229, 241
- Sierpiński, Waclaw Franciszek, ix, 12, 149
- signal processing, ix, 10, 38, 143
- solenoid, 82, 92
- spectral pairs, ix, 34, 46, 51, 55, 61, 180
- spectral theory, 1, 2, 18, 35, 39, 58, 61, 63, 67, 99, 229
- stochastic processes, 3, 99, 141, 143, 228
- Strichartz, Robert S., 1, 9, 18
- the Fuglede Conjecture, 5, 17, 46, 52
- the uniform tiling conjecture, 51
- universal Hilbert space, 165
- up/down sampling, 14
- von Neumann, J, 54, 60, 61, 67, 132
- wavelet algorithms, 83, 143
- wavelet expansions, 79, 136
- wavelets, 2, 19, 57, 143
